

Thank you for making us number one. Again.

For five years in a row, GE appliances have been the first choice of builders and remodelers.

“Current Usage Within Past 12 Months”

¹ Professional Builder, 1999 Brand Study; weighted average of dishwashers, ranges/ovens, refrigerators/freezers, washers and dryers.

² Professional Remodeler, 1999 Brand Study; weighted average of dishwashers, ranges/ovens, refrigerators/freezers, (washers and dryers not asked).

According to the most recently published Louis Harris Poll, GE is the appliance brand most often mentioned among the brands rated as offering the best products and services in America.

Quality is an obsession at GE.

That's why quality experts put the GE product through rigorous testing before you put them in your customer's home. All new GE appliances have to prove they will perform their tasks over and over again.

GE Spectra™ Range

Want to cook big? This new range is the largest,* most accurate oven in America. The Spectra cooktop turns high technology into truly time-saving features, with lots of innovative ways to prepare great food—just the way you like to cook. *Among leading manufacturers' brands.

GE Nautilus™ Dishwasher

Dishwasher noise shouldn't interfere with your lifestyle. The GE Nautilus dishwasher delivers quiet performance with the QuietPower™ motor and QuietDesign™ sound insulation package. And for extra clean dishes, the HotStart™ option preheats wash water to the correct temperature. With these dishwashers, "All you'll notice is the clean."™

The Award-Winning Advantium™ Oven

GE's revolutionary new oven with Speedcook technology delivers great-tasting food in an average of one-fourth the time of conventional ovens, with no preheating. Cooking at the speed of life.™

GE technology has an exciting new look.

Our new appliances are a unique combination of style, convenience and performance.

GE Wizard Washer and Dryer

Introducing a new definition of clean. The Wizard has a marvelous way with laundry. It not only gets clothes clean—it makes life easier. Engineered with the innovative Adaptive Logic System,[™] Wizard does the thinking so you don't have to. It learns and adjusts washer and dryer cycle times based on load sizes and fabric types. All you have to do is press a button. That's the magic of Wizard.

Contoured Door Refrigerator

Doors are gently rounded and have a smooth, high-gloss finish for a high fashion look. The contoured doors give you a fresh new look for the outside, and you'll find more fresh ideas on the inside.

The GE Stainless Portfolio presents infinite design possibilities.

Including a full line of sleek appliances in a wide variety of configurations, the GE Stainless Portfolio gives you tremendous freedom of choice.

With CustomStyle™ refrigerators,
the only thing that will stand out is your kitchen.

These sleek CustomStyle™ refrigerators look like custom built-in units because they install nearly flush with kitchen cabinets. This saves floor space! Save nearly 7" with side-by-side models and nearly 5" with top-freezer models. There are two style options to choose from: Trimless or Installed Trim. Trimless models simply slide in, there's nothing to attach or build. Installed trim models can be decorated with custom wood panels to match the cabinets, or with black, white, stainless steel or bisque panels available from GE. Our exclusive CustomStyle refrigerators are loaded with fresh ideas inside and out. GE delivers the design consumers expect and the distinctive style they want.

Cooking

Microwave Ovens

Dishwashers

Clothes Care

Water Systems

Air Conditioning

Only GE offers CustomStyle™ Refrigerators, and they're available in Side-By-Side and Top-Freezer models

A GE CustomStyle side-by-side refrigerator is the perfect solution for today's open-living kitchen designs.

GE's CustomStyle top-freezer refrigerator looks built-in on the outside and has more accessibility than any other free-standing top-freezer.

This is the kind of innovation you can expect from America's #1 Manufacturer of Refrigerators

GE redesigned these refrigerators from the inside out. The goal was to offer consumers a stylish refrigerator that wouldn't take up as much floor space and at the same time, offer full-capacity storage. We did it! As a result, we are offering a special category of refrigerators: CustomStyle. This line is now available in a full color selection, as well as with your own custom panel options.

Side-By-Side Refrigerators

Top-Freezer Refrigerators

"Because they install nearly flush with the cabinets, these refrigerators save floor space. They don't stick out into the kitchen!"

GE Profile Performance Series™ CustomStyle™

Stainless steel models

GE has kept pace with America’s growing appetite for stainless steel appliances with CustomStyle refrigerators in the prestigious GE Profile Performance Series.™ With these models, no trim or slide-in panels are required. The result is a finely crafted, sleek, clean CustomStyle appearance. Lately, more and more design-conscious homeowners are discovering that incorporating stainless steel into their kitchen decor doesn’t have to be an “all or nothing” decision. GE’s Profile Performance stainless steel refrigerators can be “mixed” with either black or white appliances. The effect is stunning. It’s amazing how one major appliance can literally upgrade an entire kitchen. As for cabinetry, stainless steel compliments natural wood tones; and it also looks sensational with both traditional and designer colors. Our stainless steel models feature sleek black handles and dispenser.

GE Profile Performance Series™
Side-By-Side Trimless Stainless Steel Model
TPS24BPDBS
• Exclusive Water by Culligan™ NSF Certified • Squared doors

GE Profile Performance Series™

CustomStyle™ Side-By-Side Refrigerators: Choose a trimless or installed trim model

GE Profile Performance Series™
Trimless Model
TPX24PPDCC

Trimless models: Installation made easy, simply slide in.

The trimless CustomStyle units install by simply sliding into—way into—the space between cabinets. Because they align with counters, CustomStyle refrigerators instantly look built-in. And there's nothing to attach or custom build. Available in stainless steel, white, bisque, almond and black.

Trimless models shown on pages 16, 17 and 18.

GE Profile™
Installed Trim Model
TPX24BRDWW
shown with a custom wood panel and optional collar trim TRMBISWW.

Installed trim models: Another way to customize.

Whether you're building a brand new kitchen or planning for a renovation, GE opens a world of design possibilities. CustomStyle refrigerators accept a variety of door panels: stainless steel, as well as acrylic panels in white, bisque, almond or black.

The choices are simple.

CustomStyle™ Side-By-Side trim and panel options

Installed Trim Models

Optional door panels: another way to customize.

When you choose GE CustomStyle refrigerators with installed trim, the choices of design are practically endless. Order stainless steel panels or acrylic panels in white, black, almond or bisque from GE, or make and install your own custom wood panels to accent the cabinetry in your kitchen.

Optional collar trim: available for all models listed below.

The optional collar trim is just another way GE lets you integrate our CustomStyle refrigerators into your kitchen decor. Available in white, black, almond, bisque and stainless steel, this trim frames the refrigerator facade, adding to the finished look of a built-in, custom kitchen. Collar trim: TRMBISWW, TRMBISBB, TRMBISAA, TRMBISSS, TRMBISCC.

Panels available:

Model TPX24BRD is available with white, black, almond, stainless steel or your own custom wood panel options.
Models TPX24BPD, TPX24BID and TPX21BRD are available with white, black, stainless steel or your own custom wood panel options.
Model TPX24BPD is available with bisque panel options.

Dispenser Models

For additional features, specifications and color availability, refer to page 160.

The only CustomStyle™ Top-Freezer Refrigerator: Choose a trimless or installed trim model

This is the first top-freezer refrigerator designed to align with countertops and not stick out or take up valuable floor space, evoking the “premium impression” of a custom built-in kitchen. Best of all, it has full-capacity storage and saves nearly 5" of floor space.

GE Profile Performance Series™
Trimless Model
TNX22PRCWW

Trimless models: Installation made easy, simply slide in.

The trimless CustomStyle units install by simply sliding into—way into—the space between cabinets. Because they align with counters, CustomStyle refrigerators instantly look built-in. And there’s nothing to attach or custom build. Available in stainless steel, white, bisque, almond and black.

Trimless models shown on page 19.

The GE award-winning Advantium™ oven. Cooking at the speed of life.™

GE's revolutionary oven with Speedcook technology is changing the way America cooks! Using breakthrough technology that harnesses the power of light, the Advantium oven delivers delicious, oven-quality food in an average of one-fourth the time of a conventional oven. Some foods are even cooked up to an extraordinary eight times faster—with no preheating. Years in research and development, the Advantium oven cooks amazingly fast, with *great-tasting results*. Foods not only cook faster with light, but they also retain their natural juices, moisture and good taste. The innovative Advantium oven bakes, broils, browns, roasts, and grills. And it comes preprogrammed with more than 100 of America's favorite dishes. Simply select the preset food, press start and get ready to eat! Welcome to the world of Advantium!

There's an Advantium™ oven designed for every home and lifestyle.

When you choose the award-winning Advantium oven, you not only have a remarkable new way to cook, you also have a wide range of choices to make your kitchen look and perform perfectly. The innovative Advantium wall oven can be installed by itself, over a single conventional wall oven or over a warming drawer. The choice is yours. The above-the-cooktop Advantium oven can be installed over a kitchen counter, range or above-the-cooktop. Both ovens give you a variety of installation choices to suit your kitchen needs. For added convenience, both models convert to a fully-featured 950-watt sensor microwave oven. The Advantium oven is available in Stainless steel, White on white, Bisque, Almond on almond and Black on black. Whatever your preference, the revolutionary Advantium oven has a variety of options to suit your personal needs.

Now you can put home-cooked meals on the table in a fraction of the time it took before.

The pace of life has accelerated dramatically. The Advantium™ oven is especially designed for today's hectic lifestyles. Speedcook technology lets you prepare flavorful, oven-quality meals you never dreamed of cooking during the week.

Today's busy lifestyles demand Advantium. At 4 PM most weekdays, 71 percent of Americans still haven't planned dinner.*

Savory taste and texture. Advantium lets you "go back to the basics" of home-cooked, nutritious meals, but in an average of one-fourth the time of a conventional oven. Try moist, juicy chicken breasts roasted in 9 minutes!

ADVANTIUM TIME	CONVENTIONAL TIME
Whole Chicken	119
Baked Potatoes	83
Pepperoni Pizza	23.5
Biscuits	15.5
Chocolate Chip Cookies	16

Favorite foods cook in minutes. Compare Advantium to a conventional oven. No preheating means your total cooking time drops significantly.

The award-winning Advantium™ oven

Grand Award Winner of Popular Science's 1999 "Best of What's New"

Named one of the "Best New Products of 1999" by Business Week

Winner of the KBB Product Innovator Awards Program

Top Product Pick for 1999 by Building Products

Winner of Design Journal's 1999 "Best of Show"

Winner of Design Journal's 1999 Award for Design Excellence (ADEX)

*Restaurant and Institution magazine, Feb. 15, 1998.

Real food. Real fast. The Advantium™ oven gives you oven-quality food up to eight times faster!

Great tasting food. The Advantium oven bakes, broils, browns, roasts and grills—with no preheating. Speedcook technology cooks so fast that foods retain their natural juices, moisture and good taste. Serve mouth-watering, grill-seared filet mignon in 7 minutes.

Easy to use. Advantium comes preprogrammed with more than 100 of America's favorite foods. Just select your dish, press start and get ready to eat. You can also customize the program to include your own recipes. These are easy controls almost anyone can use—so more people in the family can become home cooks!

Advantium saves money, too. Cooking at home costs less—less than restaurant food, less than pre-cooked gourmet grocery food. You also save because with no preheating and shorter cook times, your kitchen will remain cooler, even in the hot summer months.

Speed. Foods cook in an average of one-fourth the time it takes in a conventional oven. Some foods cook up to an amazing eight times faster—with no preheating. You get a wider variety of food options, even for a busy schedule! Advantium delivers oven-quality food, allowing you more quality family time!

Easy to clean. What's the point of saving time if you have to spend it cleaning up? The oven's stainless steel interior cleans with a simple towel wipe and warm, soapy water.

Performance, versatility and a style you can call your own.

GE leads the way.

GE continues to bring innovation to every aspect of your cooking needs in performance, versatility and style. Looking for more performance? How about a gas cooktop with Maximum Output and Precise Simmer burners? Or a wall oven featuring TrueTemp™—the most accurate oven you can buy! You say versatility is at the top of your list? Take a look at our Bridge Burner cooktop, which creates an elongated cooking area.

And on top of all that extraordinary cooking ability, we offer some of the most sophisticated and appealing looks imaginable. Whether you choose black or white or stainless steel, you're sure to find a suitable combination that will match any cabinetry or decor. So take a look around. Performance. Versatility. Style. All yours—and only from GE.

Exceptional cooking performance with the TrueTemp™ System.

Through advanced technology, GE Wall Ovens feature the innovative design and cooking performance of the TrueTemp™ System. TrueTemp™ offers SmartLogic Electronic Controls that monitor and maintain oven temperature; a Platinum Oven Sensor senses sudden heat loss, and responds with more power; and a powerful bake element (our most powerful ever!), that delivers 3400 watts of even heat distribution. But delivering consistently even oven temperatures is only the beginning.

JT950SA Double Oven

The most accurate oven in America*
is also the most versatile.

These ovens can be installed in a wall or cabinet, or under a counter with a gas or electric cooktop. All GE 30" built-in ovens fit into common cut-out spaces making it easy to replace an installed oven with an upgrade. And the flush installation appearance is the final touch!

But there's still more to tell! Profile Performance Series™ offers professional touches like the Gourmet Shelf, that features "baking stones" as part of the rack. Dough rises more quickly and efficiently with our innovative "proofing" feature. Consistent cooking. Versatile placement. Professional features. GE Wall Ovens deliver in both cooking performance and flexibility.

**Includes all 30" and 27" ovens.*

Built-In
Cooking Products

Microwave Ovens

Dishwashers

Clothes Care

Water Systems

Air Conditioning

A GE wall oven can be four ovens in one.

1. Conventional Baking

2. Conventional Broil
(variable temp)

3. Convection Bake

4. Convection Roast

The addition of a convection oven gives you a whole new range of possibilities. Especially since it requires no additional space. With convection cooking, you'll find roasts turn out beautifully brown on the outside, yet tender and juicy on the inside. If you enjoy baking, you'll delight in the way your baked goods maintain their delicate texture while turning a delicious golden brown. On a practical level, convection cooking saves time and allows you to cook at lower temperatures.

GE convection ranges use the European or “true” convection system. The difference between “us and them” is a third dual loop heating element that surrounds the convection fan in the back wall of the oven. This extra fan at the rear of the oven gently circulates heated air evenly throughout the entire oven cavity—under and around the food. The moving air penetrates foods faster than stationary air.

And all of them are easy to clean.

The joy is in the cooking. Not in cleaning-up afterwards! That's why GE pays so much attention to “Cleanability.” GE's remarkable CleanDesign wall oven is a superb example of this. CleanDesign starts with a *clean design*, meaning there are no hard to clean protrusions, corners and crevices. Instead, the surface is smooth. Virtually seamless. There are no endcaps on the control panel or on the handles. Further, the continuous surface design has no hard edges or overlaps where dirt and grease can “catch” and accumulate. Consequently, clean-up is a snap. And of course, the oven itself is self-cleaning.

Amazingly easy to operate, too.

GE's SmartSet Electronic controls are simple to understand and simple to operate. Just read and touch.

Setting the time and temperature is easy. Digipads are numbered 1 through 0. For example, if you want to bake at 350°, you press 3...5...0... then press Start.

Centigrade or Fahrenheit, it's your choice.

GE touch pads make time and temperature adjustment easy. Increase or decrease temperature or time with a touch of the finger.

