ENERGYGUIDE

Clothes Washer
Capacity: Standard
Top Loading

Model WPRB9250C

Compare the Energy Use of this Clothes Washer
with Others Before You Buy.

kWh/year (kilowatt-hours per year) is a measure of energy (electricity) use. Your utility company uses it to compute your bill. Only standard size, top loading clothes washers are used in this scale.

Clothes washers using more energy cost more to operate. This model's estimated yearly operating cost is:

\$45

\$20

when used with an electric water heater

when used with a natural gas water heater

Based on eight loads of clothes a week and a 1998 U.S. Government national average cost of 8.03¢ per kWh for electricity and 68.8¢ per therm for natural gas. Your actual operating cost will vary depending on your local utility rates and your use of the product.

Important: Removal of this label before consumer purchase violates the Federal Trade Commission's Appliance Labeling Rule (16 C.F.R. Part 305).
