Welcome home.

The details and designs of our homes are different, yet the comfort of *feeling at home* is something we all understand. It might come from the pleasure of familiar things, or the aroma of bread in the oven, or the laughter of children around your dinner table. If you enjoy cooking, the gracious art of entertaining and the company of friends, your kitchen is probably the heart of your home. That's why, when you build a new home or remodel, the kitchen becomes the center of your plans. A new kitchen can serve as your artist's canvas, the place you express yourself. It can announce your personal tastes and your confident sense of style. The GE Monogram Collection™ can be the inspiration for an outstanding kitchen design. Monogram® appliances offer the best in both American and European styling, with choices and design options that let you customize your kitchen to make it your own. Choose from a range of colors and finishes, custom door panels that contrast or complement cabinetry, custom door handles and other hardware, as well as a large selection of product sizes and configurations. Only Monogram offers the depth and breadth of design choices to go beyond customization, to personalization.

Monogram products give you the performance and luxury you deserve. The new Monogram refrigerators reflect clean lines, relevant innovation and timeless design. Advanced temperature management lets you select different environments for the various foods on your shelves and in the drawers. With the introduction of Monogram's 36" stainless steel gas cooktop, there's now a complete range of cooking capability on all five dual-flame stacked burners – from 140°F simmer to rapid boil. And the European design is as outstanding as the performance. The new Monogram dishwasher collection offers four distinctively different designs, from the fully integrated dishwasher with hidden controls to the professional series dishwasher. The latest *must-have* is the Monogram Chef's Washer. It's designed specifically for oversized, odd-shaped gourmet cookware and utensils. Details of our complete line of appliances are presented in this edition of *The Monogram Home*. The collection includes an expansive selection of cooking products, along with refrigerators, icemakers, wine chillers, dishwashers, compactors and outdoor cooking centers. To get an even better idea of how *The Monogram Home* fits into the context of your kitchen and your life, we suggest that you visit our Web site, **Monogram.com**, and order a full-line catalog. With photography of custom upscale kitchen settings and informative editorial copy, this catalog demonstrates that Monogram's wide appeal ranges from loft-dwelling urban lifestyles to stately country living. We hope you enjoy the sojourn.

**Professional cooking products. Everything you need
to indulge your culinary passions.**

Monogram® professional cooking products let you express a confident culinary attitude. They say you take cooking seriously and are proud to show it. Professional products offer the impressive look and performance of commercial appliances, in a selection of sizes and configurations especially designed for residential use. Monogram professional ranges are available in 48", 36" and 30" models; professional cooktops come in 48" and 36" models; the hoods are available in sizes that complement the cooktops and ranges.

Monogram professional ranges give you the advantages of dual fuel sources. Cooktop burners use a responsive gas flame, while electric self-cleaning, convection ovens offer precision control for roasting and baking. Simmer at a delicate 500 BTUs, or boil and sear at 15,000 BTUs. When the recipe calls for 'moderate heat,' that's precisely what you'll get. Nothing less, and certainly, nothing more.

Burners ignite electronically, without a pilot light. You also have a choice between natural gas or liquid propane, and you can customize the cooktop with the combination of burners, grills and griddles that best suits your cooking style. ■

Top: Professional ranges are fully finished on all sides in lustrous, heavy-gauge 304 stainless steel. They function handsomely as freestanding units beside open shelving, or build them into your cabinetry. (Range, ZDP48N4GDSS; Backguard, ZX22B48ASS; Hood, ZV881WSS)

Bottom left: Whether you're grilling, sautéing, simmering or searing, a professional cooktop is an ideal design choice when you prefer separate areas for cooktop preparation and oven baking and roasting. (Cooktop, ZGU36N6DSS; Backguard, ZXC22B36ASS; Hood, ZV671WSS)

Bottom right: Monogram professional hoods are available in two styles: straight-sided (shown) and taper-sided.

Professional Ranges

ZDP48N4GDSS 48" Professional Dual Fuel Range. Two electric ovens with combined capacity of 6.3 cubic feet. Companion oven offers thermal baking and broiling, plus a proofing function for breads.

ZDP36N4RDSS 36" Professional Dual Fuel Range. Electric convection oven provides 4.3 cubic feet of cooking capacity.

Size selection. Monogram professional ranges are available in 48", 36" or 30" widths.

Electronic self-cleaning, convection mode. Main oven convection mode allows cooking at a lower temperature or in less time, often eliminating the need for preheating. To clean the main oven, simply press a button and turn a dial.

Cast-iron burner grates. Porcelainized burner grates form a large cooking area. Electronic ignition with automatic reignition. Pilotless burners are automatically reignited, should the flame be inadvertently extinguished (except in simmer mode).

Wide range of performance. Heat output from the gas burners extends from an exceptionally low 500 BTUs, at the simmer setting, to a maximum of 15,000 BTUs at the highest heat.

Roller Racks. Three removable oven racks slide smoothly on ball-bearing rollers.

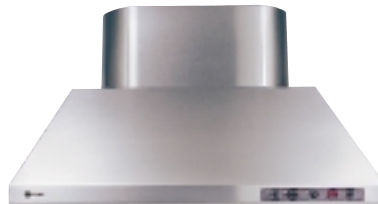

Professional Cooktops and Hoods

ZGU48N4GDSS 48" Professional Cooktop. Shown here with four burners, grill and griddle.

Choice of cooking surfaces. Professional cooktops offer complete cooking flexibility. Choose from four burners with a grill and griddle, or six burners with either a grill or griddle.