It's easy to convert from conventional oven to convection, and vice versa. Convection cooking generally requires less time and lower temperatures. But don't worry about it. GE's SmartSet Controls will automatically make the adjustments for you.

Seven Rack Baking. A GE Exclusive!

The oven comes equipped with three racks. But with the convection oven, you should consider buying up to four additional racks. You can get superb results with as many as seven racks. This means you can bake several sheets of cookies at the same time, with all of them turning out evenly cooked and browned. If you have a big crowd coming over, you can actually bake 14 nine-inch pizzas at once.

Built-In Double Ovens: 30" Electric

These models include

- Flush appearance installation • Fits most 30" cabinets • TrueTemp™ System • SmartSet Electronic Controls
- Control lock capability
- Frameless glass oven doors • Exclusive Big View windows • Upfront interior oven lights

GE will fire any cook's creative juices with a wide range of gas and electric cooktops.

Create kitchens that are dramatically different. Our beautifully designed electric cooktops are both elegant and efficient.

GE offers more ways than ever to customize your kitchen, with our newest selection of innovative electric cooktops. These cooktops include helpful features such as an electronic sensor to remind the cook when an element is left on. Another sensor adjusts the size of the element to fit the pan. And our new warming feature keeps sauces and gravies warm — or can be used as any other element would. It's easy to see how GE's fresh ideas can make anyone more creative in the kitchen!

Now you're cooking! Innovation and beauty are the hallmarks of every GE gas cooktop.

GE presents delicious new ideas in gas cooktops to inspire any cook. Sealed burners help contain accidental drips or spills, and every cooktop easily wipes clean, whether you choose our deep-set burners or the gas-on-glass version. Precise temperature control simplifies cooking with accurate output ranging from a gentle simmer to high power. And our professional-style continuous grates provide stability — plus they're dishwasher-safe. GE innovations like these are the key ingredients to creating a tasteful kitchen.

Turn it up a notch with these electric cooktop features.

Our bridge burner lets you combine two elements in one to match elongated gourmet pans and skillets. Electronic models come with a convenient timer that lets you program the appropriate cooking time for better results. And our control lockout capability helps protect your family's safety by restricting control of the electronic touch pad.

22420

GE cooktop features will have you cooking with gas!

Cook foods perfectly with our 15,000 BTU burners that allow skillets and woks to heat up quickly at high power. Or keep sauces and gravies at a gentle simmer — it's easy with our precise temperature control. And the dishwasher-safe continuous grates of our gas cooktops lend professional style to any kitchen.

Built-In Cooktops: 36" Electric CleanDesign

These models include • Smooth frameless ceramic-glass CleanDesign cooktop • Fingerprint and scratch resistant patterned glass cooktop • Five hot surface indicator lights **Note: bold = feature upgrade from previous model**

Electronic controls are simple to understand and easy to operate. Just read and touch.

Helps protect your family's safety with control lockout capability.

A convenient kitchen timer lets you program the appropriate cooking time, making precision cooking easy.

Pan presence sensor reminds you when an element is left on and automatically shuts it off when not in use.

Not all features available on all models. For additional features, specifications and color availability, refer to page 186.

GE has the recipe for the perfect kitchen:
A dash of style and a pinch of versatility.

The GE Profile Performance™ Stainless slide-in convection range opens the door for ideal design and performance possibilities. GE slide-in ranges have the flexibility to fit perfectly into your kitchen decor. They have the clean look of a built-in appliance, but offer the advantage of a simple slide-in installation.

Our Stainless steel slide-ins and drop-ins make a subtle statement of sophistication, contemporary style and eye-catching appeal. Regardless of your existing cabinetry and specific kitchen décor, stainless is universally versatile and goes great with just about any color or wood finish. Stainless steel will also match conventional appliance colors, including white, bisque, almond and black.

Our ranges feature a sleek and smooth touch-control panel that is designed to a perfect height and angle. The convection baking and roasting feature provides even cooking and superior baking every time. But this is just the beginning. The marriage of innovative design and advanced technology make GE's slide-in and drop-in electric and gas ranges a perfect choice.

Versatile features are the key ingredients to our slide-in and drop-in ranges.

Bridge Element

For total cooking flexibility, the electric range bridge burner gives you the freedom to match longer gourmet pans or skillets to the heating elements, by combining two burners into one. A simple switch will allow you to activate the larger cooking area.

Warming Zone

The warming zone is specifically designed for very low heat cooking, like simmering, preparing sauces and keeping dishes warm and ready to enjoy. This is a perfect option to help you coordinate numerous dishes and serve one fantastic meal.

Touch Control

GE's slide-in and drop-in touch controls are simple to understand and just as easy to operate. Just read and touch. Increase and decrease temperature or time with a soft touch of a finger. Plus, the specially designed control panel is uniquely angled for optimal, user-friendly operation.

Sealed Burners

The gas burners are sealed to the cooktop to help contain spills, making clean-up quick and easy. Power capacities range from low simmer to high output. Gently heat a white sauce on the simmer burner and boil linguine on the maximum-output burner at the same time. The burners are also electronically ignited—no troublesome pilot lights.

Slide-In Ranges: 30" Electric

These models include • SmartSet Electronic Touch Controls • Four hot surface indicator lights • Fingerprint and scratch resistant patterned glass-ceramic CleanDesign cooktop • Self-cleaning oven with Delay Clean option • Integrated designer handle • Control lock capability • Custom built-in look with simple slide-in installation. **Note: bold = feature upgrade from previous model**

SmartSet Electronic Touch Controls are simple to understand and easy to operate. Just read and touch.

The Warming Zone is a great way to keep food warm and ready to enjoy.

Bridge Element for total cooking flexibility.

6"/9" Dual Element saves energy and provides more efficient cooking.

JX27RWH – White, JX27RBK – Black, JX27RAD – Almond

The GE Spectra™ oven is the largest,*
most accurate oven in America!

You won't find a larger oven in America!
Just imagine, a full 5.0 cubic feet!

This 5.0 cubic foot oven is big enough to handle a large quantity of food for those special occasions. It has 26% more usable space than Whirlpool's largest oven, 28% more than Maytag's and 36% more than Frigidaire's. It also features GE's exclusive six rack capability to accommodate a variety of cookware.

TrueTemp™ is still the most accurate oven in America!

TrueTemp™ electric ranges have the most advanced temperature management system in the industry. Less temperature variance means better oven accuracy which delivers consistent cooking results.

The GE Spectra™ cooktop gives you more ways to cook great food!

Warming Option

Keeps soups, sauces, breads and pancakes warm, or melts butter and chocolate. Or use this new burner as you would any other cooktop element.

Bridge Burner

GE's exclusive bridge burner, when used with either one or both single elements, allows you to create larger cooking zones for any size cookware.

6"/9" Dual Element

The dual ring element is a small and a large element all in one. It lets you heat the element area that's needed for either a six- or nine-inch pan.

The GE Spectra™ range is easier to clean than ever before!

CleanDesign Interior

As for cleanability, the CleanDesign oven interior conceals the lower oven element under a porcelain-coated steel surface. All you see and clean is a flat, smooth oven surface.

Seamless Backguard

The seamless backguard design provides a sleek appearance and makes cleaning fast and easy. The easy-to-use glass touch controls bring elegance and style to your range.

GE Spectra™ ranges are easy to use.

The oven is self-cleaning, of course. But for most families, 80 percent of the cooking is done on the cooktop. You can see in a glance just how easy it is to wipe the smooth ceramic glass cooktop clean.

STYLISH. Please note the designer handle, frameless, full-width glass oven door, sleek control panel and overall appearance.

ATTRACTIVE. The cooktop's decorator pattern won't wear off under normal use and also helps camouflage any smudges that might occur.

RESPONSIVE. GE's Prompt Response System makes the heating elements come on fast, and then directs the heat straight up to the pan or cookware.

UNIFORM HEAT. Elements are designed to distribute heat uniformly, pulsing on and off to maintain the selected heat level.

PROTECTIVE. Heating elements have a "hot surface" indicator light to let you know when the element is too hot to touch (it continues to work even if the element has been turned off).

DURABLE. The cooktop is made with a specially engineered ceramic glass that has an amazing resistance to both stains and impact.

Don't settle for less than true convection.

GE convection ranges use the European or "true" convection system. The difference between "us and them" is a third dual loop heating element that surrounds the convection fan in the back wall of the oven. This extra fan at

the rear of the oven gently circulates heated air evenly throughout the entire oven cavity—under and around the food. The moving air penetrates foods faster than stationary air.

Convection cooking has long been acclaimed as superior by professional chefs and bakers. And no wonder. Roasting time is reduced with more "even" results. Roasts are beautifully browned on the outside, tender and juicy inside.

GE convection ovens deliver exceptional baking results with reduced temperatures (up to 25° less than a conventional oven). Expect your baked goods to maintain their delicate texture while turning a golden brown.

And easy to clean.

The porcelain-enameled subtop is designed with special containment wells for easy clean-up. Wires have all been thoughtfully positioned under the edge of the cooktop so they never interfere with cleaning.

CONTAINMENT. GE's Clean-Well™ cooktops are designed to contain most spills before they reach the subtop.

EXCLUSIVE DESIGN.

Only GE has the Clean-Well™ Cooktop. This closer look shows you why clean-up is so simple. First, the high spill rims around the Calrod® elements help contain the spills on top. Second, the plug-in Calrod® elements and the simple one-piece drip bowls are easily removed.

STURDY. Don't worry about the cooktop falling. The torsion bar and dual support rods make it easy to lift-up and lock. It's just as easy to reverse the procedure.

LIFT-UP. Just lift-up and lock the cooktop into place for easy access to the recessed spill containment subtop.

A simple guide to GE's QuickSet oven controls

QuickSet II

- Dual Element Bake • Digital temperature display with recall • Oven Preheat light • Electronic digital clock • Electronic reminder timer, up to 12 hours • Audible Preheat signal • 12-Hour automatic oven shut-off • Self-clean countdown digital display, includes cool down • Auto self-clean

QuickSet III

Same as QuickSet II, plus:

- Automatic oven control • Delay Bake • Delay Self-Clean
- Adjustable self-clean cycle time

QuickSet IV

Same as QuickSet III, plus:

- Auto self-clean • All touchpad control • Large digital temperature display • Variable broil

QuickSet V

Same as QuickSet IV, plus:

- Convection bake/roast • Temperature probe
- Extra-large graphics and extra-large touchpads
- Digital glass touchpad control (0-9) entry • Oven function icons

CleanDesign: Convection

These models include • Largest* oven in America • Super large 4.5 cu. ft. capacity oven • TrueTemp™ System • Self-cleaning convection oven with dedicated third, dual-loop heating element • Warming option • Dual element bake • Six-pass power bake element • SmartLogic™ electronic control • Patterned glass-ceramic cooktop • Storage drawer • QuickSet V oven controls (see page 81) • Electronic digital clock and oven controls • Four leveling legs

Note: bold = feature upgrade from previous model

SmartLogic™ Electronic Control delivers more consistent oven temperatures for exceptional cooking results.

Bridge Element for total cooking flexibility.

Convection Ovens provide even cooking and superior baking.

GE Spectra,[™] the next level of innovation in performance and versatility.

GE Profile Performance[™]—our new design makes cooking bigger and better than ever.

GE has designed a spectacular line of Gas Ranges that will make cooking more pleasurable, more convenient and more versatile than ever before! We have combined all the wonderful benefits of an electric range with the superior performance of gas, plus a few pleasant surprises. Now you can cook bigger, better and more accurately—every time! You will immediately notice the difference, as you spend less time working with the limitations of your range and more time creating extraordinary meals.

The revolutionary smooth cooktop—changing the way you cook with gas!

Now you can have the cleanability benefits of an electric cooktop with the performance benefits of gas. This cooktop eliminates the burner bowls and drip pans found on traditional gas ranges. Instead, the high and low BTU burners are sealed on the cooktop. The cast grates are placed on top of the smooth cooktop and clean-up is simply a matter of wiping with a damp sponge. We are sure you will agree this is our easiest cleaning gas range ever!

Convenient warming options.

Now, cooking big is easier than ever with the warming zone **and** warming drawer. Placed conveniently in the center of the cooktop, the warming zone is a great way to keep just about anything warm and ready to enjoy. The pull-out warming drawer is another great way to keep your food warm and fresh until you're ready to serve (see following page for details).

Convection in gas ranges—GE's first!

These ranges utilize an innovative two-speed convection system that gently circulates heated air evenly throughout the entire oven cavity. Convection ovens are known for their even baking performance and GE Spectra ranges have the most even baking performance of any gas convection oven. And what's more, you'll be cooking with TrueTemp,[™] the most accurate oven in America.

The #1 Rated* gas range is now more versatile.

Model JGBP86WEB

Keep food warm and ready to serve.

Cook more at the same time with the new warming drawer. It does more than hold food at serving temperature, it also helps in food preparation. Fix one or more side dishes ahead of the dinner hour and slip them into the warming drawer, conveniently located under the oven. (Models JGBP90/86/85/79)

Not too hot,
not too cool.

The warming drawer has its own temperature control. This allows you to maintain the desired temperature for your side dishes before serving. Unpredictable warming temperatures are now a thing of the past!

Model JGBP90MEB

The sleek new appearance of gas.

The new look of our GE Profile™ gas range is not only more attractive and stylish, but cleans-up quickly and easily. Designed so nothing can hide and collect in exposed cracks, cleaning your gas range will be smooth, swift and easier than ever.

Self-Cleaning: Sealed Burners

These models include • TrueTemp™ System • Warming drawer • SmartLogic™ electronic control • Extra-large self-cleaning oven

- Electronic clock and automatic oven timer • Sealed burners • Precise Simmer burner • Two Maximum Output burners • Three oven racks
- Six embossed rack positions • In-oven broiling • Extra-large broiler pan with grid • Interior oven light • Electronic pilotless ignition

A new generation.

GE microwave ovens with a new sculpted, sleek design add elegance and style to any kitchen.

GE Microwaves rated best in their category.

GE is the best source for microwave ovens. GE microwaves were ranked #1 by a leading consumer magazine in the categories of mid-sized countertop (JE1060), compact countertop (JE740), and over-the-range (JVM1660). No other brand had so many #1 rankings.

Whatever style microwave you are looking for, GE is the brand!

Space-saving design with installation flexibility.

Before

JE1660WB

- Microwave
- Vent hood
- Cooktop lighting

All in one.

GE—The Original Spacemaker™

In 1979, GE invented the Spacemaker™ over-the-range microwave. A full-featured microwave with a powerful, two-speed exhaust fan, rated 300 CFM, and cooktop light, integrated into the base of the microwave oven eliminates the need for a range hood. Installing an over-the-range microwave oven increases valuable countertop space in the kitchen.

After

JVM1660WB

GE innovation
combined with
space-saving design.

Spacemaker™: Microwave with Convenience Cooking

These models include • SmartControl System with Interactive Display • Time Cook I & II • Delay Start • Reminder • Auto/Time Defrost • Express Cook • Add 30 Seconds • 10 power levels • Instant On Controls • Timer On/Off • Child Lock-Out • Cooking Complete Reminder • Full-View Cooktop Lighting • Easy Mount Installation • Powerful 300 CFM Two-Speed, High Capacity Exhaust Fan

Note: bold = feature upgrade from previous model

Auto Defrost/Time Defrost automatically sets defrosting time and power level.

