

ClimateKeeper2™

2006 GE Profile™

dual-evaporator refrigerators

Profile™

Two separate
climates.
One fresh idea.

Climate One—fresh food

Cool + Humid

Moist air in the fresh food compartment helps foods retain their texture, color and flavor.

Climate Two—freezer **Cold + Dry**

A constant flow of cold, dry air in the freezer helps prevent frosting and freezer burn.

ClimateKeeper2™ is the industry's most advanced refrigeration system.

Foods stay garden fresh longer.

Asparagus—Day 1

**Asparagus—Day 5
ClimateKeeper2™ system**
Fresh-looking in texture and color,
the bright-green stalks stand straight.

**Asparagus—Day 5
Conventional system**
Stalks have begun to bend and tips
are no longer firm and crisp.

Bologna—Day 1

**Bologna—Day 5
ClimateKeeper2 system**
Slices remain moist, smooth and
uniform in color.

**Bologna—Day 5
Conventional system**
Slices start to look and feel leathery
and are curled at the edges.

Lemons—Day 1

Lemons—Day 5
ClimateKeeper2 system

Still fresh and juicy, slices stay bright and moist.

Lemons—Day 5
Conventional system

Fruit pulp is losing moisture and rinds are shriveling.

Mushrooms—Day 1

Mushrooms—Day 5
ClimateKeeper2 system

Still fresh and firm, mushrooms remain smooth and meaty.

Mushrooms—Day 5
Conventional system

Mushrooms are shriveling, shrinking and falling apart.

Refrigeration at its freshest.

The ClimateKeeper²™ system is available with the following appearances.
