

### **Dimensions and Specifications (in inches)**

Front Flush With Cabinets - a Minimum of 25-3/4" Cabinet Depth Required

This cooktop is factory set for natural gas and has 6 gas burners and a griddle.

### **Liquid Propane Gas Model Also Available:**

ZGU48L6DWSS-6 gas burners and griddle.

### **Installation Options:**

This cooktop can be installed in standard 24" or deeper 25" cabinets.

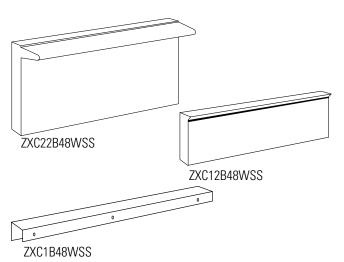

- In 24" deep cabinets, the front of the cooktop will project approximately 1-7/8" beyond the front of the countertop.
- In 25" deep cabinets, the cooktop will be flush with the front of the countertop
- The stainless surface of the cooktop will be 1/2" higher than adjacent countertop.

### **Accessory Requirements:**

All models **require** the installation of a backguard. A backguard should be ordered at the same time as the cooktop. Both should be on site before cabinetry has been installed.

### Order one backguard:

ZXC1B48WSS-1-1/2" high backguard (required for island installations) ZXC12B48WSS-12" high backguard ZXC22B48WSS-22" high backguard with warming shelf (2 piece)

### **Dimensions and Specifications (in inches)**

### **Advance Planning:**

Refer to dimensional drawings for appropriate placement and necessary clearances when planning the installation.

- Cabinetry cannot be installed directly above the cooktop.
- This cooktop requires the installation of a vent hood, 30" to 36" above the surface.
  - -The vent hood must be at least 24" deep.
  - -The vent hood must be the same width as the cooktop.
  - -The vent hood blower should provide at least 800 CFM and up to 1200 CFM.
- Working areas adjacent to the range should have 18" minimum clearance between countertop and cabinet bottom.
- Clearance between cooktop and side wall or combustible material must be at least 12" on each side.
- This cooktop requires 8" free space below the countertop.
- If the cooktop is installed in an island:
  - –Allow 12" min. clearance at the back to combustible materials.
  - -Allow 36" min. above the cooking surface to combustible materials.
- Installation must conform with local codes. In the absence of local codes, the gas cooktop must comply with the National Fuel Gas Code, ANSI Z223.1, latest edition.

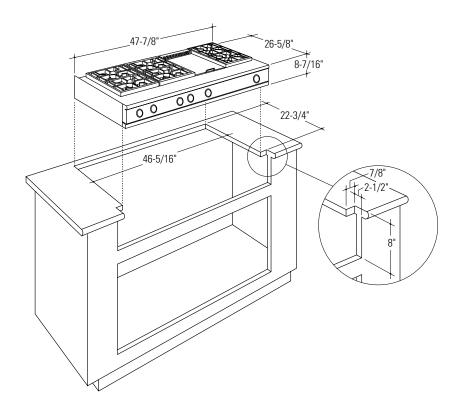

A.G.A. approved

### **Cutting the Countertop Opening:**

Measure carefully when cutting the countertop. Make sure sides of the opening are parallel.

- This Monogram<sup>™</sup> gas cooktop is designed to fit in 48" or larger base cabinet.
- This cooktop requires 8" free space below the countertop.
- The cooktop is designed to hang from the countertop from its side flanges.

The countertop must be strong enough to support the weight of the cooktop.

- Smooth any rough edges on the countertop before installing.
  - -Formica countertop edges must be finished.
- Support cleats can be secured to cabinet sides **OR** build a support deck or box inside the cabinet which will support the weight of the cooktop.
  - -Build the support box using a solid material, cut a 5" x 5" square in the left rear corner for the gas inlet and power cord clearances.

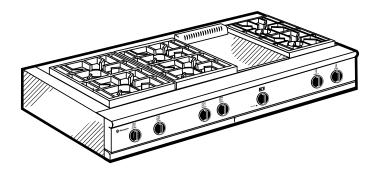

### **Installation Information:**

Before installing, consult installation instructions (Pub. No. 49-8812) packed with product for current dimensional data.