Convenience Cooking Controls allow you to defrost, cook or reheat at the touch of a pad.

Add 30 Seconds extends cooking time without the hassle of reprogramming.

This powerful 300 CFM rated venting system will remove smoke and steam from your cooktop.

Featuring the GE Triton™ Dishwasher.

No pre-rinsing, soaking or scrubbing!

GE Triton™ dishwashers have three wash arms for improved coverage. Every spot on every dish receives a powerful spray. Eliminate recirculating food particles with 100% Triple Water Filtration and Dual Pumps. Food particles are pulverized by the Piranha™ Hard Food Disposer.

You want clean and quiet?

GE Triton™ Dishwashers deliver both!

Now, you don't have to choose between clean and quiet, because the GE Triton™ Dishwasher delivers both! Thanks to GE's advanced technology and TriClean™ Wash System, you get more than clean, you get a quiet kind of clean. By redirecting the spray jets, more water hits the dishes and less hits the tub and door, keeping more of the noise inside the dishwasher. Combining the ActiveVent, GE Profile™ QuietMotor, PermaTuf® Tub and a blanket of insulation, the QuietPower™ III sound package delivers the "Quietest Dishwasher in the U.S.A." So quiet, you will be talking about it, not over it.

"The cleanest wash you never heard."™

GE Triton™ Built-In Dishwashers

These models include • TriClean™ Wash System (3 Wash Arms, 100% Triple Water Filtration with Dual Pumps, Piranha™ Anti-Jamming Hard Food Disposer) • CleanSensor • Electronic controls • SaniWash • SpeedWash™ and SpeedDry™ • China/Crystal cycle* • 8-Hour Delay Start • QuietPower™ III sound package • GE Profile™ QuietMotor • ActiveVent • Quiet Water Valve • Trimless appearance

Introducing the new Wizard—
GE's best washer and dryer system, ever. "Simply Brilliant!"

The Wizard has a marvelous way with laundry. It not only gets clothes clean—it makes life easier. The new Wizard washer and dryer work wonders. Engineered with the innovative Adaptive Logic System™, Wizard does the thinking so you don't have to. For each load, this system optimizes cycle time by taking into account such household variables as the water heater temperature setting and the length of dryer ducts. It learns and adjusts washer and dryer cycle times based on load sizes and fabric types. The more the Adaptive Logic System™ learns about your household and your laundry, the more accurate it becomes. Imagine a washer that doesn't leave soapy residue and a dryer that dries clothes evenly. Adaptive Logic senses what needs to be done and does it with amazing accuracy—all you have to do is press a button. That's the magic of the Wizard.

Introducing a new definition of clean.

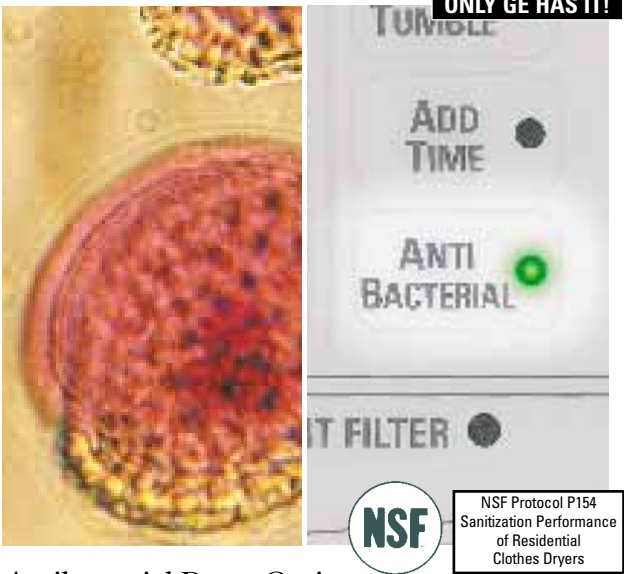

Stain Wash

Stain Wash eliminates or reduces the need for pretreating, alternating soak and agitation. It can be used on any fabric, any cycle.

Speed Wash and Speed Dry

When you need it quick...washes and dries a soccer uniform, school uniform or golf outfit...about 50% faster than the other Speed Wash/Speed Dry Systems on the market.

Antibacterial Dryer Option

Reduces 99.9% of certain types of bacteria, including Staphylococcus aureus, Pseudomonas aerignosa, and Klebsiella pneumoniae, NSF certified. A GE exclusive.

Adaptive Logic System™

Adaptive Logic is amazingly accurate. From fill to finish, this system automatically adjusts cycle times according to household conditions, like the length of dryer ducts and the distance of the washer from the water heater, giving you an accurate cycle time.

GE Profile Performance Series™ Wizard Washer and Dryer

**GE Profile Performance Series™
WPSE7003A shown with
DPSE592EA/DPSE592GA**

Washer Features

Stain Wash eliminates or reduces the need for pre-treating, alternating soak and agitation. It can be used on any fabric, any cycle.

Speed Wash thoroughly cleans clothes and makes them bright in a matter of minutes—perfect for families on the go.

The Adaptive Logic System™ automatically adjusts cycle times according to household conditions, like the length of dryer ducts and the distance of the washer from the water heater, giving you an accurate cycle time.

PerfectTemp Plus is GE's most accurate temperature control system. That means it has the extraordinary ability to maximize detergent's effectiveness, while minimizing shrinking, fading and wrinkling.

Dryer Features

Antibacterial Dryer Option Reduces 99.9% of certain types of bacteria, including *Staphylococcus aureus*, *Pseudomonas aeruginosa*, and *Klebsiella pneumoniae*, NSF certified. A GE exclusive.

Speed Dry when the pressure's on to get out the door in a matter of minutes.

Sensor Dry Plus prevents overdrying and underdrying, extending the life of clothes. It's 20% better than the current system.

Deluxe Dryer Rack allows you to conveniently dry tennis shoes and stuffed animals.

GE's Prodigy™ washer with the Precision Care Wash System helps ensure your clothes look better than ever, longer than ever.

GE has a finger on the pulse of today's consumers. Americans are busier than ever, which means we have less time to devote to laundry. It's still possible to keep clothes looking their best, with the GE Precision Care Wash System that cleans clothes gently and effectively. The unique step-down agitation alternates soak and agitation times to get clothes clean and reduce wear, keeping clothes looking new longer.

A distinctive GE washer that washes clothes in a totally new way.

Different cycles on old washers only changed the amount of time spent scrubbing clothes. The GE Prodigy washer changes time, agitation speed and soak time. The washer is programmed to offer the best combination for different types of fabrics to keep them looking better than ever.

The extraordinary GE Prodigy washer with PerfecTemp.

PerfecTemp regulates water temperature to maximize detergent's effectiveness and to minimize shrinking, fading and wrinkling.

**ONLY GE HAS IT!**

GE's Exclusive Auto Balance Suspension System

The GE Prodigy™ Washer can spin out a large bath mat every time without banging, walking or becoming unbalanced. That's because it has a suspension system unlike any other. The washer's tub is suspended from four separate springs that act like shock absorbers. Their movement during the wash cycle helps redistribute uneven loads, even when washing a king-sized cotton comforter—so you won't be left with a sopping mess afterwards.

Additional Washer Features

Super Capacity Plus with 3.2 cu. ft. Now you can wash more at one time, saving you time, energy and money.

SpotSpray, a 7-second burst of water, allows you to pretreat a stain before adding the clothes to the wash. It's like having a sink in your washer.

**ONLY GE HAS IT!**

The **Exclusive** Auto Balance Suspension System keeps the washer balanced even if the load is unbalanced.

**ONLY GE HAS IT!**

ColorLogic™ 2000 color-coded cycle buttons take the guesswork out of doing laundry. Just match the colors!

The GentlePower™ Agitator adapts to the clothes load providing gentle and effective washing action.

Additional Dryer Features

Deluxe Dryer Rack allows you to conveniently dry tennis shoes and stuffed animals.

Sensor Dry dries clothes more evenly and efficiently. No more underdrying or overdrying your clothes!

**ONLY GE HAS IT!**

The **Exclusive** adjustable Drying Center provides a convenient place to dry garments or hang clothes straight from the dryer, minimizing wrinkling.

**ONLY GE HAS IT!**

ColorLogic™ 2000 color-coded cycle buttons take the guesswork out of doing laundry. Just match the colors!

QuietDrum™ is wrapped with additional sound-deadening material that muffles buckle and button noises.

Front Loading Washers and Dryers

The solution to a tight situation. Space saving models install in tight areas, while handling family-size loads.

These flexible units can be installed stacked to fit in tight areas, raised and built-in for style and easy access, under a counter to create an efficient work space, or side-by-side for a classic, free-standing look. Front loading laundry pairs give you the true flexibility you want, and the capacity you need to finish the laundry a lot faster!

Washer Features

Automatic Water Fill eliminates guesswork and water waste. Automatically adjusts water level to size and type of load. Water fill level remains below the door.

Automatic Dispenser automatically dispenses detergent, bleach and fabric softener at just the right time in the wash cycle.

Drinking Water Filtration

If you're one of the 75% of Americans concerned about the quality of your water,* GE SmartWater offers several ways to improve the quality of your water for drinking and cooking. Whether you choose our Premium Filtration—Reverse Osmosis, Carbon Filtration System, or a Refrigerator Icemaker filter, GE SmartWater has the system to meet your specific needs. These products can reduce such contaminants as lead, cysts, certain chemicals and reduce undesirable taste and odors in your water, while providing several options for easy installation. So enjoy quality, healthy water in your home today with a GE SmartWater drinking water filtration system.

Enjoy all the benefits of filtered drinking water

Healthy water—Provides added assurance of healthy drinking water.

Better tasting water—Healthy water for drinking and making beverages such as coffee, tea and juice.

Great for cooking—Cooking with filtered water provides great tasting foods.

NSF certified—All GE SmartWater™ drinking water filtration products are certified by NSF, the most highly recognized independent testing institution for water treatment products.

*WQA Consumer survey, 1997.

GE SmartWater only sold through authorized distributors.

Not all features available on all models.

What type of drinking water filtration is right for your family?

Premium Filtration: Reverse Osmosis

GE's best filtration process offers dual carbon filtration with Reverse Osmosis technology. Premium filtration units offer various installation options and designer-style faucets. All Premium filtration systems reduce up to 99% of the following contaminants: **Sediment, Rust, Bad Taste & Odor, Chlorine, Lead, Cysts, Mercury, Nitrates/Nitrites, Sodium, Ammonia, Tannin, Sulfate, Magnesium, and more!**

Carbon Filtration

This most common type of filtration utilizes pre- and post-carbon filters (Dual Stage) to reduce contaminants in your water. They're easy to install and maintain. A wide variety of filter options can provide reduction of the following contaminants: **Sediment, Rust, Bad Taste & Odor, Chlorine, Lead and Cysts.**

Refrigerator and Icemaker Filter

This filter is the perfect choice to provide cleaner, clearer, healthy ice. The GE SmartWater filter works on **all** types and brands of refrigerators, offering great tasting ice and water from your dispenser.

Monitored Premium Drinking Water Filtration— Reverse Osmosis: GE Profile Performance™ System

GE's Best Filtration Process

Provides the added assurance of healthy water for your family

This model includes

Note: bold = feature upgrade from previous model

GE's Best Filtration Process works to reduce up to 99%* of these elements shown at right:

Super Capacity provides up to 18 gallons** of high-quality filtered water per day.

All In One System—

Space-saving design installs in less space than conventional models.

SmartWater™ Faucet with Electronic Monitor conveniently indicates the performance of the unit and when to replace filters and membrane. Separate faucet is used only when filtered water is needed, extending filter life. Note: Batteries are included.

Amber "Filter" Light: The pre-filter and post-filter cartridges need replacement. This occurs after 6 months, or 900 gallons of product water use, whichever occurs first.

Green "OK" Light: The RO system is providing high-quality drinking water.

Amber "RO" Light: The RO membrane needs replacement.

Designer-Style Faucet allows you to customize the faucet color to complement the kitchen (see right for model/color selections).

Installation Flexibility—Can be installed vertically or horizontally undercounter, in basement or other convenient location.

NSF Certified—NSF is the most highly recognized independent testing institution in the water treatment industry. NSF inspects, tests and certifies our product performance.

Water that's good for your home.

Easier to Clean—Reduces hard water build-up, making tubs, showers and sinks easier to clean.

Softening Systems

There is no doubt that water hardness is one of the most common of all water problems. A U.S. Geological Study shows that hard water is found in 85% of the United States. GE SmartWater Softening Systems reduce the hardness in your water, providing your family with quality water throughout your home.

Whiter Towels—Towels are 45% whiter while using 1/3 less detergent. Clothes are softer, cleaner, brighter and last longer.

Cleaner Dishes—Gives you cleaner dishes by reducing soap and hard water spotting.

Feels Smoother—Soft water feels noticeably smoother to your skin.

Reduces Energy Costs—Helps reduce build-up in pipes and water-using appliances, providing cost savings.

GE SmartWater only sold through authorized distributors.

High-Efficiency—Super capacity combined with the salt-efficiency of the unit provides cost savings and convenience. Reduces the need for frequent salt replacement.

Easy-to-Set Electronic Controls—No calculations or complicated programming. Simply turn it on, set time of day and set the hardness level of your water supply.

Demand-Initiated Regeneration—Truly SmartWater—system monitors water usage to maximize salt usage and assure ample supply of soft water by regenerating only when needed.

Free Installation Kit—Complete installation kit with bypass valve, drain tubing and other necessary parts included.

For Families of 4 or More

GE Profile Performance Series™ PNSF39Z

- **Super Capacity** means less maintenance—38,500 grain capacity helps assure an ample supply of soft water and provides for lifestyle changes.
- 300 lb. Salt Storage reduces the need for frequent salt replacement.
- **Easy Reading Backlit LCD Display** eliminates the need for a flashlight to see display in difficult or dark locations.
- **72 Hour Program and Time Memory**—Permanent memory maintains hardness and regeneration time settings even if power is off or unit is unplugged for extended periods. No batteries needed, unit recharges itself when power is restored.
- **Systems Monitor**—Advanced electronic water management system features:
 - Capacity remaining (the data button will indicate how much capacity is remaining and whether or not to command an extra regeneration)
 - Gallons used (indicates how many gallons of water have been used per day)
 - Average gallons used (indicates the average gallons used over the past 7 days)
 - Flow Rate (shows how much water is flowing through the softener)
- 24-Volt Electronic System simplifies installation and maintenance.

For Families of 2 to 4

GE Profile™ PNSF35B

- **Extra-Large Capacity** means less maintenance—35,000 grain capacity helps assure an ample supply of soft water and provides for lifestyle changes.
- 300 lb. Salt Storage reduces the need for frequent salt replacement.
- **6 Hour Program and Time Memory**—Permanent memory maintains hardness and regeneration time settings even if power is off or unit is unplugged for extended periods. No batteries needed, unit recharges itself when power is restored.
- 24-Volt Electronic System simplifies installation and maintenance.

GE SmartWater only sold through authorized distributors.

Not all features available on all models.
For additional features, specifications and color availability, refer to page 232.

