GE Profile™ and GE® Refrigerators

The Ultimate in Refrigeration.™
Rethought. Reinvented. Revolutionized.

imagination at work

The Ultimate in Refrigeration.™

GE Profile Arctica™ refrigerators bring a breath of

fresh air to your kitchen and your life. The stylish

exterior makes a **dramatic** statement, and the

multilevel interior makes **versatile** use of every inch

of storage space. In the fresh food compartment,

slide-out shelves simplify loading and unloading. In

the freezer compartment, the ice system is **uniquely**

designed to allow more room for more food.

In addition

to **innovative** storage features,

both compartments offer a range of cooling

capabilities for the ultimate in **flexibility**

and **performance**.

CustomCool™ technology
Exclusive CustomCool technology gives you the ability to chill and thaw much faster than ever before possible. It also lets you select just-right temperatures for a variety of fresh foods.

ClimateKeeper™ system
Exclusive ClimateKeeper system helps preserve refrigerator contents by providing consistent cooling.

Contoured style
Arctica's clean contours and lines are perfectly compatible with any kitchen setting.

Integrated Ice™ system
The icemaker and ice bucket are integrated in the freezer cabinet, not the freezer door, to free up valuable storage space. The bucket pulls out and down, providing easy access to cubed ice.

GE Profile Arctica refrigerators offer exclusive cooling capabilities, dramatic styling and flexible features.

GE Profile Arctica™ Side-By-Side Refrigerators

Specialized settings let you customize cooling for a variety of foods.

GE Profile Arctica side-by-side refrigerators include a number of high-performance capabilities. Perhaps the most notable is our exclusive CustomCool™ technology. A fresh take on cooling, this bottom pan feature offers three settings for different lifestyle needs:

ExpressChill™ setting chills foods and beverages in minutes, not hours.

ExpressThaw™ setting thaws meats and other freezer items in hours, not days.

SelectTemp™ setting allows you to select just-right temperatures for specific foods.

Using these specialized settings, you are able to avoid the last-minute rush and simply relax. Whether the occasion calls for impromptu hors d'oeuvres for 20 or filet mignon for two, CustomCool takes care of everything.

It chills!

It thaws!

It preserves!

It fully extends!

Multiple storage levels and options mean increased flexibility and convenience.

GE Profile Arctica Side-By-Side Models featuring CustomCool™ technology

These models include: Contoured doors • ClimateKeeper™ system • TurboCool™ setting • Upfront electronic touch temperature controls • Digital temperature display • CustomCool technology with full-extension drawer • FrostGuard™ technology • In-the-door can rack • Integrated Ice™ system • SmartWater™ Plus filtration system • Quick Ice™ feature • Water filter indicator light • LightTouch! tall dispenser with child lock and door alarm • Premium quiet design • Integrated shelf support system • QuickSpace™ shelf • Two slide-out, spillproof glass shelves • ClearLook™ adjustable door bins • Gallon door storage • Slide 'n Store™ full-extension freezer baskets • Tilt-out wire freezer door bins • Contoured Profile handles • Tri-level lighting • NeverClean™ condenser

Note: bold = feature upgrade from previous model

Refreshment center provides easy access to frequently used items.

ONLY GE HAS IT!

ClimateKeeper system combines a multifold air system, electronic sensors and electronic touch controls to keep temperatures consistent and help preserve refrigerator contents.

ONLY GE HAS IT!

Tall LightTouch! dispenser fills sport bottles, pitchers, even blenders! Delivers chilled filtered water, crushed or cubed ice.

- **1.8 cu. ft. capacity** • One fixed wire cabinet shelf
- One full-width, one half-width door shelves

GE Profile™ Wine Cooler: 4.3 cu. ft.

GE Profile
Wine Cooler

PWR04FAN

- 4.3 cu. ft. capacity
- Five slide-out shelves (holds 29 bottles)
- Clear glass door
- Electronic adjustable controls • Interior light
- Lock

GE Profile Arctica™ Bottom-Freezer Refrigerators

Fresh Food First.

Arctica bottom-freezers are uniquely configured to put fresh foods within convenient reach. Full-width shelves allow easy access to refrigerator contents, and brilliant lighting allows easy viewing of items.

