

# dishwashers

New product introductions—October 2005 GE Profile™ dishwashers with SmartDispense™ technology

# Think outside the bottle!

Introducing the new
GE Profile™ dishwasher
with SmartDispense™
technology

Finally, a dishwasher that unloads itself (the detergent, that is).

#### GE Profile™ dishwashers quick pitch

Your life. Your style. GE just reinvented the dishwasher to fit both.

#### America's smartest dishwasher

It's simply genius! The **SmartDispense™ reservoir** holds an entire 45-oz. bottle's worth of liquid dishwasher detergent, automatically dispensing just the right amount for every load.

#### GE's quietest ever

Shhh...that's the sound of silence. With the advanced **QuietPower™7 sound package**, this dishwasher is as quiet as a library.

#### Simply brilliant performance

It's easy to see the difference. The **BrilliantClean**™ **towerless wash system** with **CleanSensor**™ senses details about each load, adjusting cycle time and water temperature as necessary to get dishes remarkably clean.

#### Ultimate flexibility

Angled Rack Dry™ system securely holds mugs and cups at an angle so water won't pool on top. Single Rack Wash™ selection saves time and energy by washing up to five place settings in the top rack only.

#### What's new: GE Profile™ dishwashers with SmartDispense™ technology

Your life. Your style. GE just reinvented the dishwasher to fit both.

#### SmartDispense technology

- It's the only dishwasher ever to hold the contents of an entire 45 oz. bottle of liquid or gel dishwasher detergent.
- Sensors determine the amount of detergent needed for each load based on how dirty the dishes are.
- The SmartDispense system is the only dishwasher to automatically dispense just the right amount of detergent based on the home's water hardness into the main wash cycle and every pre-wash to get dishes clean.

#### Angled Rack Dry<sup>™</sup> system

- It's easy to adjust the rack tines to hold dishes securely at any angle.
- Water drains right off cups and mugs.

#### Single Rack Wash™ selection

- This convenient cycle washes up to five place settings in the upper rack in a fraction of the time, using as little as 3-1/2 gallons of water.
- Perfect for smaller loads or for washing glassware.

#### GE's quietest dishwasher ever!

- Did you hear? At just 47dBA, it's as quiet as the neighborhood library.
- The new QuietPower<sup>™</sup>7 sound package includes a concealed ActiveVent, a blanket of sound-deadening bitumen, a stainless steel tub, sound-blocking toe-kick insulation and mechanical enclosures for our quietest operation ever.

#### Only dishwasher with three sensors!

- CleanSensor™ monitors water temperature and soil content and adjusts cycle length, to get dishes clean every time.
- FillSmart™ sensor senses water levels and how much water is needed to prime the pump, helping reduce water usage and control noise.
- Low-detergent sensor signals when it's time to refill the detergent reservoir before it runs out!

#### **GE Profile stainless sculptured handle**

- Stunning sculptured handle was developed to coordinate beautifully with other GE Profile appliances to create kitchens with a designer look.
- Each handle is crafted of luxurious stainless steel for beauty and endurance.

#### Only dishwasher with 3 pumps

Along with the QuietMotor,™ one pump circulates water throughout the wash system and the second removes soil as water drains away. The third pump dispenses detergent based on water hardness and soil level.

#### Only dishwasher to dispense detergent in all pre-washes

Improves wash performance by providing just the right amount of detergent throughout all pre-washes and the main wash cycle.

#### Only dishwasher to clean based on soil levels and water hardness

No need to use a full dispenser cup of detergent when a tablespoon would be enough! Dishwashers with SmartDispense technology use sophisticated sensors to monitor water temperature and soil level, then release just the right amount of detergent based on water hardness for optimal wash performance.

#### Feature gallery

#### SmartDispense<sup>™</sup> technology

Holds an entire bottle of liquid or gel dishwasher detergent, automatically dispensing just the right amount throughout every load (including pre-washes) for cleaner dishes.

#### Low-detergent LED

Signals three to seven loads remaining before the reservoir must be refilled. Makes it easy to know with a glance when it's time to fill with another bottle of detergent.

#### Angled Rack Dry™ system

Mugs and cups can be secured at an angle so water runs right off, virtually eliminating the need for dish towel drying.

#### Single Rack Wash™ selection

Washes only the upper rack of dishes, using less time, water and energy than required for a full load. Perfect for smaller loads of up to five place settings.

# Contour door with sculptured handle and hidden controls

Lends a beautiful designer appearance, hiding the controls inside the top edge of the dishwasher door.

#### Giant tub with maximum capacity nylon Pearlescent™racks and StemSafe™

Washes up to 16 place settings at once, holding stemware and dishes securely with durable racks that enhance the stainless interior.