Precise control. The same exact control as our professional ranges. Grill settings from simmer to low, medium and high. Griddle heat from low through 450° F.

ZV880WSS 48" Professional Taper-Sided Hood. Available in sizes that perfectly complement your professional range or cooktop.

Powerful, efficient ventilation. 304-grade stainless steel canopy houses a 1200-CFM fan ventilation system.

Variable-speed fan. Draws steam, heat and grease particles away from the cooking surface, into the filters and through the vent system. Removable, dishwasher-safe filters.

High visibility. Two halogen lamps illuminate the cooking surface below.

Size selection. Available tapered or straight-sided in 48", 36" widths. 30" width in straight-sided only.

Versatile Configurations

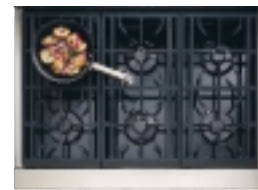

48" option. Four gas burners, a grill and a griddle.

48" option. Six gas burners and a grill.

48" option. Six gas burners and a griddle.

36" option. Six gas burners.

36" option. Four gas burners and a griddle.

36" option. Four gas burners and a grill.

Gas on glass and gas cooktops. The performance of gas, the cleanability of a smoothtop.

Monogram® gas on glass cooktops are an excellent choice if you want the cooking performance of gas combined with the ultimate cleanability of glass. The simple sophistication of these cooktops blends beautifully with any architectural style or decorative theme.

Each burner has electronic pilotless ignition and a flame stability chamber. Because the burners are sealed and mounted directly onto the glass, the entire surface is easy to clean. The cooktops come equipped for natural gas operation, but they can be converted to liquid propane use.

Monogram gas updraft and downdraft cooktops can be installed in a standard 24"-depth cabinet. The downdraft model comes with an integrated downdraft vent that installs flush with the countertop, creating a smooth, clean appearance. The updraft model requires overhead ventilation and is complemented beautifully by a Monogram stainless steel hood.

While all Monogram gas cooktops offer superior performance and cleanability, the pièce de résistance is the 36" stainless steel gas cooktop. The new, innovative cooktop provides true simmer-to-boil capability with five dual-flame stacked burners. The lower flame on each burner maintains a constant simmer, while the upper flame delivers the high heat necessary for searing, sautéing and stir-frying. ■

***Top.** Monogram cooktops can use overhead ventilation and pair beautifully with a Monogram stainless steel hood.*

(Hood, ZV950SDSS; Cooktop, ZGU375NSDSS)

***Bottom.** The downdraft model installs nearly flush with the countertop, for a simple, stand-alone effect. The vent lowers discreetly out of sight when the cooktop is not in use, and features variable speed controls and removable filters for easy cleaning. (Cooktop, ZGU365DBBBG)*

Gas on Glass Cooktops

ZGU36GGSDSS 36" Black, Gas on Glass Cooktop with Stainless Steel Trim

ZGU36GGTDWW 36" White, Gas on Glass Cooktop

ZGU36GGBDBB 36" Black, Gas on Glass Cooktop

Updraft ventilation. This cooktop can be ventilated using a Monogram stainless steel island hood or wall-mounted hood (see page 9).

Precise, versatile temperature control. Equipped with one 15,000-BTU burner, one 11,000-BTU burner, one 9100-BTU and two 6000-BTU burners, this cooktop gives you a full range of powerful temperature control options.

Continuous grate design. Heavy pots are easy to slide from burner to burner. The heavy-duty, porcelain enamel grates are dishwasher safe.

Soft touch control knobs with tactile grips. Pleasing to the touch, the burner knobs provide a substantial feeling of being in control.

Gas Updraft and Downdraft Cooktops

ZGU3650WBWG 36" White, Gas Updraft Cooktop

ZGU3650BBBG 36" Black, Gas Updraft Cooktop

Updraft ventilation. This cooktop can be ventilated using a Monogram stainless steel island hood or wall-mounted hood (see page 9).

ZGU365DWBWG 36" White, Gas Downdraft Cooktop

ZGU365DBBBG 36" Black, Gas Downdraft Cooktop

Integrated downdraft venting system. The retractable, variable speed downdraft vent is integrated with the cooktop while the control knob is conveniently located among the burner knobs (see page 9).

Stainless Steel Gas Cooktop

ZGU375NSDSS
36" Stainless Steel Gas Cooktop (*natural gas*)

ZGU375LSDSS
36" Stainless Steel Gas Cooktop (*liquid propane*)

Sophisticated, European design. The graceful front edge forms a subtle arc consistent with the styling of other Monogram pieces. The design of the grates, burners and cooktop creates a sophisticated impression.

Dual-flame stacked burners. Five innovative burners offer complete simmer-to-boil capability, so you can simmer or sauté multiple dishes at once. These automatic reignition burners provide a dedicated simmer halo as well as a high flame, and each disassembles for easy cleaning.

Consistent, silent simmer flame. The simmer flame on all five burners remains silent as it delivers a consistent 140°F for even heat distribution, without any sticking or scorching. This also eliminates the need for accessories to maintain accurate simmer temperature.

60,000 total BTU power. The upper flames offer a range of high heat. The cooktop is equipped with one 15,000-BTU burner, two 12,000-BTU burners and two 10,500-BTU burners.

Continuous grates. The graceful composition of curves and tapered points is further enhanced with heavy-duty porcelain enamel coating. Interlocking design creates a stable surface that won't shift or slide.