While these new refrigerators put fresh food first, frozen food storage is also given thoughtful consideration. A multi-level storage system gives you tremendous storage flexibility. Also, an Integrated Icemaker™ gives you all the ice—and space—you need.

Both the fresh food and freezer compartments use innovative cooling technology to help preserve foods and conserve energy. In addition to fresh technology, GE bottom-freezers offer a fresh style twist with contoured doors and sculptured handles.

GE bottom-freezer refrigerators are a top choice among consumers who want modern design and maximum convenience.

ONLY GE HAS IT!

Contoured doors and sculptured handles

Gently contoured doors and GE handles offer a dramatic, kitchen-enhancing look.

ONLY GE HAS IT!

ClimateKeeper™ system

Combines upfront electronic touch controls, multiple electronic sensors and a multiframe air system to keep temperatures consistent and help keep foods fresh.

ONLY GE HAS IT!

Integrated Icemaker™

Combines an icemaker and ice bin in one system to save space and hassle. The ice bin is built into the icemaker, not the freezer baskets, so cubes don't fall onto the freezer floor.

GE Profile Arctica Bottom-Freezer Drawer Models: 22 to 20 cu. ft.

These models include • Upfront electronic touch controls with digital temperature readout • ShelfSaver™ beverage rack • Slide-out, spillproof glass shelves • QuickSpace™ shelf • FrostGuard™ technology • ClearLook adjustable gallon door bins • Multi-level Slide 'n Store™ basket system • Adjustable humidity vegetable/fruit crispers • Adjustable temperature deli pan • Contoured doors • Sculptured handles • NeverClean™ condenser • Deluxe quiet design • Equipped for optional automatic icemaker **Note: bold = feature upgrade from previous model**

QuickSpace shelf quickly slides out of the way to make room for tall items.

ShelfSaver beverage rack provides space for odd shapes and sizes.

Slide 'n Store freezer drawer provides easy access to frozen foods.

GE Profile

Icemaker Models

*Color(s) available: BS = Black case with stainless steel doors, SS = Stainless steel, WW = White on white, CC = Bisque on bisque, BB = Black on black, CM = Color-Matched.

If installed against a wall, allow clearance of 13-15/16" on freezer side to remove bin.
Clearance required to remove fresh food full size pan without disassembling is 18-5/8".

ALL MODELS AVAILABLE IN U.S. AND CANADA.

GE Profile Arctica CustomStyle™ Side-By-Side Installation Information and Specifications

Rough-In Dimensions

Standard, New Construction and Replacement Installation

Installation Tips to Maximize the Built-In Look

- All wall/floor molding should be removed prior to installation.
- Water recess on rear wall recommended to prevent water line damage. 48" minimum length, 1/4" diameter water line tubing recommended.
- When possible, recess both copper water line and electrical outlet. (See local codes)
- Front and rear leveling legs are adjustable for the built-in look. (See owner's manual)
- If optional collar trim kit is to be used or anticipated, see collar trim installation on next page for different rough-in dimensions.

*The rough-in dimension of 70-1/4" is minimum and is measured from the finished floor to top of opening (or the underside of the overhead cabinets). For Models with Trim Kit: If frameless style cabinets are planned for above the refrigerator, you may need to consider adding a maximum of 1/4" (70-1/2") to height of opening to allow additional clearance between cabinet doors and top of refrigerator trim when cabinet doors are in open position.

Door Panel Dimensions

Freezer Panel without Dispenser

Freezer Panel with Dispenser

Fresh Food Panel

Order your own custom wood panels to match cabinetry or other decor.

Panels up to 1/4" thick will fit door frame with no special preparation. Add filler behind material thinner than 1/4" for proper fit.

Weight Limits: Total weight of panels (i.e., both freezer panels)—Fresh Food = 38 lbs., Freezer = 28 lbs.

Note: Panels up to 3/4" will require special routing area around handles. Dimensions may vary depending on depth of panel.

Detail C

(Fresh Food panel shown)
Notch required at top corner as noted.