**GE
GXSF27B**

- **Large Capacity** means less maintenance—27,000 grain capacity helps assure an ample supply of soft water and provides for lifestyle changes.
- **200 lb. Salt Storage** reduces the need for frequent salt replacement.
- **6 Hour Program and Time Memory**
Permanent memory maintains hardness and regeneration time settings even if power is off or unit is unplugged for extended periods. No batteries needed, unit recharges itself when power is restored.
- **24-Volt Electronic System** simplifies installation and maintenance.

**GE
GNSF18Z**

- **Compact Size** means installation flexibility—The compact housing provides installation flexibility; installs in many areas other softeners may not.
- **18,000 Grain Capacity** assures an ample supply of soft water.
- **140 lb. Salt Storage** combined with the compact size means easier salt loading.
- **6 Hour Program and Time Memory**—Permanent memory maintains hardness and regeneration time settings even if power is off or unit is unplugged for extended periods. No batteries needed, unit recharges itself when power is restored.
- **24-Volt Electronic System** simplifies installation and maintenance.

Air Conditioning

The coolest comfort, no matter where you need it.

GE has room air conditioners for every room in the home.

From new construction and remodeling, to renovation and replacement, GE units offer you and your customers plenty of choices.

The unique GE full-line provides the features your customers look for and you demand. Choose from window or through-the-wall installation models. Pick from heat pump, electric resistance heat or choose the cooling only models. Plus, most units come with the reliability of microprocessor or solid-state controls. All units offer contemporary styling and are easy to install and maintain.

So, regardless of type or scope of your project, GE delivers dependable, quality units that meet your specifications—and exceed your customer's expectations.

Built-In “J” Series: Slope-Top Chassis Only Models

These models include • Variable setting thermostat

- Fan Cycle switch • Four-way air direction • Up-front, washable air filter • “Fan Only” setting for air circulation

E.E.R. (Energy Efficiency Ratio) shown on the tag of each new unit, compares the air conditioner's cooling output with the electricity it requires for power. The higher the E.E.R. number, the more efficient the unit, and the less costly to operate.

Fan Cycle Switch helps reduce power consumption and operating costs.

Cool Only Units

Offer a variety of capacities to cool many applications.

Heat/Cool Units

Provide a variety of capacities for summer cooling, plus supplemental heat for cold weather—units combine air conditioning with electric resistance heat.

Heat Pump Units

Heat pump units offer efficient summer cooling with reverse cycle heating and back-up resistance heat for cold weather.

Units include attractive room-side grille of high-impact polystyrene.

These units are chassis-only models and require a separately purchased solid-sided wall case (RAB46, RAB47 or RAB48) and exterior grille (RAG13 or RAG14) for installation.

Cool Only Units

Models	BTUH Cooling	Volts	EER	BTUH Electric Resistance Heating	Wall Case

*Model includes two-stage heating thermostat.

†At 47°F.

Note: If any “J” Series unit is a replacement unit the existing rear grille should be replaced for better performance with either stamped aluminum (RAG13) grille or architectural louvered extruded aluminum (RAG14).

Built-In “J” Series: Hi-Mount Chassis Only Models

These models include • Variable setting thermostat
• Fan Cycle switch • Four-way air direction • Up-front, washable air filter • Multiple fan speeds

For high-mount installations where control accessibility is difficult, GE offers five “J” Series models with controls located in the lower corner of the room-side cabinet. There are two 115V and two 230V cooling only models, and one 230V model with electric heat.

Units include attractive room-side grille of high-impact polystyrene.

Each unit requires a solid-sided wall case (RAB46, RAB47 or RAB48) and exterior grille (RAG13 or RAG14) for installation.

Cool Only Units

Built-In “J” Series: Window/Wall Mount Models

These models include • Multiple Cooling/Heating speeds • Vent/Exhaust • Multi-position thermostat
• Fan Cycle switch • Easy access filter • Slide-out chassis • EZ Mount window kit (for Cooling Only models)

For convenience and efficiency, GE offers a unique line of units that provide cooling only, cooling with electric heat, and cooling with heat pumps, for use in window or through-the-wall application.

All units include solid-sided sleeve with a slide-out chassis.

For additional features, specifications and color availability, refer to pages 234-235.

Zoneline®: Heat Pump and Heat/Cool Models

Versatile Zoneline units provide year-round comfort with individual heating and cooling temperature control for economy and convenience.

Designed to blend with most architectural styles and interior decors, Zoneline units are adaptable to a wide variety of applications, including hotels and motels, office buildings, schools and apartments. Zoneline's design and easy installation also make it ideal for remodeling and room additions.

The two-tier Zoneline lines, Deluxe and Premium, offer a wide selection of features, heating and cooling capacities, and voltages to meet each zonal application. All Zonelines come with microcomputer controls, each with its own special features. Whether it's the Deluxe line with solid-state controls, high efficiency, and deluxe features, or the Premium line with higher efficiencies and sophisticated features, Zoneline quality and ease of maintenance will serve its owner or users well for years to come.

Resistance Heat Models

GE Zoneline packaged terminal units with resistance heat are especially suited for installations where heating demands are moderate.

Heat Pump Models

Zoneline units with heat pump operation offer economical year-round comfort for zonal comfort conditioning, for most temperatures. Heating is provided by a high efficiency heat pump. The heat pump operation is backed up with resistance heat for those times when outdoor temperatures fall below the heat pump capacity.

Deluxe Line

The Deluxe Line is a high efficiency, two fan motors, microcomputer controlled line of cooling with resistance heat, and cooling with heat pump operation and resistance heat back up. Energy savings, plus standard features make these units an excellent value.

Dry Air 25

The Dry Air 25 Series centers around GE's exclusive use of the patented Dinh® Dehumidifier Heat Pipe from Heat Pipe Technology, Inc. This innovative NASA spin-off technology enables the Dry Air 25 to remove 25% more moisture from the air than other packaged terminal air conditioners. The Dry Air 25 is perfect for high-humidity climates. Available on 7000, 9000 and 12,000 BTU Resistance Heat models.

Note: Use of drain kit RAD10 is recommended.

Premium Line

The Premium Line is a high efficiency, two fan motors, full featured, microcomputer controlled line, in both cooling with resistance heat, and cooling with heat pump and resistance heat back up. The microprocessor, with solid state sensors, offers a variety of features for energy savings and reliable operation.

Easy Installation

Zoneline models are designed for easy installation, whether in new construction, renovation or for replacement of old units. Unless specified by code, they require no sub-base and may be installed flush with the finished floor.

All models are adaptable to remote and central desk control. Zoneline units may even be placed in unusual locations, such as transom or common area installations.

Compatibility with existing Zoneline wall cases simplifies retrofit installations. A new chassis simply slides into the already installed wall case. A new matching rear grille should be used.

And the exclusive, Quick Connect power supply kit for Premium Line models, allows the unit to be installed on various amperage circuits.

The Newest Innovation From GE: The Dry Air 25

The Dry Air 25 features innovative technology from HPT, an addition which enables this unit to remove 25% more moisture from the air than all other models. The Dry Air 25 system, Heat Pipe, is a hermetically sealed heat transfer surface that is saddle-bagged around the indoor coil (evaporator) of the Zoneline. This coil arrangement will transfer heat from one coil to another without power consumption. This assembly uses R-22 as the refrigerant and is isolated from the regular Zoneline refrigerant circuit.

As warm humid air is pulled through the pre-cool section of the Heat Pipe, the heat removed from the air is absorbed by the refrigerant, causing the refrigerant to boil. As the pre-cooled air passes through the Zoneline evaporator, the air is further cooled (colder than it would be normally), removing 25% more moisture than other packaged terminal units.

As the cold air passes through the re-heat section of the Heat Pipe, the refrigerant condenses and the liquid flows back to the pre-cool section to be re-heated again. The air discharged into the room by this process is much drier, creating a more comfortable room condition.

All Zoneline Units Feature Superseal

Air leakage into living space wastes energy and creates an uncomfortable environment. All Zoneline units meet the rigid air infiltration specifications of ASTM E283-91 which requires 7 CFM infiltration or less with a 25 mile per hour wind velocity. With optional ICR the specification is 10 CFM.

Water infiltration into a room could cause serious structural or furnishing damage.

All Zoneline units are tested to ASTM E331-86 specifications which requires no water infiltration when exposed to 8" per hour rainfall at 63 mile per hour wind velocity for 15 minutes. Superseal means room comfort and energy saving.

Special Corrosion Protected Units

To help extend the life of the Zoneline in seacoast areas, some Deluxe Zonelines may be ordered with a special corrosion protection treatment on outdoor components and use stainless steel hardware. Zonelines with optional Corrosion Protection have a 'C' in the 10th character of the model number.

Internal Condensate Removal

Available on the 3200 and 5200 heat pumps, this feature drips the heat pump condensate over the warm indoor coil to help dissipate water from heat pump operation and associated defrost cycles. The installation of an internal or external drain system is recommended if no dripping of condensate to the outdoors is desired. ICR must not be installed in seacoast or corrosive applications.

Air Conditioning: GE Profile™ and Deluxe Series

These models include • Energy Saver feature • Multiple cooling speeds • Vent/Exhaust • Adjustable thermostat
• EZ Mount window kit • Four-way adjustable air discharge • One Touch Lift-Out filter • Slide-out chassis

The Electronic Thermostat with Remote Control allows you to set and adjust exact temperatures for total comfort.

With the Energy Saver Feature, once the room is cool enough, the thermostat will shut down the compressor and fan, saving energy and reducing your energy bill.

Air Conditioning

Air Conditioning: Quiet-Aire™ –Split System

The GE Quiet-Aire™–Split System Air Conditioner provides virtually silent cooling comfort. With a design that includes outside air compressor placement, disturbing sounds are kept out of doors and out of earshot. This design also eliminates annoyances like rattling windows. So rest easily and peacefully. Available in heat pump and cooling only models in 9,000, 12,000 and 18,000 BTU sizes.

Indoor unit

Outdoor unit

Note: See written warranty for details.

This warranty is extended to the original purchaser and any succeeding owner for products purchased for home use within the USA. In Alaska, the One Year Warranty excludes the cost of shipping, or service calls to your home. Some states do not allow the exclusion or limitation of incidental or consequential damages. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. To know what your legal rights are, consult your local or state consumer affairs office or your state's Attorney General.

**If installed against a wall, allow clearance of 11-1/4" on freezer side to remove bin. Clearance required to remove fresh food full size pan without disassembling is 13-1/2".

ALL MODELS AVAILABLE IN U.S. AND CANADA. NOTE: When connecting a water supply line to a GE refrigerator, a GE Water Supply Kit is recommended.

GE Profile Performance™ and GE Profile™ Side-by-Side CustomStyle™ Installation Information and Specifications

Rough-In Dimensions

Standard, New Construction and Replacement Installation

Installation Tips to Maximize the Built-In Look

- All wall/floor molding should be removed prior to installation.
- Water recess on rear wall recommended to prevent water line damage. 48" minimum length 1/4" diameter water line tubing recommended.
- When possible, recess both copper water line and electrical outlet. (See local codes)
- Front and rear leveling legs are adjustable for the built-in look. (See owner's manual)
- If optional collar trim kit is to be used or anticipated, see collar trim installation on next page for different rough-in dimensions.

*The rough-in dimension of 70-1/4" is minimum and is measured from the finished floor to top of opening (or the underside of the overhead cabinets). For Models with Trim Kit: If frameless style cabinets are planned for above the refrigerator, you may need to consider adding a maximum of 1/4" (70-1/2") to height of opening to allow additional clearance between cabinet doors and top of refrigerator trim when cabinet doors are in open position.

For 24 cu. ft. models only.

For 21 cu. ft. models only.

Door Panel Dimensions

Order your own custom wood panels to match cabinetry or other decor.

	Fresh Food Panels	Freezer Panel With Dispenser	Freezer Panel Without Dispenser	Weight Limits*
21 cu. ft.	G-65-3/16" H-20-1/16"	C-18-3/4" D-14-5/16" E-32-3/8" F-14-5/16"		Fresh Food = 38 lbs. Freezer = 28 lbs.
24 cu. ft.	G-67-1/8" H-19-5/16"	C-18-13/16" D-14-1/2" E-34-5/16" F-14-1/2"	A-67-1/8" B-14-1/2"	Fresh Food = 35 lbs. Freezer = 25 lbs.

Panels up to 1/4" thick will fit door frame with no special preparation. Add filler behind material thinner than 1/4" for proper fit.

Note: Panels up to 3/4" will require special routing area around handles. Dimensions may vary depending on depth of panel.

*Total weight of panels (i.e., both freezer panels)

*For 24 cu. ft. models only

Detail C

(Fresh Food panel shown)
Notch required at top corner as noted.
For 21 and 24 cu. ft. models

All other dotted lines indicate areas that must be routed out about 5/32" (4 mm) on the back side of panels 1/4" (6 mm) thick or more. For panels less than 1/4" (6 mm) thick, these areas can be cut out of the filler panel.

IMPORTANT: Before finalizing specifications for your GE Profile Performance™ and GE Profile™ CustomStyle™ Refrigerator, please NOTE:

- A minimum of 36" is required for refrigerator installation
- Be sure to allow for 1/2" or 3/4" side panels in addition to the 36" minimum

Rear Wall View

Collar Trim Installation

An enclosure is **required** to match up to the trim, see Typical Installation. To obtain the most integrated look, the cabinet or soffit above the refrigerator should extend out to the same depth as the side panels. The refrigerator opening must have minimum dimensions of 70-1/4" high x 36-1/8" wide x 24-1/2" deep as shown at right. If there is an overhead cabinet, allow 1" for cabinet door clearance with the top trim piece so the cabinet doors can be opened without hitting the top trim. If 1/2" side panels are used, then side trim and panel will be even. If 3/4" side panels are used, then some of the side panel will extend beyond the trim and must be finished.

*The rough-in dimension of 70-1/4" is minimum and is measured from the finished floor to top of opening (or the underside of the overhead cabinets). For Models with Trim Kit: If frameless style cabinets are planned for above the refrigerator, you may need to consider adding a maximum of 1/4" (70-1/2") to height of opening to allow additional clearance between cabinet doors and top of refrigerator trim when cabinet doors are in open position.

For 24 cu. ft. models only.

For 21 cu. ft. models only.

For 21 cu. ft. models only.

For 24 cu. ft. models only.

IMPORTANT: Before finalizing specifications for your GE Profile Performance™ and GE Profile™ CustomStyle™ Refrigerator, please NOTE:

- A minimum of 36-1/8" is required for refrigerator installation with collar
- Be sure to allow for 1/2" or 3/4" side panels in addition to the 36-1/8" minimum

Typical Installation

Shaded areas represent front surfaces of side panels and overhead cabinet or soffit that contacts trim.

Create a Custom Look for Your Side-by-Side CustomStyle™ Refrigerator

Still another advantage offered by GE Profile Performance™ and GE Profile™ CustomStyle™ Refrigerators is the ease with which it can be installed. For a refrigerator that does so much to enhance the beauty of your kitchen, the “behind-the-scenes” preparation and installation are surprisingly simple.