Wok ring. Monogram includes a stainless steel wok ring for the center burner. It locks into place on the grate and accommodates most standard woks.

Ergonomically designed controls. There is an 'On' indicator light on the bezel of each knob. The matte-finished knobs have a high-temperature coating on the sides for a tactile grip.

Electric and digital cooktops. Cooking products designed to enhance your kitchen's appearance and capabilities.

There are many excellent reasons for choosing a Monogram® electric or digital cooktop. Perhaps the most compelling are precise temperature control and a seamless design that's remarkably easy to clean.

If you're a hands-on cook who likes the traditional feel of tangible controls, Monogram electric cooktops will appeal to you. These five-burner cooktops offer smooth-shaped knobs, thoughtfully positioned at center, that rotate smoothly from low to high, with infinite settings in between.

Smooth from edge to edge, Monogram digital electric cooktops are distinguished by glass touch controls and a sophisticated design that works well with any décor. In addition to an uncomplicated appearance, new Monogram digital cooktops also offer unmatched performance. When you touch a digital control pad, the designated burner responds in seconds. And it cools down up to three times faster than a standard burner.

Monogram's selection of modular cooktop components gives you maximum flexibility in designing your own personal cooking center. Select from electric, gas or grill components, with a choice of left or right knob controls, as well as venting options.

Hoods with graceful overhead designs provide updraft ventilation above electric or gas surfaces. The telescopic downdraft system is an unobtrusive venting method for 36" or 30" cooktops installed in an island or peninsula. ■

Top: The elegant hood provides both lighting and ventilation for the ceramic glass electric cooktop. The new cooktop has five burners and seven cooking combinations. (Hood, ZV850SB; Electric Cooktop, ZEU769SCSS)

Bottom: With 11 temperature settings and instantaneous heat delivery, Monogram digital electric cooktops give you nearly the same level of responsiveness provided by gas-powered cooktops. (Digital Electric Cooktop, ZEU36RSPSS)

Electric Cooktops

ZEU769TCWW 36" Electric Cooktop.

Five burners, seven cooking combinations. Ribbon elements include a 6" 1200-watt burner, a 7" 1500-watt burner, and a 6"/9" 1000-watt/2500-watt burner. An additional elongated cooking area is created by using two 7" elements with the bridge element for a total 4400-watt capability.

Rapid response. With the twist of a knob, ribbon elements can be adjusted from low to high, with infinite heat levels in between.

Component Systems

ZGW124ENSS
Gas Component.

ZEW145VSS
Electric Ribbon Component.

ZEW155NSS
Updraft Grill Component.

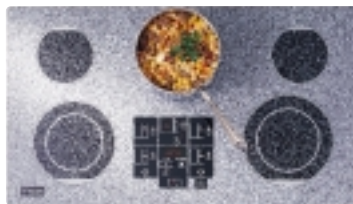

ZEW166YSS
Downdraft Grill and Vent Component.

Component cooktop system. This system offers gas, grill, or electric ribbon components that can be mixed or matched for a variety of cooking surfaces. Build them into an island or a perimeter countertop. Arrange them side by side, horizontally or vertically, or even end to end.

Versatile Digital Electric Cooktops

ZEU36RSFSS 36" Black, Digital Cooktop with Stainless Steel Trim

ZEU36RWFWW 36" White, Digital Cooktop

ZEU36RBFBB 36" Black, Digital Cooktop
(Also available in 30" configuration, all colors.)

Digital controls. The easy-to-use, touch-activated controls are identified by simple graphics on the glass.

Dual elements. All cooktops are equipped with two dual elements. Designed to accommodate small to large pan sizes, these elements reduce energy loss and optimize cooking performance.

Pan size and presence sensors. Each dual element has a sensor that automatically selects either a small or large element, depending on the size of the pan. If the pan is removed from any burner for more than a minute, a sensor will automatically shut off the element.

Full-function warmer. Positioned at center on 36" models and right rear on 30" models, the convenient warmer offers three warm settings, in addition to the 11 standard heat settings. You can prepare wine reduction, gently reheat roux or keep croquettes warm until serving.

Venting Options

ZVB36SBSS 36" Downdraft Vent. Monogram 36" or 30" telescopic downdraft systems complement gas and electric cooktops. They are perfect for island and peninsula cooking centers because they retract when not in use.

Variable speed fan. A powerful 500-CFM fan draws steam, heat and grease particles away from the cooking surface into the filters and through the vent system.

Ventilation filters. Easily removable and dishwasher-safe.

Multifunctional Hoods

Dual Blower Hood, ZV950SDSS. The four-speed dual blower fan operates at a maximum venting power of 700 cubic feet per minute. Halogen lighting illuminates the cooking surface, with six levels of intensity.

European-Style Hood, ZV750SY and ZV850SB. The four-speed fan blower operates at a maximum venting power of 360 cubic feet per minute. Designed for ease of operation, this hood features front-mounted buttons and a simple digital-icon display that indicates fan speeds or timed shutoff.

**Built-In Advantium Oven with Speedcook technology.
Old-world cooking, "new-age" speed.**

Imagine the luxury of home-cooked Peking duck in less time than it takes to go out and buy this gourmet carryout. Or the convenience of succulent garlic shrimp cooked in three minutes. This is the extraordinary capability of Speedcook technology.

The Monogram® Built-in Advantium™ Oven with Speedcook technology bakes, broils, roasts and even grills traditional oven dishes—in an average of one-fourth the time it takes in a conventional oven.