Installation of Water Outlets

Top View

Rear Wall View

IMPORTANT: Before finalizing specifications for your GE Profile CustomStyle Refrigerator, please NOTE:

- A minimum of 36" is required for refrigerator installation
- Be sure to allow for 1/2" or 3/4" side panels in addition to the 36" minimum

Collar Trim Installation

An enclosure is **required** to match up to the trim, see Typical Installation. To obtain the most integrated look, the cabinet or soffit above the refrigerator should extend out to the same depth as the side panels. The refrigerator opening must have minimum dimensions of 70-1/4" high x 36-1/8" wide x 24-1/2" deep as shown at right. If there is an overhead cabinet, allow 1" for cabinet door clearance with the top trim piece so the cabinet doors can be opened without hitting the top trim. If 1/2" side panels are used, then side trim and panel will be even. If 3/4" side panels are used, then some of the side panel will extend beyond the trim and must be finished.

*The rough-in dimension of 70-1/4" is minimum and is measured from the finished floor to top of opening (or the underside of the overhead cabinets). For Models with Trim Kit: If frameless style cabinets are planned for above the refrigerator, you may need to consider adding a maximum of 1/4" (70-1/2") to height of opening to allow additional clearance between cabinet doors and top of refrigerator trim when cabinet doors are in open position.

Typical Installation

Shaded areas represent front surfaces of side panels and overhead cabinet or soffit that contacts trim.

IMPORTANT: Before finalizing specifications for your GE Profile CustomStyle Refrigerator, please NOTE:

- A minimum of 36-1/8" is required for refrigerator installation with collar
- Be sure to allow for 1/2" or 3/4" side panels in addition to the 36-1/8" minimum

Create a Custom Look for Your GE Profile CustomStyle Side-By-Side Refrigerator

Still another advantage offered by GE Profile CustomStyle Refrigerators is ease of installation. For a refrigerator that does so much to enhance the beauty of your kitchen, the "behind-the-scenes" preparation and installation is surprisingly simple.

Fabricating the Enclosure

- The drawing shows an 84" cabinet elevation. Adjust dimensions accordingly for other cabinet elevations.
- Cabinet pieces to order: (2) side panels and (1) wall cabinet.
- Side panels will typically be attached to adjacent cabinets and/or cleated to rear wall and floor.
- Refer to GE refrigerator installation instructions for proper plumbing, and electrical and air clearances.
- (1) Some framed cabinet lines will make a refrigerator enclosure with a cabinet 12" high x 39" wide with sides and 1-1/2" face frame extended down to floor to create the refrigerator space. This will replace the above construction.
- (2) A tall cabinet on either side of the refrigerator can replace a side panel!
- Counter overhangs on either side of the refrigerator should have clipped corners to allow for full door swing.
- If the refrigerator has a wall returning beyond the front of the refrigerator on either side, a 2" tall filler will help to allow for movement of the door.

Door Panels

- See drawings for exact dimensions of the fresh-food and freezer door panels.
- Refrigerator door fronts from stock and most semi-custom cabinet manufacturers will be supplied as 1/4"-thick panels cut to dimensions, with closest available standard door sizes applied to front.
 - This will leave a "reveal" at top/bottom and sides.
 - Width of "reveal" will depend on manufacturer's standard door sizes.
 - Door will be affixed on the 1/4" panels at factory or in the field by the local supplier, depending on manufacturer.
- Local shop-built or custom cabinet supplier may fabricate custom 3/4" panels. In this case, edges must be routed.
- Follow notes on drawing to assure room for fingers/hands to open handles.

*Color(s) available: BS = Black case with stainless steel doors, SS = Stainless steel, WW = White on white, CC = Bisque on bisque, BB = Black on black, CM = Color-Matched, CleanSteel = Stainless appearance.

†Water hook-up fits in back air clearance when calculating installation depth.

If installed against a wall, allow clearance of 10-3/4" on 20 cu. ft. and 22 cu. ft. models; 14-3/16" on 25 cu. ft. models on freezer side to remove bin.

Clearances required to remove fresh food full-size pan without disassembling: 13-1/2" on 20 cu. ft.; 15" on 22 cu. ft.; and 18-15/16" on 25 cu. ft.

Allow additional space for any necessary leveling adjustments.

ALL MODELS AVAILABLE IN U.S. AND CANADA.