#### Plastics cycle

Protects plastics and dries them fully by optimizing washing and drying temperatures.

# $\begin{array}{l} \text{QuietPower}^{^{\text{TM}}7} \text{ sound package} \\ \text{with concealed ActiveVent} \end{array}$

Features quieter-than-ever components, sound-deadening materials and a hidden vent that seals in sound during the wash cycle for our quietest dishwasher.

# 100% fold-down tines and adaptable bowl tines in lower rack

Flip up to hold bowls, or flip down for loading flexibility in the lower rack.

# Four-position adjustable/removable upper rack

Remove completely or move up, down or diagonally for maximum capacity.

# 6-level BrilliantClean™ wash system with CleanSensor™

Scrubs dishes clean with three full-sized wash arms, six levels of wash action and a sensor that continually monitors and adjusts the wash cycle for a superior clean.

# Countdown display with 1-24-hour Delay Start

Signals remaining cycle time with an added feature that starts the dishwasher when no one's home or during the hours when utilities are at reduced rates.

#### The inside story

# Bright annealed stainless steel interior

Adds a lustrous finish and lasting beauty that resists stains and corrosion.

# <sup>2</sup> GE Profile upper and lower rack handles

Slide racks out gently for loading and unloading.

# 3 Light-touch electronic controls

Engage with only a gentle touch and provide a smooth, sleek surface that wipes clean.

#### 4 SpeedCycle™ selection

Washes and dries lightly soiled dishes in 45 minutes, about half the time of a normal cycle.

#### 5 Audible end-of-cycle signal

Emits an audible signal to indicate the cycle has ended. If consumer prefers, signal can be easily disengaged.

#### 6 Maximum-capacity three-piece silverware basket and ExtraBasket™

Provides extra room for washing silverware, measuring spoons and other utensils.

#### Cutlery tray

Protects flatware and allows space underneath for more dishes.

#### 8 100% triple water filtration

Filters water three times during each load. When water stays clean, just-washed dishes do, too!

#### 9 Fan-assist dry

Uses a quiet fan to help dry dishes quickly and efficiently.

#### 10 Quiet water valve

Features a new design to reduce water flow noise.

#### 11 Dual pumps and motors

Improve performance by circulating water throughout the wash system, then removing food soil as water drains.

#### 12 Heat-bonded bitumen

Deadens sound with a high-quality, asphalt-type material baked onto the stainless steel tub.

#### Dare to compare

#### America's smartest dishwasher!

 GE Profile dishwashers with SmartDispense technology are America's smartest dishwashers, based on the comparison of "smart" features seen in the chart below.

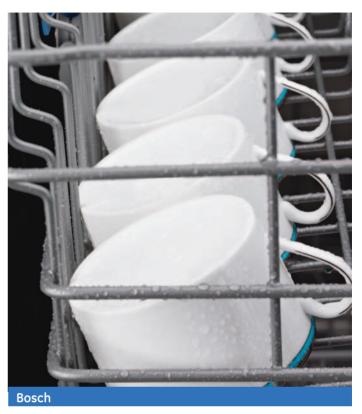

#### Competitive comparison

Competitive compansor					
	GE Profile	Bosch	Maytag	Kenmore	KitchenAid
SmartDispense	Yes	No	No	No	No
FillSmart <sup>™</sup> sensing	Yes	No	No	No	No
Detergent level sensor	Yes	No	No	No	No

Single Rack Wash™	Yes	Yes	No	No	No
Temperature sensor	Yes	Yes	Yes	Yes	Yes
Turbidity sensor	Yes	Yes	Yes	Yes	Yes
Delayed start	Yes	Yes	Yes	Yes	Yes
Last cycle memory	Yes	Yes	Yes	Yes	Yes

#### Angled Rack Dry<sup>™</sup> system

 No more worrying about pools of water left in cups and bowls after each load. These innovative tines can be tilted at various angles up to 45 degrees, positioning cups and mugs so water runs off. GE is the only manufacturer to improve drying performance with the Angled Rack Dry system.

• No one else offers this feature.

#### Competitive comparison—DryIndex

	GE Profile models	GE Profile models	Bosch models

#### Show and tell

#### SmartDispense<sup>™</sup> technology

Just empty an entire bottle of detergent into the dishwasher reservoir and it automatically dispenses the right amount into each load's pre-wash and main wash cycles. One bottle will last up to two or three months.\*

#### Detergent loading convenience

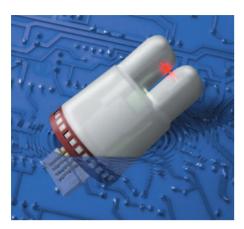

Filling with detergent is simple. Push down on the SmartDispense cap and then twist the cap off. Squeeze the entire 45-oz bottle of liquid or gel detergent into the reservoir. It's that easy.