Advanced technology is shaped into elegant design in this new oven. Its dominant horizontal lines are set off by simple graphics and the tubular handle of its pull-down door.

This oven cooks by means of a dramatically different technology. Harnessing the power of light, the oven cooks the outside of foods much like conventional radiant heat, but also penetrates the surface so the inside cooks at the same time. For certain foods a "microwave boost" is added. As a result, foods cook evenly and rapidly, while retaining their delicious natural juices, textures and tastes.

The oven is easy to use and clean. We've also made installation a simple process. The built-in oven configuration lets it go wherever you like—as a complement to the single oven, over the essential Monogram warming drawer, or all by itself as its own speedcooking center. ■

***Top:** Speedcook technology expands the culinary capabilities of even the most seasoned kitchens. (Advantium Oven, ZSC2001CSS)*

***Bottom left:** The oven can be your main cooking source or an auxiliary oven for hors d'oeuvres and side dishes. (Advantium Oven, ZSC2001CSS; Warming Drawer, ZTD910SBSS)*

***Bottom right:** The oven is available in stunning stainless steel, or choose black (shown here) or white to contrast or complement other appliances. (Advantium Oven, ZSC2000CBB; Single Oven, ZET837BBBB)*

A New Genre in Cooking Appliances

ZSC2001CSS Stainless Steel, Built-In Advantium Oven with Speedcook technology

ZSC2000CWW White, Built-In Advantium Oven with Speedcook technology

ZSC2000CBB Black, Built-In Advantium Oven with Speedcook technology

Oven-quality food. The oven bakes, broils, roasts and even grills traditional oven dishes to delectable perfection. Foods cook evenly and rapidly, sealing in natural juices, textures and tastes.

Speedcook technology. Using dramatically different cooking technology, the oven harnesses the power of light to cook the outside of foods much like conventional radiant heat. At the same time the heat penetrates the food surface, cooking the inside.

Remarkable speed. Oven-quality foods cook in an average of one-fourth the time it takes in a conventional oven. Some foods cook up to eight times faster than a conventional radiant oven, with no preheating required.

Ease of use. Turn the selection dial to the recipe you want, then press. Help and Demo programs guide you through the simple process of choosing either a preprogrammed recipe, or customizing your own.

Gourmet Dishes, Extraordinary Speed

Classic croissants complement a variety of traditional dishes beautifully. (Eight croissants bake and brown to perfection in 4-1/2 minutes.)

Peking duck, home-cooked in 25 minutes, lets you serve a distinctive dinner to guests.

Golden phyllo pastries with different fillings make delightful variations on a theme.

Compare cooking times with a conventional oven

| Food | Advantium | Conventional |
|---|------------|--------------|
| Mushrooms stuffed with spinach | 5 minutes | 15 minutes |
| Chicken bites, tarragon-mustard sauce | 5 minutes | 20 minutes |
| Steak au poivre | 7 minutes | 15 minutes |
| Cornish hens Provençale | 13 minutes | 60 minutes |
| Leg of lamb, caper-wine sauce | 40 minutes | 105 minutes |
| Chicken breasts with feta-basil filling | 14 minutes | 35 minutes |
| Scalloped oysters | 11 minutes | 25 minutes |
| Classic lasagna | 17 minutes | 35 minutes |
| Vegetable frittata | 13 minutes | 25 minutes |
| Apricot-almond scones | 5 minutes | 10 minutes |

Built-In 30" Wall Ovens.

Delicious results with true convection cooking.

If you're like most chefs, cooking is a labor of love. But when you're preparing a complicated gourmet dish, it can become quite labor-intensive. A Monogram® built-in wall oven makes the experience simple and enjoyable. Thanks to true convection technology, your biggest challenge will be selecting the right plate and arranging the garnish.

Each 30" European convection oven ensures culinary success with a 3,000-watt, 12-pass broiling system and 2,500-watt baking capability. Four adjustable racks, including the convection floor rack, are designed to facilitate convection cooking of a wide variety of foods, from luscious soufflés to large roasts.

Monogram 30" electronic wall ovens also deliver exceptional, consistent cooking performance. These ovens perform superbly at all points in the heat spectrum, with a 4,000-watt, six-pass broiling system, ideal for rapid searing, and a 2585-watt bake element.

The ovens' gleaming exteriors are just as impressive as the savory dishes inside. The stunning European-design oven has a tubular handle, durable pull-down door, ergonomic knobs and an intuitive control panel. With its large viewing window, the overall appearance is grand and sleek.

The built-in electronic ovens are styled with an integrated, contemporary look, featuring touch-activated controls for an array of convenience functions. The frameless glass oven door and simply designed controls convey a look of technological sophistication. ■

Convection racks. The floor rack works in combination with the conventional oven rack, for convection cooking on four levels. Create multiple racks of quiches, appetizers and cookies, or use the convection floor rack alone for foods requiring additional cooking space such as large roasts or turkeys. Also included is a convection roasting rack that provides proper air circulation for excellent convection roasting performance.

2500-watt baking. Following European tradition, the 2500-watt bake element is concealed beneath the oven floor, simplifying ash removal after the self-clean cycle. A preheat light signals proper oven temperature.

3000-watt broiling. Three elements combine to form a powerful 3000-watt, 12-pass broiler system that provides exceptionally even heating. A reflector above the system directs heat downward, enhancing broiler performance.

4000-watt broiling. The 4000-watt broil element is ideal for the rapid searing of meats. The six-pass element provides consistent, even heat for uniform cooking.

