Gallons/year is a measure of energy use. Your utility company uses it to compute your bill. Only models with first hour ratings of 65 to 74 gallons are used in this scale.

Propane gas water heaters that use fewer gallons/year cost less to operate. This model's estimated yearly operating cost is:

\$320

Based on a 2004 U.S. Government national average cost of \$1.23 per gallon for propane gas. Your actual operating cost will vary depending on your local utility rates and your use of the product.
