

Monogram Built-In Wall Ovens

Built-In Wall Ovens

At today's hectic pace of life, it seems every hour is rush hour. There's barely any time to savor a delicious meal, much less prepare one.

Monogram® built-in cooking products give you the time—and technology—you need to create glorious dishes. Innovative in design and function, each oven excels at mealtime multitasking. And each beautifully complements the other for a sleek, perfectly coordinated look.

For the ultimate in cooking versatility, combine the Monogram Trivection™ wall oven with a Monogram Advantium® wall oven and warming drawer.

Advantium Speedcook technology. Monogram wall ovens harness the power of light to do what no other oven has done before—deliver delicious results up to 8 times faster than a conventional oven.

Trivection technology. Thermal, convection and microwave cooking processes work together to produce delectable food up to 5 times faster than a conventional oven.

Reverse Air convection on Electronic convection wall ovens. A bi-directional fan delivers consistent cooking performance, allowing heated air to circulate on all sides of food.