*For 24 cu. ft. models only

*For 24 cu. ft. models only

Detail C

Fabricating the Enclosure

- The drawing shows an 84" cabinet elevation. Adjust dimensions accordingly for other cabinet elevations.
- Cabinet pieces to order: (2) side panels and (1) wall cabinet.
- Side panels will typically be attached to adjacent cabinets and/or cleated to rear wall and floor.
- Refer to GE refrigerator installation instructions for proper plumbing, and electrical and air clearances.
- (1) Some framed cabinet lines will make a refrigerator enclosure with a cabinet 12" high x 39" wide with sides and 1-1/2" face frame extended down to floor to create the refrigerator space. This will replace the above construction.
- (2) A tall cabinet on either side of the refrigerator can replace a side panel!
- Counter overhangs on either side of the refrigerator should have clipped corners to allow for full door swing.
- If the refrigerator has a wall returning beyond the front of the refrigerator on either side, a 2" tall filler will help to allow for movement of the door.

Door Panels

- See drawings for exact dimensions of the fresh-food and freezer door panels.
- Refrigerator door fronts from stock and most semi-custom cabinet manufacturers will be supplied as 1/4"-thick panels cut to dimensions, with closest available standard door sizes applied to front.
 - This will leave a “reveal” at top/bottom and sides.
 - Width of “reveal” will depend on manufacturer’s standard door sizes.
 - Door will be affixed on the 1/4" panels at factory or in the field by the local supplier, depending on manufacturer.
- Local shop-built or custom cabinet supplier may fabricate custom 3/4" panels. In this case, edges must be routed.
- Follow notes on drawing to assure room for fingers/hands to open handles.
- Detail A: Dotted line indicates areas that must be routed out about 3/16" (5mm) on the back of side panels 1/4" (6mm) thick or more.

Top-Freezer No-Frost Refrigerator

See page 156 for warranty information.

GE Profile Performance™ Top-Freezer CustomStyle™ Installation Information and Specifications

Rough-In Dimensions

Standard, New Construction and Replacement Installation

Installation Tips to Maximize the Built-In Look

- All wall/floor molding should be removed prior to installation.
- Water recess on rear wall recommended to prevent water line damage. 48" minimum length 1/4" diameter water line tubing recommended.
- When possible, recess both copper water line and electrical outlet. (See local codes)
- Front and rear leveling legs are adjustable for the built-in look. (See owner's manual)

Collar Trim Installation

An enclosure is **required** to match up to the trim, see Typical Installation. To obtain the most integrated look, the cabinet or soffit above the refrigerator should extend out to the same depth as the side panels. The refrigerator opening must have minimum dimensions of 70-1/4" high x 36-1/8" wide x 24-1/2" deep as shown at right. If there is an overhead cabinet, allow 1" for cabinet door clearance with the top trim piece so the cabinet doors can be opened without hitting the top trim. If 1/2" side panels are used, then side trim and panel will be even. If 3/4" side panels are used, then some of the side panel will extend beyond the trim and must be finished.

Rough-In Dimensions

Collar Trim Installation

*The rough-in dimension of 70-1/4" is minimum and is measured from the finished floor to top of opening (or the underside of the overhead cabinets). For Models with Trim Kit: If frameless style cabinets are planned for above the refrigerator, you may need to consider adding a maximum of 1/4" (70-1/2") to height of opening to allow additional clearance between cabinet doors and top of refrigerator trim when cabinet doors are in open position.

For 22 cu. ft. models only.

*22" depth applies to the refrigerator opening, not the actual cabinet depth.

Door Panel Dimensions

Order your own custom wood panels to match cabinetry or other decor.

Fresh Food Panels	Freezer Panel Without Dispenser	Freezer Panel With Dispenser
22 cu. ft. B-42-1/4" C-35-3/4"	A-24-1/16" C-35-3/4"	D-24-1/16" C-35-3/4"

Panels up to 1/4" thick will fit door frame with no special preparation. Add filler behind material thinner than 1/4" for proper fit.

Note: Panels up to 3/4" will require special routing area around handles. Dimensions may vary depending on depth of panel.

Handle Side Clearance

—At least 2" (51 mm) on the handle side for fingertip clearances.

Top and Bottom Clearance

—At least 3/16" (4.75 mm) at the top and bottom edges to allow for trim flange.

Hinge Side Clearance

- A 3/4" (19 mm) thick door panel may strike the adjacent countertops when the door is fully opened. Therefore, the hinge side clearance to raised panel will vary according to the installation situation.
- Allow 1-3/4" (44 mm) clearance when installation does not include side panels.
- The installation of 3/4" (19 mm) thick side panels requires less clearance because the space between the door and adjacent countertop is wider.
- To avoid door contact to countertop consider:
 - Miter the corner of the adjacent countertops 45°, or
 - Pull the refrigerator forward enough to avoid contact.

Stability Leg

- The top-freezer refrigerator is the first cabinet-depth top-freezer. This means depth is more shallow than conventional models and the width is larger. The stability leg gives the unit extra support.

See page 156 for warranty information.

IMPORTANT: Before finalizing specifications for your GE Profile Performance™ CustomStyle™ Refrigerator, please NOTE:

- A minimum of 36" is required for refrigerator installation
- Be sure to allow for 1/2" or 3/4" side panels in addition to the 36" minimum

Stainless steel panels	TKP30FBSS	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A

*Color(s) available: BS = Black case with stainless steel doors, WW = White on white, CC = Bisque, AA = Almond on almond, BB = Black on black.

**Add 9/16" for water hook-up. Hook-up fits in 5/8" back air clearance when calculating installation depth.

†If installed against a wall, allow clearance of 11-1/4" on freezer side to remove ice bin.

To remove fresh food pans, remove door bins.

Clearances required to remove fresh food full-size pan without disassembling:

10-1/2" on 22 cu. ft.; 13-5/8" on 26 cu. ft.; 15-3/4" on 28 cu. ft.; 13" on 30 cu. ft.

For Built-In Appearance allow height space of 69-3/4" on 26 and 28 cu. ft.

Plus, allow additional space for any necessary leveling adjustments.

ALL MODELS AVAILABLE IN U.S. AND CANADA.

Note: If the doors cannot be fully opened because of an obstruction or a wall on either side, a door stop should be installed to prevent door or wall damage. If the doors cannot be opened at least 90 degrees, access to the drawers is limited.

Side-By-Side Refrigerators

Advantium Wall Oven Dimensions and Cabinet Installation (in inches)

A=Allow 1" overlap of oven over top and bottom edges of cutout.
B=Allow 11/16"-3/4" for overlap of oven over side edges of cutout.

Note: Cabinets installed adjacent to wall ovens must have an adhesion spec of at least 194° F temperature rating.

Most 30" Wall Cabinets can be used with this unit.

Note: 2" minimum between cutouts when installed above warming drawer or single wall oven.

Advantium Above-The-Cooktop Oven Dimensions (in inches)

IMPORTANT: PLEASE READ CAREFULLY. FOR PERSONAL SAFETY, THIS APPLIANCE MUST BE PROPERLY GROUNDED TO AVOID SEVERE OR FATAL SHOCK.

DO NOT UNDER ANY CIRCUMSTANCES, CUT, DEFORM, OR REMOVE ANY OF THE PRONGS FROM THE POWER CORD. DO NOT USE WITH AN EXTENSION CORD.

Recommended for solid bottom installation (Must support 200 LBS.)

Most 30" Wall Cabinets can be used with this unit.

Allow minimum of 21" for clearance to adjacent corners, drawers, walls, or etc.

A=Allow 1" overlap of oven over top and bottom edges of cutout.
B=Allow 11/16"-3/4" for overlap of oven over side edges of cutout.

30" Built-In Single Oven Dimensions (in inches)

Single Oven Wall-Mount or Cabinet Installation (in inches)

Note: These ovens are *not* approved for stackable or side-by-side installations.

Note: Cabinets installed adjacent to wall ovens must have an adhesion spec of at least 194° F temperature rating.

30" Built-In Single Ovens (continued)

Optional Undercounter Installation With 36" Gas Cooktop (in inches)

Note: For standard or sealed burner cooktop installation information over the 30" wall oven, refer to 27" wall oven installation, page 181.

Optional Undercounter Installation With 30" CleanDesign or Sealed Burner Gas Cooktop (in inches)

This installation is to achieve minimum gap between bottom of countertop and control panel.

Note: For this installation, the bottom trim **will not** be flush with a typical 4" toe kick.

Note: Cabinets installed adjacent to wall ovens must have an adhesion spec of at least 194° F temperature rating.

Undercounter Installation (in inches)

Note: Oven is rated for use only under the following cooktops:

- GE 30" and 36" electric coil and CleanDesign cooktops
- GE 30" and 36" gas standard and sealed burner cooktops

Note: Gas or electric cooktops may be installed over this oven. See cooktop installation instructions for cutout size. See label on back of oven for approved cooktop models.

Installation Information: Before installing, consult installation instructions (Pub. No. 31-10125) packed with product for current dimensional data and for alternate installation options.

*Depth of unit at conduit connection location (rear) is 6-1/4" on models JP968/938 and 4-5/8" on models JP960/930/350/340.

See page 156 for warranty information.

Installation Information:

Requires a 5" free area between the bottom of the cooktop to any combustible material, i.e., shelving. Free area not required when installing wall oven underneath cooktop. Refer to installation instructions. Requires an 18" minimum from cooktop to adjacent overhead cabinets. Units are furnished with a 48" flexible armored cable.

Before installing, consult installation instructions [Pub. No. 31- 10150 (JP968/960); Pub. No. 31-10117 (JP938/930); Pub. No. 31-10147 (JP350/340)] packed with product for current dimensional data.

36" Ribbon cooktops are approved for use over GE 30" Single Wall Ovens only. 30" Ribbon cooktops are approved for use over select GE 29" and GE 30" Single Wall Ovens. Refer to cooktop and wall oven installation instructions packed with product for current dimensional data.

Note: If installing with a GE Profile Performance™ or GE Profile™ Telescopic Downdraft System, consult both cooktop and downdraft installation instructions packed with product before installing. Cooktop gas/electric supply may need to be re-routed to install downdraft.

Note: Consult cabinet and countertop manufacturer's specs for flush mount installation prior to install.

Filler Trim Kit

When replacing an old GE 30" cooktop (with larger opening) with Models JP938/930/350/340, use the following one-piece trim kit to fill in the over-size hole. Available at additional cost.

JXTR31W (True White)
JXTR31B (Black glass with black, white or bisque pattern)

Flush Mount Installation Kit

Accommodates both 30" and 36" installations. Not for use with stainless steel models.

JXFLMTW (True white glass)
JXFLMBB (Black glass with black, white or bisque pattern)

Built-In Electric Cooktops

Required free area between the bottom of the cooktop and any combustible material, i.e., shelving is 5" minimum on models JP626/326 and 1-1/2" minimum on models JP201/200. Free area not required when installing wall oven underneath. Requires an 18" minimum from cooktop to adjacent overhead cabinets. Units are furnished with a 48" flexible armored cable.

Installation Information:

Before installing, consult installation instructions [Pub. No. 31-10035 (JP626); Pub. No. 31-10114 (30" electric cooktops); Pub. No. 8946-1 (JP201/200)], packed with product for current dimensional data.

Cooktop models JP326WV/326AV/326BV/326CV are approved for use over select GE 27" or 30" Single Wall Ovens. JP626WV/626AV are approved for use over GE 30" Single Wall Ovens only. Refer to cooktop and wall oven installation instructions packed with product for current dimensional data.

Cooktop models JP200V and JP201CV are approved for use over GE undersink dishwasher model GSM2100. Refer to cooktop installation instructions packed with product for current dimensional data.

Note: If installing with a GE Profile Performance™ or GE Profile™ Telescopic Downdraft System, consult both cooktop and downdraft installation instructions packed with product before installing. Cooktop gas/electric supply may need to be re-routed to install downdraft.

Note: The countertop must be at least 26" deep with a flat surface area of 23-1/2" or more, front to back. In addition, other clearances to the front edge of the countertop must be considered.

Counter Installation Dimensions (in inches)

Filler Trim Kit—When replacing an old GE 30" cooktop (with larger opening) with Model JP326WV, JP326CV, JP326AV, JP326BV, use the following one-piece trim kit to fill in the over-size hole. Available at additional cost.

*U.L. Requirement.

Note: A 6" minimum spacing to adjacent side wall is required

JXRW89 Rear Wall Installation Kit

Built-In Downdraft Cooktops Dimensions (in inches)

Wall Installation

Wall installations require 25" countertop depth. When cabinet is flush against the wall, the fan housing can be rotated to the horizontal position for direct venting through rear wall. Make a countertop cutout in the range cabinet according to unit dimensions and installation type. Duct hole is positioned in back of cabinet for through-the-wall ducting. Requires special offset adapter JXRW89.

Peninsula or Island Installation

For peninsula/islands a minimum 26" countertop depth is suggested. Blower should be in vertical position. Island or peninsula cabinets may require adjustment in cutout depth and/or location within the width dimensions. Duct hole is positioned in bottom of cabinet for island or peninsula installation.

Slab Installation

For peninsula or island installation and rear wall ducting, **6" PVC duct or locally approved piping should be used if installing under a poured concrete slab.**

Installation Information: Before installing, consult installation instructions packed with product for current dimensional data.

Note: Electrical cable is not supplied with unit

Cabinet Dimensions (in inches)

Receptacle Location

Install an approved junction box within shaded area shown in diagram. Junction box must be at least 10-1/2" below top of cabinet.

Preparing the Cabinet for Installation

In some cabinets, the sides may need to be scooped or cut down 5-3/4" as shown (right) and the corner braces removed in order to accommodate the cooktop.

Venting Options

Downward Venting (in inches)

Rear Wall Venting (in inches)

Installing the Ductwork

Use galvanized or aluminum duct in 6" round or 3-1/4" x 10" size, or combination of both. **PVC duct or locally approved piping should be used if installing under a poured concrete slab.** Local building code must be followed in specifying type and schedule of all duct used.

Note: Ductwork must be vented to outside. Do not vent into a wall, ceiling, crawlspace, attic or any concealed space. Always use an appropriate roof or wall cap with damper. **Laundry-type wall caps should never be used.** For maximum efficiency use the shortest and straightest duct run possible, with as few fittings as possible. For satisfactory performance the duct run should not exceed 100 feet equivalent length. Refer to the table of equivalent lengths (shown in installation instructions) for various duct configurations.

*Allow 5-3/4" depth at rear for electrical and gas connections.

Note: All gas cooktop models require 7/16" free area below cooktop height to combustible material. 0" clearance is required between left and right sides of cooktop below countertop. Requires 18" minimum from countertop to adjacent overhead cabinets.* *AGA requirement.

Note: If installing with a GE Profile Performance™ or GE Profile™ Telescopic Downdraft System, consult both cooktop and downdraft installation instructions packed with product before installing. Cooktop gas/electric supply may need to be re-routed to install downdraft.

Cooktop Options

GE lets you customize your cooktop with flexible modules to suit your taste. These optional versatile modules—*Grill*, *Calrod® Ribbon*, *Griddle Opening Accessory* and *Grill Cover*—are available at additional cost. Simply plug the modules you want into either side of the cooktop (single modular cooktops accept modules on left side only) and unplug them for easy cleaning and storage.

Cutout Dimensions (in inches)

*U.L. Requirement.

Note: A 6" minimum spacing to adjacent side wall is required

Wall Installation

Wall installations require 25" countertop depth. When cabinet is flush against the wall, the fan housing can be rotated to the horizontal position for direct venting through rear wall. Make a countertop cutout that is centered in the range cabinet according to unit dimensions and installation type. Duct hole is positioned in back of cabinet for through-the-wall ducting.