2585-watt baking. The 2585-watt bake element is concealed for a smooth surface, simplifying ash removal after the self-clean cycle.

Electronic controls. Controls activated by a gentle touch select the desired cooking function: convection bake or roast, variable broil, 24-hour delay bake, timed cook, or warm mode (*ideal for proofing*).

Convection conversion. Automatically reduces time or temperature settings from conventional recipes to appropriate levels for convection cooking.

New 27" Double and Single Wall Ovens.
Innovatively styled outside, generously sized inside.

Location, location, location. In today's open kitchens, careful positioning of appliances is essential.

If you're in the process of remodeling, a Monogram® 27" convection wall oven can fit your plans exactly. Styled with a frameless glass or stainless steel oven door and touch controls, these sleek ovens blend almost seamlessly with surrounding cabinetry and counters.

Inside, these ovens have been reengineered for more usable oven space. Increased capacity, combined with convection capability, enhances your culinary experience.

Monogram 27" wall ovens, double and single models, deliver convection cooking by means of a dedicated third heating element located in the back wall. A fan circulates heated air. Known to professional chefs as "true convection," this process produces uniform cooking results. Beef roasts cook evenly and succulently. Baked breads maintain their delicate texture, while crisping on top to golden perfection.

Other Monogram built-in cooking products include our selection of microwave ovens in a variety of sizes and configurations and Monogram warming drawers, the latest "essential ingredients" for the complete gourmet kitchen. ■

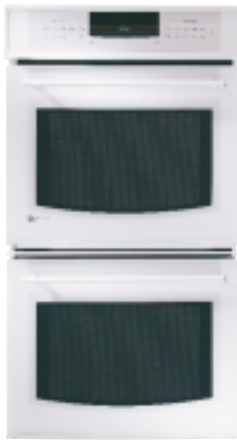

Top: The 27" double wall oven gives you the benefits of true convection cooking, exceptionally accurate temperature management and generous oven capacity. (27" Double Wall Oven, ZEK957SDSS)

Bottom: Electronic touch controls bring extraordinary cooking convenience to your kitchen. Select a cooking function, and the controls will respond accordingly. When dinner's done and the plates are cleared, simply wipe the panel clean with a towel. (27" Double Wall Oven, ZEK957BDBB)

Integrated appearance. The overall look is grand and sleek. The oven's clean, horizontal lines are set off by simple graphics and a large viewing window that curves slightly at the base.

Ample capacity. The 3.9 cu. ft. interior is generously sized and includes three baking racks for multicourse convection cooking. Create multiple racks of quiches, appetizers and cookies, or use the convection floor rack alone for foods requiring additional cooking space, such as large roasts or turkeys.

True convection. A third heating element in the back wall surrounds the fan, effectively circulating heated air. The advantages are faster cooking times, even browning and the ability to bake or roast on multiple racks simultaneously, saving time and energy.

Electronic controls. Controls activated by a gentle touch select the desired cooking function: convection bake or roast, variable broil, timed cook, or warm mode (*ideal for proofing*).

Sabbath mode. A Sabbath mode setting meets the requirements of the nationally recognized Kosher certifying agency, Star-K.

Convection conversion. Automatically reduces time or temperature settings from conventional recipes to appropriate levels for convection cooking.

Microwave Ovens

ZMC1095SB Built-In Microwave/
Convection Oven.

Three modes. The microwave/convection oven offers three ways to cook: microwave, convection or a combination of both.

Sensor cooking. Sensor controls automatically adjust the cooking time to accommodate the type and amount of food being prepared.

Installation flexibility. Can be installed alone, or built in above a 27" single oven. Side trim pieces are also provided to allow for installation over a 30" single oven.

Compact Microwave Oven

*Full cooking performance in a compact design. An ideal addition to a kitchen or entertainment room, **ZEM200SY**.*

Warming Drawers

ZTD910BBBB Warming Drawer.
Available in 30" and 27" widths.

Infinite degrees of "warm." Monogram warming drawers offer settings from a "proof" setting (approximately 75°), ideal for dough to rise properly, to a "high" setting (approximately 230°), perfect for warming plates.

Humidity control. An accurate control keeps foods crisp, or maintains proper moisture by simply opening or closing the vent.

Personalize your design. An optional trim kit lets the drawer accept custom panels to match cabinetry.

Built-In Side-By-Side Refrigerators.
Aesthetic engineering combines science and art.

Monogram® built-in side-by-side refrigerators beautifully reflect today's kitchen aesthetic — clean lines, relevant features and sophisticated design. Look closely and you'll find that Monogram is elegance, pure and simple.

On the outside, Monogram refrigerators are styled with understated simplicity. Install custom door panels, and you'll be amazed how the refrigerator disappears into the woodwork. Or, create a bold impression with the striking presence of the stainless steel model.

While the integrated design makes a stunning statement, the real beauty of Monogram built-in refrigerators lies beneath the surface. Housed discreetly beneath the top panel is the Monogram overhead evaporator. The unique configuration of this evaporator makes Monogram side-by-sides the most spacious and efficient built-in refrigerators available.

On the inside, you'll find revolutionary technology and practical features that simplify and enhance your life. A broad column of halogen light extends the length of the back walls of both the fresh food and freezer compartments. You'll never lose sight of little jars again.