For added flexibility, consumers who prefer powder dishwashing detergent may use it in the standard detergent cup, filling it prior to each load the same as a standard dishwasher.

#### Water hardness setting

The dishwasher adjusts detergent amounts based on the home's water hardness level. Consumers can quickly and easily set the dishwasher one time for optimal performance using a test strip (included) to test their home's water hardness.

#### Three sensors

- CleanSensor<sup>™</sup> continually monitors water temperature and soil levels, adjusting to get dishes remarkably clean.
- 2. FillSmart<sup>™</sup> sensor determines how much water is needed to prime the pump, minimizing water and energy needs.
- 3. Detergent sensor measures how much is left in the reservoir and signals when it's time to refill.

#### Low-detergent LED

A red LED on the control panel lights up when three to seven loads of detergent remain in the reservoir.

#### Angled Rack Dry<sup>™</sup> system

Dishes get drier now that water runs right off cups and mugs, instead of pooling and puddling. The rack design makes it easy to tilt the rack tines at 35° and 45° angles, holding dishes securely. No more puddle dumping!

#### Show and tell

#### SmartDispense<sup>™</sup>—control demo with kit 5-D543

**Front control models**—Select "Demo" mode by pressing "Normal" and "Added Heat" keys at the same time and holding down for five (5) seconds.

**Top control models**—Select "Demo" mode by pressing "Down" and "Added Heat" keys at the same time and holding down for five (5) seconds.

When the dishwasher is in "Demo" mode, the "Normal" and "Added Heat" LEDs will blink for three seconds and the ActiveVent will close.

- Press any button and the corresponding LED will light up.
- Example: Select a wash cycle and see the cycle length in the three-digit LED display, or press the "Delay Hours" key and see the number of hours delayed in the LED display.

#### Demonstrate how quiet this dishwasher is

Press the "Start" key to demonstrate actual sound level. The dishwasher will:

- 1. Display a countdown on the 3-digit LED starting with "999".
- 2. The main pump will run for 20 seconds. During this time, the LED for each wash selection will light up for three seconds with the remaining time displayed.
- 3. The demo will end by lighting up the "Normal" and "Heated Dry" LEDs, displaying the appropriate cycle time.

Note: The dishwasher will not try to pump out when the "Demo" mode is complete.

#### Show how easy it is to adjust for water hardness

Explain that the dishwasher should be set for individual water hardness so it always dispenses the right amount of detergent.

Tell customers that the user bag containing the Owner's Manual also includes a water hardness test strip and instructions are listed on the package to make testing easy.

Point out the control panel and demonstrate the following steps:

**On top control models**, hold down the "Up" arrow pad and "Delay Hours" pad at the same time for three (3) seconds.

**On front control panels**, hold down the "Cookware" and "Normal" pads to change the hardness level.

Once in water hardness setting mode, the three-digit display will show a number from 1 to 5. Use the "Up" or "Down" arrow to change the number on the display to the corresponding results from the test strip.

Press the "Start/Reset" pad to return to standby mode and end programming.

Electrical rating 120 Volts AC, 60 Hertz, 9.1 Amps
total connected load 875 Watt Calrod heater. For use
on adequately wired 120 volt, 15-amp circuit having
2-wire service with a separate ground wire. This
appliance must be grounded for safe operation.

Requires kit for trimless 3/4 painer capability

\*Sensor controlled

\*\*Certified by National Sanitation Foundation.

\*\*\*SS = Stainless steel, WW = White on white, CC = Bisque on bisque, BB = Black on black.

†For best results, use shower nozzle attachment when upper rack is removed.

††Add 1/2" for deepest part of contour door.

#### Dishwasher nomenclature

#### America's smartest dishwasher

It's simply genius! The **SmartDispense™ reservoir** holds an entire 45-oz. bottle's worth of liquid dishwasher detergent, automatically dispensing just the right amount for every load.

#### GE's quietest ever

Shhh...that's the sound of silence. With the advanced **QuietPower™7 sound package**, this dishwasher is as quiet as a library.

#### Ultimate flexibility

Angled Rack Dry™ system securely holds mugs and cups at an angle so water won't pool on top. Single Rack Wash™ selection saves time and energy by washing up to five place settings in the top rack only.

# a product of **ecomagination**<sup>™</sup>

#### A century of quality and innovation

For more than a century, GE has been committed to producing innovative products that change the way people live. The result of thorough research and rigorous testing, GE appliances are designed for years of dependable performance.

Today, the GE tradition of quality and innovation continues.

**GE Consumer & Industrial** Appliances General Electric Company Louisville, KY 40225 ge.com GE has a policy of continuous improvement of its products and reserves the right to change materials and specifications without notice.