Peninsula or Island Installation

For peninsula/islands a minimum 26" countertop depth is suggested. Blower should be in vertical position. Island or peninsula cabinets may require adjustment in cutout depth and/or location within the width dimensions. Duct hole is positioned in bottom of cabinet for island or peninsula installation.

Slab Installation

For peninsula or island installation and rear wall ducting, **PVC duct or locally approved piping should be used if installing under a poured concrete slab.**

See page 156 for warranty information.

Built-In Downdraft Cooktops Dimensions (in inches)

Cabinet Dimensions (in inches)

Receptacle Location

Install an approved junction box within shaded area shown in diagram. Junction box must be at least 10-1/2" below top of cabinet.

Preparing the Cabinet for Installation

In some cabinets, the sides may need to be scooped or cut down 2" as shown (right) and the corner braces removed in order to accommodate the cooktop.

Installation Information: Before installing, consult installation instructions

[Pub. No. 49-8672-1 (JP389/385); Pub. No. 49-8670 (JP380)] packed with product for current dimensional data.

Grill Module, JXDL44N

Includes front/rear controlled heating element, one-piece grill grate, and porcelain-enameled reflector pan.

Grill Cover (For model JP380 patio grill only.)

Covers grill area when not in use
JXDM3—White on white, JXDM2—Black on black, JXDM4—Black on black

Griddle Accessory, JXDD44R (Use with optional Grill Module.)

Place over heating element and reflector pan from optional grill module. Griddle accessory has a non-stick coating and is self-draining.

Ribbon Modules

Patterned glass top with one 8" and one 6" ribbon heating element
JXDR50VW—White on white, JXDR50VB—Black on black,

*SS= Stainless steel, WW = White on white, CC = Bisque, AA = Almond on almond, BB = Black on black, WH = White, AD = Almond, CM = Color-Matched indicates color of the oven door matches range cooktop and drawer face (either white or almond).

Note: Cabinets installed adjacent to slide-in electric ranges must have an adhesion spec of at least 194°F temperature rating.

Note: All 30" Slide-In Ranges conform to U.L. requirements for 0" spacing from range to adjacent walls below countertop. To reduce possibility of scorching the side walls above the countertop when no load is present on burners, it is recommended that a minimum 6" spacing from adjacent side wall be allowed for possible extended high-heat element operation.

Receptacle Locations: For all 30" Slide-In Ranges locally approved flexible service cord or conduit must be used because terminals are not accessible after range installation. See shaded area in drawing for location of electrical outlet box. Recommended outlet locations allow range to be installed directly against rear wall.

Note: Range may be placed with 0" clearance (flush) at the back wall and side walls if the range side trims extend beyond the cabinet fronts at least 1/4". (Self-clean models only)

Installation Information: Before installing, consult installation instructions packed with product for current dimensional data.

All GE ranges are equipped with an Anti-Tip device. The installation of this device is an important, required step in the installation of the range.

30" Slide-In Range Dimensions (in inches) Models JS966 and JSP56/46

Optional Kits for Slide-In Electric Ranges (Models JS966, JSP56 and JSP46) (Available At Additional Cost)

Maintop Filler

(Fills gap between cooktop and wall when unit is installed in 30" free-standing cutout)
JXS66WW—White
JXS66CC—Bisque
JXS66BB—Black

Accessory Backguards

(Attaches to the back of range as a backguard when unit is installed in 30" free-standing cutout)
JXS39SS—Stainless
JXS36WW—White
JXS36CC—Bisque
JXS36BB—Black

Body Sides

(Slide-in ranges are sold without sides installed. Can be installed on either left or right when unit has one exposed side [no cabinet adjacent]. Kit contains 1 body side)
JXS76WW—White
JXS76CC—Bisque
JXS76BB—Black

Vertical Side Trim Kits

(If cabinet cutout width is more than 30", a vertical side trim kit may be used to close the gap between the range and cabinet)
JXS86WW—White
JXS86CC—Bisque
JXS86BB—Black

Lower Trim Kits

(If counter height is greater than 36.5", a lower trim kit is recommended to extend the useful height to 38" maximum)
JXS56WW—White
JXS56CC—Bisque
JXS56BB—Black

Optional backguard (available at additional cost)	JXS31 JXS33 JXS34	JXS31 JXS34	

*WW = White on white, BB = Black on black, AA = Almond on almond.

Universal Orifices for Natural or LP Gas. Factory set for Natural Gas. A set of LP orifices is included with each range for LP conversion.

30" Slide-In Gas Ranges Dimensions (in inches)

Models JGSP44 and JGSP23

Dimensions (in inches)

Model	A*	B	C**	D	E
JGSP44	30	36-1/4	29-1/2	45-13/16	35-7/8 to 38
JGSP23	30	36-1/4	28-7/8	45-1/8	35-7/8 to 38

*Cooktop width including overhang 30-3/4".

**Depth including handle:
26-7/8"—Wall to front of closed oven door
26-1/2"—Depth to front top edge of cooktop

Installation Information: Before installing, consult installation instructions (Pub. No. 31-10181 (JGSP44AEY, JGSP44WEY, JGSP44BEY, JGSP23WEY and JGSP23BEY) packed with product for current dimensional data.

Rear Filler Strip Kits

Models JGSP44 and JGSP23 are shipped with required "vented" rear filler strip

Optional Kits for Slide-In Gas Ranges:

(Available at additional cost on all models except JGSS05BEA)

Lower/Side Trim Kits

JXS52BB—Lower Trim Kit (Black)
JXS53WW—Lower Trim Kit (White)
JXS54AA—Lower Trim Kit (Almond)
Pub. No. 3-A040 Vertical Side Trim Kit (Brushed-Chrome)

Accessory Backguards

JXS31—White Accessory Backguard
JXS32—Brushed-Chrome Accessory Backguard
JXS33—Almond Accessory Backguard
JXS34—Black Accessory Backguard

Endcap Kit

JXS40—Endcap kit to accommodate replacement where countertop may already be notched.

Optional Gas Range Wok Accessory (Available at additional cost)

JXWK = Wok accessory holder sits on top of maximum burner grate to hold a **round-bottom** wok.

Counter Cutout Dimensions for Models JGSP44 and JGSP23 (in inches)

You must use the rear filler strip kit shipped with the range or the optional accessory backguard (JXS31, JXS32, JXS33, JXS34) when installing these ranges.

Note: Cabinets installed adjacent to slide-in ranges must have an adhesion spec of at least 194° F temperature rating.

Note: Models JGSP44AEY, JGSP44WEY, JGSP44BEY, JGSP23WEY and JGSP23BEY are shipped with special "vented" rear filler strip. Post form countertops may not be used when installing this range. The filler strip (provided) or optional backguard kit is required for installation.

Range Dimensions (in inches)

Downdraft Installation Dimensions (in inches)

Receptacle Location (in inches)

Receptacle Locations: For all 30" Slide-In Ranges locally approved flexible service cord or conduit must be used because terminals are not accessible after range installation. See shaded area in drawing for location of electrical outlet box. Recommended outlet locations allow range to be installed directly against rear wall.

Counter Cutout Dimensions (in inches)

Note: 30" ranges conform to U.L. requirements for 0" spacing from walls below countertops. However some kitchen cabinet finishes can be damaged by heat from the heating elements. It is recommended that a clearance of at least 1-1/4" be maintained to adjacent walls. Where varnished wood or plastic film finishes are used, a minimum clearance of 6" should be maintained.

Installation Information: Before installing, consult installation instructions [Pub. No. 49-8643-1 (JSP69WV/69BV)] packed with product for current dimensional data.

Optional Kits For JD966/JDP46 Electric Ranges (Available At Additional Cost)

Maintop Filler

(Fills gap between cooktop and wall when unit is installed in 30" free-standing cutout)

JXS66WW—White

JXS66CC—Bisque

JXS66BB—Black

Accessory Backguards

(Attaches to the back of range as a backguard when unit is installed in 30" free-standing cutout)

JXS39SS—Stainless

JXS36WW—White

JXS36CC—Bisque

JXS36BB—Black

Lower Trim Kits

(When a drop-in is installed in an existing cutout greater than 26.75 inches from the counter to the cabinet cross-rail, a lower trim kit should be used to fill the gap at the bottom of the range)

JXS96WW—White

JXS96CC—Bisque

JXS96BB—Black

Installation Information: Before installing, consult installation instructions (Pub. No. 31-10427) packed with product for current dimensional data.

Note: Cabinets installed adjacent to drop-in electric ranges must have an adhesion spec of at least 194°F temperature rating.

Note: All 30" Drop-In Radiant Ranges conform to U.L. requirements for 0" spacing from range to adjacent walls below countertop. To reduce possibility of scorching the side walls above the countertop when no load is present on burners, it is recommended that a minimum 6" spacing from adjacent side wall be allowed for possible extended high-heat element operation.

IMPORTANT: 30" DROP-IN RANGES ARE DESIGNED TO HANG FROM THE COUNTERTOP. IT DOES NOT REST ON THE FLOOR. FOR INSTALLATION ALTERNATIVES, REFER TO INSTALLATION INSTRUCTIONS PACKED WITH PRODUCT.

All GE ranges are equipped with an Anti-Tip device. The installation of this device is an important, required step in the installation of the range.

JBP65	29-7/8	44-7/16	25-3/8	47-5/8
JBP64	29-7/8	44-7/16	25-3/8	47-5/8

*Dimension from wall to front of closed oven door handle is 28-7/8" on model JB970; 27-3/8" on models JB960/940, JBP85/79; and 27-3/4" on models JBP78/66/65/64.

Note: Conforms to U.L. requirements for 0" spacing for adjacent walls below countertops. To reduce possibility of scorching of walls, it is recommended a minimum of 1-1/2" spacing be allowed from adjacent side walls to allow for possible extended, high-heat, no-load heating element operation.

Installation Information:

Before installing, consult installation instructions packed with range for current dimensional data.

Receptacle Locations: For 30" Free-Standing Ranges locally approved flexible service cord or conduit must be used because terminals are not accessible after range installation. See shaded area drawing for location of electrical outlet box. Recommended outlet locations allow range to be installed directly against wall.

Dimensions and Installation Information (in inches)

Dimensions and Installation Information (in inches) for Models JBP63 and JBS61 only

†The range may be placed with a 0" clearance (flush) at the back wall and side walls if the range side trims extend beyond the cabinet fronts at least 1/4". Self-clean models only.

*Dimension from wall to front of closed oven door handle is 27-1/2".

*WW = White on white, AA = Almond on almond, BB = Black on black, WH = White, AD = Almond, CM = Color-Matched indicates color of oven door or storage drawer matches range cooktop (either white or almond), WG = White Glass, AG = Almond Glass, BG = Black Glass.

Warranty Information

Full one-year warranty (parts and labor at no additional charge) applies to the entire range.

All GE ranges are equipped with an Anti-Tip device. The installation of this device is an important, required step in the installation of the range.

30" Free-Standing QuickClean™ Electric Ranges (continued)

Dimensions and Installation Information (in inches)
for models JBP48/35/30/24

Note: 30" ranges conform to U.L. requirements for 0" spacing from adjacent walls below countertops. To reduce possible scorching of walls, engineering recommends a minimum of 1-1/2" spacing to allow for possible extended, high heat, no-load heating element operation.

Receptacle Locations:

Locally approved flexible service cord or conduit must be used because terminals are not accessible after range installation. See shaded area in drawing for location of electrical outlet box. Recommended outlet locations allow range to be installed directly against wall.

Installation Information: Before installing, consult installation instructions packed with product for current dimensional data.

Dimensions and Installation Information (in inches)
for models JBP19 and JBS27/26/07/05/03.

Cabinet Dimensions (in inches)

Model	A	B	C*	D
JBP19	29-7/8	46-1/2	26-3/8	46-3/8
JBS27	29-7/8	46-1/2	26-3/8	46-3/8

Counter Cutout Information

Note: Telescopic downdraft vents are not recommended to be installed with cooktops that are flush mounted.

Note: The countertop must be at least 26" deep with a flat surface area of 23-1/2" or more, front to back. In addition, other clearances to the front edge of the countertop must be considered.

Installation Information: Before installing, consult installation instructions (Pub. No. 49-8446, 36" and 30" Telescopic Hoods) packed with product for current dimensional data.

Note: Dimensions shown are for reference only. Before cutting out countertop, refer to instructions packed with **downdraft and cooktop**.

Note: Duct run not to exceed 100 equivalent feet.

Note: Installation in cabinets/countertops against the wall will not be possible in most applications.

Pay special attention to the 4 areas of potential interference circled above. 2" of **FLAT** countertop is needed behind rear edge of cooktop to accommodate downdraft vent cover.

Approved for use with the following GE cooktops—36" and 30" Calrod® models, 36" and 30" radiant models, 30" solid disk models, 36" and 30" gas sealed burner models and 36" and 30" induction models. **Not approved for use with standard burner gas cooktops.**

Dimensions (in inches)

Ventilation Options

The SpacemakerPlus™ convection/microwave and Spacemaker microwave ovens are designed for adaptation to the following three types of ventilation:

Outside Exhaust (Vertical—as shown above)

Outside Exhaust (Horizontal)

Recirculating (Non-vented ductless—see Filter Kit Drawing, order JX81 or JX81A)

Requires 120V grounded outlet. Electrical receptacle must be located in cabinet above SpacemakerPlus™ microwave/convection and Spacemaker microwave ovens. No additional wiring, venting or cabinet rebuilding necessary in many cases. Complete detailed, easy-to-follow installation instructions and convenient full-size templates are packed with product.

Important: When installing these ovens over a range, allow minimum of 2" from bottom of microwave oven to top of range backguard to allow for removal of light covers.

Optional Accessories (Available at additional cost)

Filler Panel Kits

JX40WH, JX46WH,
JX48WH—White
JX40CT, JX48CT—Bisque
JX40AL, JX48AL—Almond
JX41, JX46BL, JX48BL—Black

When replacing a 36" or 42" range hood, this kit fills in the additional width to provide a custom built-in appearance. For installation between cabinets only; not for end-of-cabinet installation. Each kit contains two 3"-wide filler panels. Two kits are needed for a 42" opening.

Filter Kits

JX81A—Recirculating Charcoal Filter Kit
To be used when the Spacemaker microwave oven cannot be vented to the outside.

JX81—Recirculating Charcoal Filter Kit
To be used when the SpacemakerPlus™ microwave/convection oven cannot be vented to the outside.
(JVM1190 models only.)

JX22SS—Stainless Steel Decorative Panel Kit

When replacing a Hi/Low range with a SpacemakerPlus™ microwave/convection oven or Spacemaker over a range model, this panel kit fills in the area between the microwave and range left by the Hi/Low model.

This information is not intended to be used for installing unit described. Before installing, consult installation instructions packed with product/kit for current dimensional data.

Undercabinet Mounting Kit Pub. No. 4-A019 For Spacemaker II™, Compact and Subcompact Microwave Oven Models (Available at additional cost)

Undercabinet Installation

Install Spacemaker II™, Compact and Subcompact microwave ovens in just a few easy steps with the mounting template, which provides all the necessary measurements.* These microwave ovens can be installed on practically any wood or metal cabinets.

*Installation may vary depending on cabinets.