The adjustable storage system, combined with the outside location of the overhead evaporator, maximizes space in the fresh food and freezer compartments. Monogram refrigerators let you select different environments for the various foods on the shelves and in the drawers. Once you select a specific environment, the refrigerator maintains that environment with extraordinary precision. ■

Top left: Custom framed door panels and standard handles complement adjacent cabinetry.
(42" Side-by-side Refrigerator, ZISB420DM)

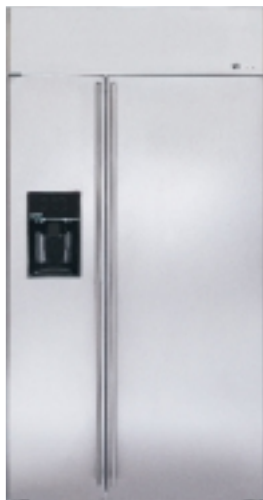

Top right: With custom overlay door panels and custom handles, the refrigerator blends beautifully into the cabinetry.
(42" Side-by-side Refrigerator, ZISB420DM)

Bottom: Each shelf is bathed in light, so every item is fully illuminated.
(48" Side-by-side Refrigerator, ZIS480NM)

Built-In Side-By-Side Refrigerators

ZISW480DM 48" Built-In Refrigerator, white dispenser

ZISS420DMSS 42" Built-In Stainless Steel Wrap Refrigerator, black dispenser

ZISB360DM 36" Built-In Refrigerator, black dispenser.

Customization. There are so many ways to make a Monogram refrigerator an integral part of your personal kitchen décor. Opt for the polished elegance of the stainless steel wrap model. Or, install custom door panels designed to match your cabinetry. Monogram built-in trimmed refrigerators require door and grille panels. Shown are models with 1/4" door panels (white and black), which are available from any Monogram dealer. Custom overlay panels from your cabinetmaker can also be fitted.

Temperature management system. Cool air is delivered directly from the overhead evaporator to freezer and fresh food compartments, allowing independent airflow for each zone without any direct air exchange.

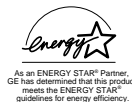

Five strategically located sensors continually monitor and maintain optimum cooling levels, while an exclusive air tower ensures that cool air is transported to every shelf and storage drawer.

Climate control drawer. Functions like a refrigerator within the refrigerator. Precise controls allow you to express chill wine and other beverages in minutes, rather than hours; thaw meats, poultry and seafood in hours, instead of days; or select specific temperatures for exotic foods that are particularly temperature sensitive.

Dispenser with proximity sensor. The convenient, extra-tall dispenser fills your pitchers, sports bottles and other oversized containers with refreshing, filtered water and ice. When you walk away from the refrigerator, the lighted graphics simply vanish.

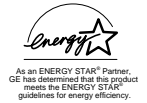

ENERGY STAR® qualified. As an ENERGY STAR Partner, GE has determined that the ZISB480DM, ZISW480DM, ZISB420DM, ZISW420DM, ZISB360DM, ZISW360DM, ZISS480DMSS, ZISS420DMSS and ZISS360DMSS meet the ENERGY STAR guidelines for energy efficiency, as well as the freestanding ZFSB25DMSS.

Freestanding Refrigerator

36" Freestanding Refrigerator. The lustrous stainless steel finish presents a professional appearance, reflecting quality and performance. **ZFSB25DMSS.**

Beverage Center and Wine Chiller

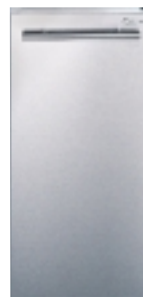

Beverage Center. Allows chilling of standing containers, such as bottles and cans, and accommodates up to 14 bottles of wine. **ZDB24ABB.**

Wine Chiller. Holds up to 50 resting bottles of your vintage labels. **ZDW24ABB.**

Icemaker

Icemaker. Valuable asset for party hosts and catering staffs. Produces up to 50 pounds of ice per day. **ZDIS15CSS.**

**Bottom-Freezer, All-Freezer and All-Refrigerator.
Appliances that open up a world of possibilities.**

Monogram® refrigerators include side-by-sides, bottom-freezers, all-freezers and all-refrigerators. A full selection of refrigerators allows you to choose the size and configuration that best suit your needs and preferences.

The convenient configuration of Monogram's 36" bottom-freezer is the perfect choice for households with a fresh-food focus. The eye-level accessibility (and visibility) of the top compartment eliminates bending to reach lower shelves. Versatile storage options preserve freshness, while letting you customize shelving.

The 36" all-freezer and all-refrigerator units let you increase food and beverage storage options wherever you need them—whether it's in the kitchen or pantry, or in auxiliary living areas for recreation and entertainment.

Installed in the kitchen alongside one another and flush with cabinets, the stainless steel wrapped version of these new refrigerators makes a stunning statement. Or, choose the models that accept custom panels. A single 72" grille panel kit is available to unify the appearance of any side-by-side installation.