Total volume and shelf area are calculated by the Association of Home Appliance Manufacturers' standards.

Listed by Underwriters Laboratories

*Color(s) available: WW = White on white, CC = Bisque on bisque, BB= Black on black, CM = Color-Matched.

†Water hook-up fits in back air clearance when calculating installation depth.

If installed against a wall, allow clearance of 10-3/4" on 20 cu. ft. and 22 cu. ft. models; 14-3/16" on 25 cu. ft. models on freezer side to remove bin.

Clearances required to remove fresh food full-size pan without disassembling: 13-1/2" on 20 cu. ft.; 15" on 22 cu. ft.; and 18-15/16" on 25 cu. ft.

Allow additional space for any necessary leveling adjustments.

ALL MODELS AVAILABLE IN U.S. AND CANADA.

GE Profile CustomStyle™ Top-Freezer Installation Information and Specifications

Rough-In Dimensions

Standard, New Construction and Replacement Installation

Installation Tips to Maximize the Built-In Look

- All wall/floor molding should be removed prior to installation.
- Water recess on rear wall recommended to prevent water line damage. 48" minimum length, 1/4" diameter water line tubing recommended.
- When possible, recess both copper water line and electrical outlet. (See local codes)
- Front and rear leveling legs are adjustable for the built-in look. (See owner's manual)

Collar Trim Installation

An enclosure is **required** to match up to the trim, see Typical Installation. To obtain the most integrated look, the cabinet or soffit above the refrigerator should extend out to the same depth as the side panels. The refrigerator opening must have minimum dimensions of 70-1/4" high x 36-1/8" wide x 24-1/2" deep as shown at right. If there is an overhead cabinet, allow 1" for cabinet door clearance with the top trim piece so the cabinet doors can be opened without hitting the top trim. If 1/2" side panels are used, then side trim and panel will be even. If 3/4" side panels are used, then some of the side panel will extend beyond the trim and must be finished.

Rough-In Dimensions

Collar Trim Installation

*The rough-in dimension of 70-1/4" is minimum and is measured from the finished floor to top of opening (or the underside of the overhead cabinets). For Models with Trim Kit: If frameless style cabinets are planned for above the refrigerator, you may need to consider adding a maximum of 1/4" (70-1/2") to height of opening to allow additional clearance between cabinet doors and top of refrigerator trim when cabinet doors are in open position.

For 22 cu. ft. models only.

*22" depth applies to the refrigerator opening, not the actual cabinet depth.

Door Panel Dimensions

Order your own custom wood panels to match cabinetry or other decor.

	Fresh Food Panels	Freezer Panel Without Dispenser	Freezer Panel With Dispenser
22 cu. ft.	B-42-1/4" C-35-3/4"	A-24-1/16" C-35-3/4"	D-24-1/16" C-35-3/4"

Panels up to 1/4" thick will fit door frame with no special preparation. Add filler behind material thinner than 1/4" for proper fit.

Note: Panels up to 3/4" will require special routing area around handles. Dimensions may vary depending on depth of panel.

Handle Side Clearance

- At least 2-5/8" (67mm) on the handle side for fingertip clearances.

Top and Bottom Clearance

- At least 3/16" (4.75mm) at the top and bottom edges to allow for trim flange.

Hinge Side Clearance

- A 3/4" (19mm) thick door panel may strike the adjacent countertops when the door is fully opened. Therefore, the hinge side clearance to raised panel will vary according to the installation situation.
 - Allow 1-3/4" (44mm) clearance when installation does not include side panels.
 - The installation of 3/4" (19mm) thick side panels requires less clearance because the space between the door and adjacent countertop is wider.
- To avoid door contact to countertop consider:
 - Miter the corner of the adjacent countertops 45°, or
 - Pull the refrigerator forward enough to avoid contact.

Stability Leg

- The top-freezer refrigerator is the first cabinet-depth top-freezer. This means depth is more shallow than conventional models and the width is larger. The stability leg gives the unit extra support.

IMPORTANT: Before finalizing specifications for your GE Profile CustomStyle Refrigerator, please NOTE:

- A minimum of 36" is required for refrigerator installation
- Be sure to allow for 1/2" or 3/4" side panels in addition to the 36" minimum