Note: 120V, 60-cycle, grounded power receptacle location optional on back within cabinet opening.

This information is not intended to be used for installing unit described. Before installing, consult installation instructions packed with product/kit for current dimensional data.

Trim Kits

Optional Trim Kits for 1.3 GE Profile Performance™ Microwave Ovens (Available at additional cost)

For a custom built-in appearance, these kits allow built-in installation of the 1.3 countertop microwave oven into a wall or cabinet alone and are U.L.-approved for installation over a GE single electric wall oven. These kits should not be installed over a gas wall oven.

Note: 120V, 60-cycle, grounded power receptacle location optional on back within cabinet opening.

Dishwasher Rough-In Information

Note: Dishwasher must not be installed more than 10 feet from sink for proper drainage. All plumbing and electrical work must be in accordance with local codes.

Most of the installation work should be done before the dishwasher is moved into place. First, select a location as close to the sink as possible for ready access to water and drain lines. For proper operation and appearance of the dishwasher, the cabinet opening should be square and have dimensions as shown in Figure 1. If the dishwasher is to be installed in a corner, there must be sufficient clearance to open the door as shown in Figure 2. A minimum clearance of 2" is recommended.

Rough-in the water, electrical, and drain lines before proceeding with the installation. The lines should run straight to their connections on the dishwasher.

Note: Make sure that the lines do not cross in front of the dishwasher motor or its legs.

Note: For trim kit to install wood panel up to 3/16" thick on GSS1800Z model only, order Pub. No. 5-A007.

Cabinet Cut-Out for Sink

Cabinet cut-outs for offset single and double bowl sinks. Dishwasher not provided with complete enclosure. Enclosures for sides, top, bottom, and back must be provided by installer at time of installation.

Wood Insert Cut-Out Dimensions (in inches)

Inserts must not exceed 1/4" thickness within 5/16" of edge around full circumference.
Order GPF325 kit.

Note: Under-the-Sink dishwashers can be installed under GE cooktop models JP200V and JP201CV. Refer to cooktop installation instructions.

Stainless Steel Sinks
Single and Double Compartment Models
(Dimensions in Inches)

Model Number	Overall Size		Inside Each Compartment		
	L	W	L	W	D
GPF95 (Single Bowl, R)*	25	21-1/4	21	15-3/4	5-3/8
GPF96 (Single Bowl, L)*	25	21-1/4	21	15-3/4	5-3/8
GPF97 (Double Bowl)	33	21-1/4	14	15-3/4	5-3/8

Model Number	Cutout In Countertop 1-1/2" Radius Corners		No. Of 1-1/2" Dia. Faucet Holes	Ship. Wt. Lbs.
	L	W		
GPF95 (Single Bowl, R)*	24-3/8	20-5/8	3 or 4**	10
GPF96 (Single Bowl, L)*	24-3/8	20-5/8	3 or 4**	10
GPF97 (Double Bowl)	32-3/8	20-5/8	3 or 4**	12-1/2

Note: Drain opening size is 3-1/2".
Above models are fully sound deadened.
*Suffix "L" or "R" means drain outlet is located in upper left or right corner of sink compartment.
**All have four holes, but one hole has a removable plug.

Plumbing/Electrical Rough-In

Plumbing: Hot Water Only: Use 3/8" O.D. copper tubing or 1/2" O.D. plastic tubing min. inlet line. Water valve has 3/8" internal threads. Hand cut-off valve is recommended.

Electrical: Fuse circuit with 15 amp or 20 amp standard fuse or circuit breaker. Total amp load is 8.6. Dishwasher operates on 120V, 60 Hz power. Two-wire cable (14 Ga. Min.) with ground must be installed.

Note: All rough-in, both plumbing and electrical, must be completed before the dishwasher is installed. All plumbing and electrical work must be in accordance with local codes.

Specifications: Inlet Water Temperature Recommended: Minimum 120°F. at dishwasher. Inlet Water Pressure Required: 15 to 120 lbs./sq. in.

Cabinet Rough-In

Either single- or double-bowl sink may be used, centered or offset, as shown in the front illustration above. The 20-1/2" max. dimension from wall to front of sink bowl must be accurate if dishwasher is to fit properly under sink. Water lines to sink faucet and drain from sink can be run through area "A." HOT WATER line to dishwasher is installed in area "B." Garbage disposer, water lines to faucet, trap, waste air gap and water cut-off valve are installed in 12" wide cabinet shown in area "C." Sink opening for garbage disposer must be dimensioned as shown in front view, area "C" above (7-1/2"). This will provide clearance for disposer and plumbing in cabinet "C" when using double bowl sink. If the sink bowl is more than 20-1/2" max. specified distance from the wall, or if the base cabinet is less than the 24" min. depth from the wall, a gap between the tub front flange and the front of the base cabinet may result.

Rough-In for Installation with Disposer

Rear View Plumbing Arrangement

A close-fitting elbow or special shallow sink strainer is necessary to provide clearance between sink drain and dishwasher. Dishwasher furnished with 1/2" I.D. drain hose, 78" long. If using copper tubing, 2" length of 1/2" I.D. rubber hose must be provided to connect copper tubing to pump outlet. Disposer should have 7/8" I.D. dishwasher drain connector.

Washer Specifications

Circuit Requirements:

An individual, properly-grounded branch circuit, with a three-prong grounding-type receptacle, protected by a 15 or 20 amp circuit breaker or time-delay fuse is required.

Electrical Rating:

115V, 60Hz, 10A

Washer Note:

Washer wall outlet must be located within 36" of service cord entry. Wall outlet must not be located behind dryer.

Dryer Specifications

Exhaust options:

Electric: 4-way via rear, right, left and bottom.

Gas: 3-way via rear, left and bottom. Dryer is shipped exhausted to the rear. Alternate exhausting knockouts are supplied.

Circuit Requirements:

Electric: An individual, properly-grounded branch circuit, protected by a 30 amp circuit breaker or a time-delay fuse is required.

Electric Dryer Rating:

208/240V, 5600W, 24A, 60Hz

208V, 4400W, 22A, 60Hz

Gas: An individual, properly-grounded branch circuit, with a three-prong grounding-type receptacle, protected by a 15 or 20 amp circuit breaker or a time-delay fuse is required.

Gas Dryer Electric Rating:

120V, 60Hz, 6A

Gas (BTU/HR): 22,000. Factory-equipped for natural gas. Tested for LP gas. LP gas supply requires an optional conversion kit, 5.7 cu. ft. model kit is WE25X10003, 6.0 and 7.0 cu. ft. model kit is WE25X0217. Have a qualified gas technician install a conversion kit. See dryer ducting information for proper installation.

Dryer Note: Dryer wall outlet must be located within 36" of service cord entry and accessible when dryer is mounted in position.

Dryer Exhausting Information

For complete information see installation instructions packed with dryer.

Important Note: GE Kit Number 14-A018 needed when converting rear exhaust to bottom or side. (On 5.7 extra-large capacity models only.)

Ducting Materials

For best performance, this dryer should be vented with 4" diameter all rigid metal exhaust duct. If "all rigid metal" duct cannot be used, then "flexible all metal" venting can be used, but it will reduce the maximum recommended duct length.

The following kit or parts are available from your local service organization.

Kit WX8X75—7" aluminum duct and 4" hood, short tail.

(OR individual parts):

WX8X65 7" aluminum flex duct only

WX8X58 4" clamps (2)

WX8X67 4" exhaust hood

See installation instructions for complete information.

Exhaust length calculation:

- Determine the number of 90° turns needed for your installation. If you exhaust to the side or bottom of dryer, add one turn.
- The maximum length of 4" rigid (aluminum or galvanized) duct which can be tolerated is shown in the table.
The maximum lengths for flexible ducts are less than for rigid duct.
See table in installation instructions. A turn of 45° or less may be ignored.
Two 45° turns within the duct length should be treated as a 90° elbow.
A turn over 45° should be treated as a 90° elbow.

Exhausting the dryer to the outside is strongly recommended to prevent large amounts of moisture and lint from being blown into the room. Gas dryers or any dryer located in a closet **must** be exhausted to the outside.

Caution: For personal safety do not terminate exhaust into a chimney, under any enclosed house floor (crawl space), or into an attic, since the accumulated lint could create a fire hazard or moisture could cause damage. Never terminate the exhaust into a common duct or plenum with a kitchen exhaust, since the combination of lint and grease could create a fire hazard.

Exhaust ducts should be terminated in a dampered wall cap to prevent back drafts, bird nesting, etc. The wall cap must also be located at least 12" above the ground or any other obstruction with the opening pointed down. Other terminations, such as louvered wall boxes, are acceptable provided they are equivalent to a 4" opening dampered wall cap.

Underwriters
Laboratories

Special Installation Requirements

Alcove or Closet Installation

- If your dryer is approved for installation in an alcove or closet, it will be stated on a label on the dryer back.
- The dryer **MUST** be exhausted to the outdoors. See installation instructions.
- Minimum clearances between dryer cabinet and adjacent walls or other surfaces are:
0" either side
3" front and rear
- Minimum vertical space from floor to overhead cabinets, ceilings, etc. is 52".
- Closet doors must be louvered or otherwise ventilated and must contain a minimum of 60 sq. in. of open area equally distributed. If this closet contains both a washer and a dryer, doors must contain a minimum of 120 sq. in. of open area equally distributed.
- The closet should be vented to the outdoors to prevent gas pocketing in case of a gas leak in the supply line.
- No other fuel-burning appliance shall be installed in the same closet with the dryer.

Bathroom or Bedroom Installation

- The dryer **MUST** be exhausted to the outdoors. See installation instructions.
- The installation must conform with the local codes, or in the absence of local codes, with the National Fuel Gas Code, ANSI Z223.

Minimum Clearances other than Alcove or Closet Installations

- Minimum clearances to combustible surfaces:
0" both sides
3" rear

For more information on venting kits and accessories, please call 1-800-GE-CARES.

Washer Dimensions (in inches)

Washer Specifications

Circuit Requirements: An individual, properly-grounded branch circuit, with a three-prong grounding-type receptacle, protected by a 15 or 20 amp circuit breaker or time-delay fuse is required.

Electrical Requirements: 120V, 60 Hertz, 12.0 Amps

See Pub. No. 31-2819 for installation information.

Special Installation Requirements

Undercounter Installation

- Accessory mounting kits are required for undercounter installation. To order, call 1-800-848-7722.
- Washer—Order Pub. No. 14-A037
- Dryer—Order Pub. No. 14-A008

Stacked Installation

- Brackets for stacking dryer over washer are included with the dryer.

Alcove or Closet Installation

- If your dryer is approved for installation in an alcove or closet, it will be stated on a label on the dryer back.
- The dryer MUST be exhausted to the outdoors.
- See EXHAUST INFORMATION on previous page.

- Minimum clearances between dryer cabinet and adjacent walls or other surfaces are:
0" either side
3" front and rear
- Minimum vertical space from floor to overhead cabinets, ceilings, etc. is 52".
- Closet doors must be louvered or otherwise ventilated and must contain a minimum of 60 sq. in. of open area equally distributed. If this closet contains both a washer and a dryer, doors must contain a minimum of 120 sq. in. of open area equally distributed.
- The closet should be vented to the outdoors to prevent gas pocketing in case of a gas leak in the supply line.
- No other fuel-burning appliance shall be installed in the same closet with the dryer.

Bathroom or Bedroom Installation

- The dryer MUST be exhausted to the outdoors. See EXHAUST INFORMATION on previous page.
- The installation must conform with the local codes, or in the absence of local codes, with the National Fuel Gas Code, ANSI Z223.

Minimum Clearances other than Alcove or Closet Installations

- Minimum clearances to combustible surfaces:
0" both sides
3" rear

For more information on venting kits and accessories, please call 1-800-GE-CARES.

Dryer Specifications

Exhaust options:

Electric: 4-way via rear, right, left and bottom.

Gas: 3-way via rear, right and bottom. Dryer is shipped exhausted to the rear.

Exhaust Elbow Kit:

Order Pub. No. 14-A018.

Electrical Requirements:

208/240V, 3 Wire, 5600W, 24A, 60 Hz

208V, 3 wire, 4400W, 22A, 60 Hz

Gas Requirements: 120V, 60 Hz, 6 A

See Pub. No. 49-9963-2 for installation information.

General Information for Dryer Exhausting

Minimizing the length of ductwork and the number of turns in an exhaust system minimizes the potential for lint to settle and accumulate in the exhaust duct and in the interior cabinet of the dryer. Refer to your specific dryer installation instructions for recommended duct length.

1. Wall Caps And Other Terminations

All exhaust systems must be terminated in a manner that will prevent backdrafts from outside as well as prevent birds or other wildlife from building nests or taking refuge in the ductwork. The wall cap should present minimal resistance to the flow of exhaust air and should require little maintenance to prevent clogging. **The preferred termination is either a dampered wall cap with a 4" wide opening or a movable louvered wall cap.** A 2-1/2" wall cap restricts airflow and increases drying time. It must be installed with the opening down, and installed at a minimum of 12" above ground level or any other obstruction. Special consideration should be given in areas where heavy snow drifts are likely to occur to ensure the wall cap does not become obstructed. Other types of terminations, such as roof vents or louvered plenum chambers, are acceptable providing **they are equivalent to the 4" dampered wall cap.** They must contain at least 14 square inches of ventilation area and afford adequate protection against backdrafts.

Exhaust ducts must not contain screens or other filtering devices which may become clogged with lint. The dryer exhaust must not terminate in an ordinary chimney, under an enclosed house floor or crawl space, or into an attic, since any accumulated lint could create a fire hazard and the moisture could cause damage. **Never terminate the exhaust into a common duct or plenum with a kitchen hood exhaust since the combination of grease and lint could create a fire hazard.**

2. Separation Of Turns In The Ductwork

All turns in the exhaust system, external to the dryer itself, including the distance from the last turn to the dampered wall cap, should be separated by at least 4' of straight metal duct. This will reduce the added resistance which results from rapid changes in airflow direction inside the ducting. If two turns must be closer than 4', deduct 10' from the maximum lengths shown in the chart on page 223.

3. Treatment Of Turns Other Than 90°

One turn of 45° or less may be ignored. Two such turns should be treated as one 90°. Each turn over 45° should be treated as one 90°. Refer to specific dryer installation for maximum duct lengths and for allowable number of 90° bends. In determining the number of turns for an exhaust system, one 90° turn must be added for the bend made inside the cabinet whenever the dryer is exhausted through the right, left or bottom. **NOTE:** Some dryers are limited to only rear exhausting. Consult the installation instruction for the type of dryer being used.

4. Use Of Flexible Metal Ducting

We recommend the use of 4" diameter rigid metal ducting for permanent and transition venting. Permanent venting is from the wall, floor or ceiling to the outside. Transition venting is from the dryer to the wall, floor or ceiling. If all rigid ducting cannot be used then flexible all metal ducting may be used, if the following precautions are adhered to:

- Use only 4" diameter all metal ducting.
- Never use foil or other ducting that can be easily punctured with a screwdriver or nail.
- It must not be allowed to collapse, kink or sag when the dryer is in its final installed position. Required turns in the exhaust system should be made with rigid elbows.
- Use the shortest duct length possible. Don't exceed the maximum allowable duct length specified in the installation instructions.
- Stretch the duct to its maximum length.
- To reduce the risk of fire, **NEVER USE PLASTIC OR OTHER COMBUSTIBLE DUCTWORK.**

NOTE: In special installations where it is impossible to use all metal rigid or all metal flexible duct for transition venting, UL Listed clothes dryer transition duct may be used. The following additional precautions should be followed if this type of ducting is used.