Together or alone, these units become the ultimate refrigeration system for the GE Monogram home. The all-freezer makes a wonderful addition to busy households, letting parents stock up on plenty of family favorites. The all-refrigerator will appeal to those who understand the connection between food freshness and fine cuisine. ■

Top: Two Monogram Bottom-Freezers installed side by side create a thoroughly versatile refrigeration center when connected with the unified grille accessory. (Bottom-Freezer, ZIC360NMRH and ZIC360NMLH; Unified Grille Kit, ZUG2)

Bottom: The All-Freezer and All-Refrigerator come with left- or right-handed door swing. The two-level lighting system makes everything instantly visible. (All-Freezer, ZIF36NMLH; All-Refrigerator, ZIR36NMRH; Unified Grille Kit, ZUG75)

Bottom-Freezers

ZIC360NMLH
36" Bottom-Freezer Refrigerator (Left-handed door swing model shown with white panels)

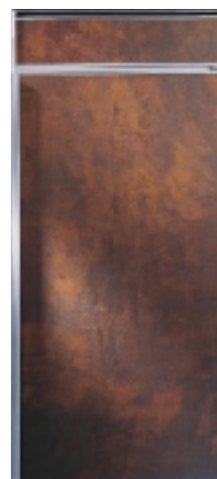

ZICS360NMRH
36" Bottom-Freezer Refrigerator (Right-handed door swing model shown with stainless steel wrap doors)

Bottom-Freezer.

Vegetable, snack, dairy pans. Vegetable compartments with individual humidity controls, as well as sealed snack pans, glide open smoothly. There's also a door storage dairy compartment that seals for longer freshness.

Freezer drawer. Opening easily on full-extension slides, the drawer provides two wire baskets for abundant storage and accessibility. The automatic icemaker bin is on the top shelf, pulling out automatically when the drawer is opened.

Customization examples

A simple statement is achieved with a standard handle and unique framed custom panels.

Understated elegance on an All-Freezer or All-Refrigerator results from 3/4" overlay, raised custom panels and custom handle.

All-Freezers and All-Refrigerators

ZIFS36NMLH
36" All-Freezer (Left-handed door swing model shown with stainless steel wrap doors)

ZIR36NMRH
36" All-Refrigerator (Right-handed door swing model shown with white panels)

All-Freezer. Features include an icemaker and slide-out baskets for full accessibility.

All-Refrigerator. Vegetable compartments offer individual humidity controls, as well as sealed snack pans, that glide open smoothly.

All-Freezer and All-Refrigerator. Both feature adjustable shelves that move up and down for custom storage arrangement. Adjustable door bins for gallon-size containers add important storage flexibility.

Traditional styling on a side-by-side installation using 3/4" overlay custom panels and custom handles.

Full-extension slides. All Monogram drawers, bins and baskets are made with world-class full-extension slides for solid open/close operation.

Left- or right-handed door swing. Door-swing preference must be specified when ordering. (Handles and hinges are not reversible.)

Dishwashers and Chef's Washers.
Strong, quiet kitchen help you can count on.

Monogram® introduces the ultimate kitchen combination — the Monogram dishwasher and exclusive Chef's Washer. Together, these hardworking appliances store and wash everything from serveware to cookware, which means no more unsightly stacks of soiled dishes or late nights spent cleaning.

The new Monogram dishwasher collection offers four distinct styles, each with dramatic design possibilities. The Fully Integrated dishwasher with hidden controls blends beautifully with your custom cabinetry. Or you can complement a commercial-style kitchen with the Professional Series dishwasher. The contemporary Fully Wrapped model makes a European impression, while the Built-In Monogram Dishwasher offers a more traditional look.

Every Monogram dishwasher operates with intelligent technology and relevant features designed to ensure exceptional performance. New turbidity sensors set water temperatures and cycle lengths to match soil levels. When washing is complete, Monogram's exclusive dry system leaves everything completely dry and ready to put away.

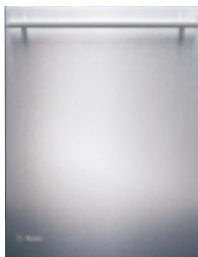

The perfect counterpart to a Monogram dishwasher, the Monogram Chef's Washer is also available in four designs. Developed especially for gourmet cookware, this one-of-a-kind washer makes it easy to keep up with all the pans and paraphernalia that pile up as you chop, whisk, simmer and sauté your way through a new recipe. ■

Top: Monogram's new Professional Series dishwasher and Chef's Washer complete the look of a commercial-style kitchen. (Dishwasher ZBD6600GSS, left; Chef's Washer ZBD6605GSS, right)

Bottom: The Monogram dishwasher makes room for plates, goblets, silverware and more. The Monogram Chef's Washer is specially configured for odd-shaped utensils and heavy-duty cookware, such as mixing bowls, sticky spoons and greasy pots. (Dishwasher, ZBD6900GSS, left; Chef's Washer, ZBD6905GSS, right.)

Racks. Intelligent design, intuitive moves. Rilsan™ nylon-coated racks adjust and adapt to all types of loads. Ball-tipped tines cradle dinnerware safely and securely.

World-class washing. Smart, soil-seeking sensors know how hot, how strong and how long wash cycles should run. Powerful, five-level wash performance easily handles heavily soiled loads.

Powerful forced-air drying system. A fan-assisted, vented drying system extracts moist, warm air. Dishes come out dry, ready for the table or shelf.

Unbelievably quiet. Wash action sounds are minimized through the use of advanced hydrodynamics. So when you're on the phone or talking to friends, these dishwashers will never be part of the conversation.

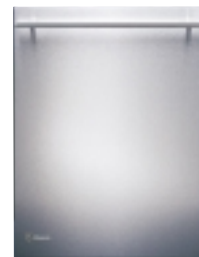

NSF certified. NSF certified to reduce 99.999% of bacteria.

ENERGY STAR® qualified. Newly designed cycles ensure these dishwashers exceed energy standards by 25%. As an ENERGY STAR Partner, GE has determined that the ZBD7100GSS, ZBD7000GII, ZBD6900GSS, ZBD6700GWW, ZBD6700GBB, ZBD6600GSS, ZBD6500GSS, ZBD6400GWW and ZBD6400GBB meet the ENERGY STAR guidelines for energy efficiency.

