

GE Appliances

JBP62BD/CD/WD – GE 5.0 Cu. Ft. Free-Standing Electric Range

Dimensions (in inches)

Specification Created 4/03

KW Rating	
240V	10.5
208V	7.9

Receptacle Locations

For 30" Free-Standing Ranges locally approved flexible service cord or conduit must be used because terminals are not accessible after range installation. See shaded area in drawing for location of electrical outlet box. Recommended outlet locations allow range to be installed directly against wall.

Note: 30" Ranges conform to U.L. requirements for 0" spacing for adjacent walls below countertops. To reduce possibility of scorching of walls, it is recommended a minimum of $1\frac{1}{2}$ " spacing be allowed from adjacent side walls to allow for possible extended, high-heat, no-load heating element operation.

Installation Information: Before installing, consult installation instructions packed with product for current dimensional data.

All GE ranges are equipped with an Anti-Tip device. The installation of this device is an important, required step in the installation of the range.
