For answers to your Monogram,[®]GE Profile Performance Series,[™] GE Profile,[™] GE, Hotpoint and RCA appliance questions, call GE Answer Center[®] service, 800.626.2000.

All GE ranges are equipped with an Anti-Tip device. The installation of this device is an important, required step in the installation of the range.

Listed by
Underwriters
Laboratories

KW Rating	
240V	12.6
208V	9.5

Note: All 40" Ranges conform to U.L. requirements for 0" spacing from range to adjacent walls below countertop. To reduce possibility of scorching of the side wall adjacent to the heating elements, it is recommended a minimum 2" spacing from adjacent side walls be allowed for possible extended high-heat, no-load heating element operation.

Receptacle Locations: For all 40" Free-Standing Ranges locally approved flexible service cord or conduit must be used because terminals are not accessible after range installation. See shaded area in drawing for location of electrical outlet box. Recommended outlet locations allow range to be installed directly against rear wall.

Installation Information: Before installing, consult installation instructions packed with product for current dimensional data.