- Never use transition duct beyond the wall, ceiling or floor inside the dryer.
- Avoid resting the duct on sharp objects.

Please refer to the installation instructions for additional exhaust information.

5. Sealing Of Joints

All duct joints should avoid leaks. Duct joints should be made air and moisture tight by wrapping the overlapped joints with duct tape. The male ends of each section of duct should point away from the dryer.

Do not assemble the ductwork with screws or other fasteners that extend into the duct. They will serve as a collection point for lint.

6. Water Condensation

Condensation in a dryer exhaust system is caused by the moisture in the exhausted air contacting the cold inner surfaces of the ductwork. Condensation, which forms at the beginning of the drying cycle, will dissipate quickly after the ductwork becomes heated. If the ductwork passes through an area which keeps it cool throughout the drying cycle, considerable condensation within the duct can be expected. This can result in rapid accumulation of lint in the ductwork.

Ductwork which runs through an unheated area or is situated adjacent to an air conditioning duct should be insulated to avoid such condensation problems. Joints should be tight to avoid leaks and, where feasible, the duct should be dropped 1/16" per foot toward the termination.

7. Accessibility For Cleaning

Since it may be necessary from time to time to remove lint from the inside of the ductwork, it is important that the exhaust system be installed with a provision for periodic inspection and cleaning. Some provision should be made for access to turns and straight runs of duct installed in an enclosed area, such as above plastered ceilings. Special consideration should be given to the amount of maintenance required for roof caps on vertical installations, since the user cannot be expected to make frequent inspections or cleanings.

8. In Line Exhaust (Booster) Fans

Use of In Line exhaust (booster) fan for single unit installation is not recommended:

- Operator may forget to turn it on.
- It may block.
- It may fail without Operator noticing it.

Single Family-Type Dwellings

For more detailed information, refer to the installation instructions for the specific dryer model selected.

Mobile or Manufactured Home Installation

Gas Dryer installation must conform with local Gas Codes and with CGA B149.1 or B149.2 (Installation code for Gas Burning Appliances and Equipments).

All Dryer Installations must conform to Manufactured Home Construction and Safety Standard, Title 24 CFR, Part 32-80. The dryer **MUST** be exhausted to the outdoors with the termination securely fastened to the mobile home structure. The exhaust **MUST NOT** be directed underneath the mobile home.

Multi-Unit Dryer Installation

Multi-Unit Systems

Accurate installation of a good dryer exhaust system in multi-family construction is especially important. The restrictions applied by this type of construction should cause the planner to be more concerned than in single-family construction.

When the length of the exhaust duct or the number of turns in the system exceed the maximum limitations recommended by the dryer manufacturer, the planner must seek an alternate solution. One option is to install a common ducting system that is capable of handling the discharge of several dryers at various points along the system.

The scope of the subject is far too broad to be extensively described within this publication. Sufficient information is presented, however, to make the planner aware of the importance of special attention to the subject. Two types of common ducts are generally used: (1) the common dryer exhaust stack with an auxiliary roof fan and (2) the chimney exhaust.

Stack and chimney designs and exhaust fans must meet all local code requirements. It is suggested that professional engineering counsel should be sought in these matters. Dryers should be installed as close to the common duct as possible. Dryer discharges must be offset to prevent one unit from exhausting directly into another. **See Illustration No. 1.**

Common Fan Assisted Dryer Exhaust Stack (Auxiliary Roof Fan Systems)

The stack outlet (**See Illustration No. 2**) must be fitted to a continuous duty exhaust fan rated to handle the stack air volume for the total number of dryers on the system. Periodic cleaning of the exhaust fan is necessary to maintain efficient operation.

The bottom of the stack should contain a barometric damper to prevent drawing air through the dryers not in use, and a lint cleanout access door. The damper should be adjusted to just open with all dryers on and the continuous duty exhaust fan operating.

The weighted damper in the individual dryer ducts should be adjusted so that it will just close with all dryers off and the continuous duty exhaust fan operating. The fan should be running at all times. The duct system from each individual dryer must meet the turn and length requirements as noted on page 223.

The required stack diameter for air volumes of 200 CFM to 3,000 CFM can be determined from **Illustration No. 4** and calculations on the following page.

Chimney Exhaust System

The chimney must be fire resistant and large enough to accommodate the volume of air exhausting from the dryers. Consideration must be made for lint buildup, excessive chimney pressures, backdrafts and other technical factors which will influence the performance and the safety of the system. A lint clean-out access door should be included at the bottom of the chimney. Each dryer duct must have a 4" diameter backdraft damper, adjusted so that it will just close with the dryer inoperative. This will prevent the exhaust and lint of one dryer from going into another dryer and its room. The duct system for each individual dryer must meet the turn and length requirements as noted on page 215.

Use the specs for a 2-1/2" exhaust hood for proper dryer performance. Include the 90° elbow and all ducting in the chimney in your calculations. The 22" (minimum) of vertical ducting in the chimney reduces back pressure and is required for proper dryer performance. **See Illustration No. 3.**

Illustration 4

How To Use Illustration No. 4

Airflow value: 150 CFM.

Assume installation contains eight (8) dryers operating at the same time. Stack air volume (Q) = 150 x 8 = 1200 CFM (Q) is air volume that stack must be capable of handling in the event all dryers are running at one time. Therefore, the stack diameter must be:

$$D = \sqrt{\frac{576Q}{\pi V}} = \sqrt{\frac{576 \times 1200}{\pi \times 1500}} = \sqrt{147} \approx 12 \text{ inches}$$

or read directly from Illustration No. 4 by placing 1200 on the vertical scale and reading 12 on the horizontal scale. The stack diameter should be 12 inches to handle the required volume of air and the continuous duty exhaust blower should be rated to handle this volume while maintaining an air velocity of 1500 Ft./Minute.

Note: The third prong on the WSM2780W plug configuration is a flat spade type rather than a typical round probe. It requires a matching wall outlet.

Electrical Requirements

WSM2700W: Electric Dryer—This appliance should be connected to an individual, properly-grounded branch circuit with 120/240V or 120/208V single-phase 60 Hz electrical service and should be protected by 30-amp time-delay fuses or circuit breakers. This appliance is manufactured with neutral connected to the frame. Power cord should be purchased separately.

WSM2420T: Electric Dryer—This appliance should be connected to an individual, properly-grounded branch circuit with 120/240V single-phase 60Hz electrical service and should be protected by 30-amp time-delay fuses or circuit breakers. This appliance is manufactured with the neutral connected to the frame. Power cord should be purchased separately.

NOTE: THESE APPLIANCES ARE NOT APPROVED FOR 120-VOLT OPERATION.

WSM2480T: Gas Dryer—This appliance should be connected to an individual, properly-grounded branch circuit with a three-prong grounding-type receptacle and 120-volt single-phase 60 Hz electrical service and should be protected by 15 or 20-amp time-delay fuses or circuit breakers. This appliance is equipped with a 6-foot long flexible U.L. listed 20-amp power cord to match a 15-amp receptacle.

Gas Rated input 10,500 BTU/HR. Factory equipped for natural gas. Tested for LP gas.

WSM2780W: Gas Dryer—This appliance should be connected to an individual branch circuit with 120-volt single-phase 60 Hz electrical service and should be protected by 20-amp time-delay fuses or circuit breakers. This appliance is equipped with a 4-foot long flexible U.L. listed 20-amp power cord to match a 20-amp receptacle.

Gas Rated input 20,000 BTU/HR. Factory equipped for natural gas.

LP gas supply requires a conversion kit.

Kits: WSM2780W—WE25X0206

WSM2480T—WE25X0219

Have a qualified gas technician install a conversion kit before use.

Exhaust Information

See "Dryer Exhausting Information" on page 223.

Model PNRV12ZBL Installation Information (in inches)

Model GXRV10ABL Installation Information (in inches)

Installation and Parts Information

Note: R.O. System can be installed up to 30 feet from point-of-use/faucet.

Note: Can be installed under counter (as shown), in basement, or other convenient location. Before installing, see installation instructions packed with product for complete details.

Replacement Membranes, Pre- and Post-Filters

Call GE SmartWater Services, toll-free 800.952.5039 for convenient ordering.

Water Test Kit

To order a water test kit, call 800.626.2000.

GE Reverse Osmosis Models PNRV18Z, PNRV12Z and GXRV10ABL Series are tested and certified to ANSI/NSF Standard 58 for TDS and cyst reduction.

NSF Approved

NSF is the most highly recognized independent testing institution in the water treatment industry. NSF inspects our manufacturing facilities, structurally tests our product, tests our product to make sure nothing harmful is added to the water and certifies our product performance as specified on the performance data sheet (inside the product box).

SPECTRUM LABS INC.

The GE Reverse Osmosis models PNRV18Z, PNRV12Z and GXRV10ABL Series have been quality tested by an independent laboratory, Spectrum Labs, Inc.

Caution: Do not use with water that is micro-biologically unsafe or of unknown quality, without adequate disinfection before or after the system. Systems certified for cyst reduction may be used on disinfected water that may contain filterable cysts. This reverse osmosis unit contains a replaceable membrane cartridge treatment component critical for effective removal of Total Dissolved Solids. The water should be tested periodically to verify that the system is performing satisfactorily.

Built-In Room Air Conditioners Wall Opening for RAB46/47/48 Cases

A finished opening of 26-1/8" x 15-3/4", clear of intrusions, is required. Keep clearance of 4" from side walls. Brick veneer or frame walls should have wood studding surrounding case to provide firm anchoring with screws. Case can be fastened directly to brick or block walls with screws sunk in lead expansion shields.

Note: Units should be caulked on all four sides of case to the building exterior to assure building integrity.

Two Wall Cases for Tenant Option Installation
When the air conditioner is offered as a tenant option, these wall cases provide protection against outside elements.

RAB47—includes wall case, exterior grille, weather panel and steel closure panels.

RAB48—includes wall case, exterior grille, steel closure panel and two layers of insulation.

**Standard Wall Case RAB46**

Solid-sided wall case fabricated of galvanized steel with baked enamel finish. Welded areas are coated with a sealing compound to help resist rust and corrosion. Polymer gasket surrounds opening to assure tight weather seal. Aluminum grille (RAG13) is included. Panels on interior and between case and grille provide weather protection prior to installation of chassis.

30 Amp.

Wall Outlets

All wiring, including installation of receptacle, must be made in accordance with local electrical codes and regulations. Electrical outlet should be in reach of line cord.

Note: Aluminum wiring may pose special problems—consult a qualified electrician.

Note: Some models may not be available in your area due to local legislation. Contact your local dealer.

Note: When installing slide out chassis units in through-the-wall applications, keep louvers free. Do not restrict air flow areas. Fixed chassis units are not suitable for through-the-wall applications.

Zoneline Specifications—Heater Wattage and Power Connection Kits

Deluxe Line: 2200, Dry Air 25 and 3200 Series

Models are manufactured with fixed heater wattages with the appropriate power cord attached (all 265 volt models are permanently connected).

5.0 KW heaters are not available on 7,000 BTUH models.

Voltage	Heater Amps	Heater Designator	Watts	KWH	Minimum Ampacity	BTUH

265	15.1	4	4000	4.0	20	13,600
265	18.9	5	5000	5.0	30	17,000

Premium Line: 5200 Series

Power Connection Kits are REQUIRED on Premium Zoneline Chassis. (See chart.)

The correct kit for the installation is determined by the voltage and amperage of the electrical circuit and the means of connecting the unit to the building wiring. If the unit is to be plugged into a receptacle, a line cord kit would be used; if the unit is to be permanently connected, a permanent connection kit would be used.

Note: 265 volt cord set units must be installed in compliance with National Electrical Code®.

Power Connection Kit
Required on premium models. See specification sheet for heater KW and branch circuit ampacity.

Zoneline Installation

Simple Three-Step Installation

Zoneline heat pumps and heat/cool units are designed for easy installation, off or flush with the floor. When the SMC fiberglass-reinforced polyester sleeve is installed, the chassis simply slides into place.

Compatibility with existing Zoneline wall cases and rear grilles simplifies retrofit installations. A new chassis simply slides into the already installed wall case; the existing rear grille may be used as is, or with a minor modification for greater operating efficiency.

And the exclusive Quick Connect power supply kit with Premium Series makes it easy to connect the new unit to power sources already in place.

- 1. Frame the Opening.** The RAB77A SMC wall case requires an opening of 16-1/2" high x 42-3/8" wide. Position the sleeve, secure it to the studs and then caulk. Complete instructions are furnished with each unit.
- 2. Connect the Electrical Supply.** Each Zoneline unit requires a 230/208V or 265V power supply. *It is strongly recommended that electrical connections be made by a qualified electrician.* All wiring, including installation of the receptacle, must be in accordance with local codes.
- 3. Slide In Chassis.** With the wall sleeve, electrical receptacle, and exterior grille in place, the separate chassis simply slides into position. Install the roomside cabinet, and plug into the electrical receptacle. You are now ready for many years of quiet comfort.

Wall Case Dimensions

RAB71 Insulated Wall Case
Heavy-gauge galvanized steel, with insulation.
A-42", B-13-3/4", C-16"
RAB77 Wall Case
Molded SMC fiberglass-reinforced polyester compound.
A-42-1/8", B-13-7/8", C-16-1/4"
Wall Opening Dimensions
Add 1/4" to A and C dimensions for all cut-out size.
RAB71—16-1/4" min. H x 42-1/4" min. W
RAB77—16-1/2" min. H x 42-3/8" min. W

Maximum Cord Extension (in inches)

Electrical Wiring

All wiring, including installation of receptacle, must be made in accordance with local electrical codes and regulations.
Note: Aluminum wiring may pose special problems—consult a qualified electrician.

Cooling Sizes

All units come in four nominal cooling sizes: 7100, 9000, 12,000 and 15,000 BTUH.

Resistance Heat

Resistance heat or back-up heat determined by Quick Connect power cord on the Premium Series and selected heater size for the Value Series (15 amp. 8600 BTU, 20 amp. 11,700 BTU and 30 amp. 17,000 BTU @ 230 volt).

Grille Options

Stamped Aluminum Grille—RAG60
Molded Exterior Architectural Louvers (Cycology)
RAG61 or RAG64 (Beige)
RAG62 or RAG65 (Maple)
RAG63 or RAG66 (Bittersweet)
RAG67 (Extruded Aluminum)

Ducted Applications

2200 and 3200 series can be used with ductwork to heat or cool more than one room. RAK6052 Duct Adapter is applied to top of case over air discharge/RAK601 Duct Extension is applied to right or left of adapter. Locally fabricated ductwork may be added to extend to maximum recommended distance of 15 feet.

Electrical Connection

230/208 volt units may be plugged into a receptacle. 265 volt units and special application 230/208 volt units require direct connection. See Architects and Engineers Design Data Manual for electrical connection information including use of sub-base for direct connected units. Installation must comply with local electrical codes and regulations.

For the most current updates to features, specifications and installations or applications, visit our website at www.zoneline.com.

See page 159 for warranty information.