**Outdoor Cooking Products mean
great grilling is always in season.**

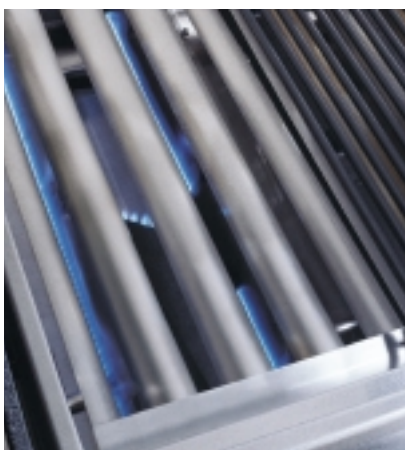

Grilling alfresco and gracious entertaining become all the more delightful with GE Monogram's outdoor cooking centers. The quality and styling that distinguish Monogram® appliances for the kitchen and home also characterize our outdoor cooking products.

The outdoor cooking collection offers a selection of heavy-gauge 304 stainless steel gas cooking products designed for built-in or freestanding applications. Grill configurations range from simple to sophisticated—from a 24" two-burner grill to our 48" complete cooking center that joins three grill sections with a motorized rotisserie, separate smoker burner and an integrated dual-burner cooktop.

Monogram Grills operate by means of an innovative system. Gourmet Radiant™ trays, exclusively from Monogram, are designed to help ensure the best grilling results for every kind of food. Beneath porcelain-coated grill racks, the Gourmet Radiant trays sustain remarkably even heat. The unique, rounded arc shape of the trays reduces flare-ups from dripping juices and heat pockets that cause uneven cooking and burning of foods.

Create your own taste of the great outdoors, whether it's salmon fillets, glazed chicken breasts, or spit-roasted prime beef. With Monogram, you don't have to compromise gourmet standards when there's no "roof over your head." ■

Top: Grilling à la carte? Monogram's practical touches include side shelves, large shelf and condiment bins inside. A smooth-sliding shelf gives full access to the liquid propane tank. (Grill, ZGG48N31CSS; Cart, ZX48CTACSS)

Bottom left: For ultimate outdoor cooking versatility of side dishes, sauces and other pan-prepared foods, install a separate dual-burner cooktop. (Dual Burner Cooktop, ZX2NYSS)

Bottom right: Beneath the racks, uniquely designed Gourmet Radiant Trays sustain even heat distribution.

Outdoor Cooking Centers

ZGG48N42CSS 48" Gas Grill with four grill burners, two rotisserie burners, one smoker, one warming rack (*natural gas*).

ZGG36N31CSS 36" Gas Grill with three grill burners, a rotisserie burner, one smoker, one warming rack (*natural gas*).

Gourmet Radiant trays. Beneath the grill racks these uniquely designed trays sustain even heat distribution. They reduce grease flare-ups, eliminate the need for lava rocks or briquettes and remove easily for cleanup.

Heavy-duty grill racks. Heat-retaining racks are porcelain enameled for easy cleaning.

Infrared rotisserie system. A ceramic 14,000 BTU infrared burner, mounted behind the motorized rotisserie, reaches cooking temperature in just 30 seconds, providing the intense heat needed for searing meats and poultry.

Porcelain-coated cast-iron burners. The spark-ignition burners are 15,000 BTU-rated, and come with a removable stainless steel cover that doubles as a work surface. Burners are baffled to reflect heat into the cooking area.

ZGG27N21CSS 27" gas grill with 2 grill burners, 1 rotisserie burner, 1 warming rack (*natural gas*)

ZGG24L20BSS 24" gas grill with 2 grill burners, 1 rotisserie burner (*liquid propane*)

Natural Gas Conversion kit available.

Stainless steel burners. Two 15,000-BTU burners provide durability and intense heat to the grilling area.

Gourmet Radiant trays. Beneath the grill racks these uniquely designed radiants sustain even heat distribution. They reduce grease flare-ups, eliminate the need for lava rocks or briquettes and remove easily for cleanup.

Infrared rotisserie system. A ceramic 14,000-BTU infrared burner, mounted behind the motorized rotisserie, reaches cooking temperature in just 30 seconds, providing the intense heat needed for searing meats and poultry.

Porcelain coated grill burners. Two 20,000-BTU burners provide intense heat to the grilling area.

**See written warranty for complete details.*

Dual Burner Outdoor Cooktop

ZX2NYSS Dual burner outdoor cooktop (*natural gas*) The double-burner gas cooktop provides two additional cooking surfaces with independent controls.

Carts

Stainless-steel carts in 48", 36" and 27" widths offer mobility when a built-in installation is not desired. Convenient fold-down side shelves extend workspace. A smooth-sliding shelf inside the cabinet of the 48" and 36" carts provides easy access to the liquid propane tank. A storage area with door offers ample space for condiments and supplies. (ZX48CTACSS 48" cart shown)

Outdoor Accessories

Customized vinyl covers are rugged and soft. The durable vinyl exterior withstands the elements, and a soft, felt lining helps protect the surface of your outdoor cooking center.

Access doors for built-in installations are made of 304 stainless steel to coordinate with any outdoor cooking center. A positive latch ensures flush and secure closure.

Insulated jackets for built-in installations serve as a safety shield for combustible cabinetry – providing protection from the heat generated by a grill or dual-burner cooktop.
