*FCM9*

***Write the model and serial numbers here:***

# \_\_\_\_\_

# \_\_\_\_\_

You can find them on a plate on the right exterior wall.

# IMPORTANT SAFETY INFORMATION. READ ALL INSTRUCTIONS BEFORE USING.

## ⚠ WARNING!

Use this appliance only for its intended purpose as described in this Owner's Manual.

## SAFETY PRECAUTIONS

When using electrical appliances, basic safety precautions should be followed, including the following:

- This freezer must be properly installed and located in accordance with the Installation Instructions before it is used.
  - Do not allow children to climb, stand or hang on the shelves in the freezer. They could damage the freezer and seriously injure themselves.
  - After your freezer is in operation, do not touch the cold surfaces, particularly when hands are damp or wet. Skin may stick to these extremely cold surfaces.
  - Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.
  - Unplug the freezer before cleaning, making repairs or changing the light bulb.
  - Turning the control to the **OFF** position does not remove power to the light circuit on models with interior light.
  - Do not refreeze frozen foods which have thawed completely.
  - The maximum amount of food your freezer is designed to freeze at one time is approximately 3 pounds (1.5 kg) per cubic foot of freezer capacity. In normal position, your freezer's temperature control will maintain sufficiently low temperatures in the freezer to freeze recommended quantities of food.
  - Caution should be used when removing the door of a freezer. Particular caution should be used when removing the lid of a Chest freezer, as most Chest freezer lids are under spring tension. Contact the manufacturer's representative for a method of safe removal.
- NOTE:** We strongly recommend that any servicing be performed by a qualified individual.

## **⚠ DANGER! RISK OF CHILD ENTRAPMENT**

### *PROPER DISPOSAL OF THE FREEZER*

*When using electrical appliances, basic safety precautions should be followed, including the following:*

Child entrapment and suffocation are not problems of the past. Junked or abandoned refrigerators and freezers are still dangerous...even if they will sit for "just a few days." If you are getting rid of your old refrigerator or freezer, please follow the instructions below to help prevent accidents.

#### **Before You Throw Away Your Old Refrigerator or Freezer:**

- Take off the doors.
- Leave the shelves in place so that children may not easily climb inside.

#### **Refrigerants**

All refrigeration products contain refrigerants, which under federal law must be removed prior to product disposal. If you are getting rid of an old refrigeration product, check with the company handling the disposal about what to do.

### *USE OF EXTENSION CORDS*

*Because of potential safety hazards under certain conditions, we strongly recommend against the use of an extension cord.*

However, if you must use an extension cord, it is absolutely necessary that it be a UL-listed (in the United States) or a CSA-listed (in Canada), 3-wire grounding type appliance extension cord having a grounding type plug and outlet and that the electrical rating of the cord be 15 amperes (minimum) and 120 volts.

# IMPORTANT SAFETY INFORMATION. READ ALL INSTRUCTIONS BEFORE USING.

## ⚠ WARNING!

### HOW TO CONNECT ELECTRICITY

*Do not, under any circumstances, cut or remove the third (ground) prong from the power cord. For personal safety, this appliance must be properly grounded.*

The power cord of this appliance is equipped with a 3-prong (grounding) plug which mates with a standard 3-prong (grounding) wall outlet to minimize the possibility of electric shock hazard from this appliance.

Have the wall outlet and circuit checked by a qualified electrician to make sure the outlet is properly grounded.

If the outlet is a standard 2-prong wall outlet, it is your personal responsibility and obligation to have it replaced with a properly grounded 3-prong wall outlet.

The freezer should always be plugged into its own individual electrical outlet which has a voltage rating that matches the rating plate.

This provides the best performance and also prevents overloading house wiring circuits which could cause a fire hazard from overheated wires.

Never unplug your freezer by pulling on the power cord. Always grip plug firmly and pull straight out from the outlet.

Repair or replace immediately all power cords that have become frayed or otherwise damaged. Do not use a cord that shows cracks or abrasion damage along its length or at either end.

When moving the freezer away from the wall, be careful not to roll over or damage the power cord.

### USE OF ADAPTER PLUGS *(Adapter plugs not permitted in Canada)*

*Because of potential safety hazards under certain conditions, we strongly recommend against the use of an adapter plug.*

However, if you must use an adapter, where local codes permit, a **temporary connection** may be made to a properly grounded 2-prong wall outlet by use of a UL-listed adapter available at most local hardware stores.

The larger slot in the adapter must be aligned with the larger slot in the wall outlet to provide proper polarity in the connection of the power cord.

When disconnecting the power cord from the adapter, always hold the adapter in place with one hand while pulling the power cord plug with the other hand. If this is not done, the adapter ground terminal is very likely to break with repeated use.

If the adapter ground terminal breaks, **DO NOT USE** the freezer until a proper ground has been established.

*Attaching the adapter ground terminal to a wall outlet cover screw does not ground the appliance unless the cover screw is metal, and not insulated, and the wall outlet is grounded through the house wiring. You should have the circuit checked by a qualified electrician to make sure the outlet is properly grounded.*

**READ AND FOLLOW THIS SAFETY INFORMATION CAREFULLY.  
SAVE THESE INSTRUCTIONS**

## Starting the Freezer

- 1 Clean the inside of the freezer with a mild solution of baking soda and water (see *Care and Cleaning*).
- 2 Connect cord to power outlet.
- 3 Make sure the temperature control is set at **4**.
- 4 Allow freezer to operate for at least four hours before placing food inside.

### Temperature Control

Freezing temperature selection is made by setting the control from **1** to **7** (coldest).

If you want colder or warmer temperatures, adjust the control one step at a time.

Allow several hours after each one-step adjustment for the freezer temperature to stabilize.

Turning the control to the **OFF** position stops the cooling process but does not shut off power to the freezer.

# About the operation of your freezer.

## Power-On Light *(on some models)*

The Power-On Light indicates that the freezer is properly connected to the electrical power.

The light glows even when the temperature control is turned off.

## Key-Ejecting Lock *(on some models)*

The key for the spring-loaded lock is automatically ejected—key will not remain in lock in either the open or closed position.

*Keep the key out of reach of children and away from the freezer.*

In most climates, defrosting will be necessary only about twice a year.

*To have your freezer operate most efficiently, do not permit more than 1/2" (13 mm) of frost to accumulate on the shelves.*

To remove frost, scrape with a plastic or wood spatula or scraper.

**Do not use an ice pick or sharp-edged instrument** as it may damage or scratch the freezer.

**Do not use any electrical device in defrosting your freezer.**

## For Complete Defrosting

- 1 Turn the temperature control to the **OFF** position and unplug the freezer.
- 2 Remove all food and place it in corrugated boxes, insulated bags, picnic coolers, etc. Use towels and newspapers for insulation as needed.
- 3 With the door/lid open, use pans of hot water to speed loosening of frost. Remove large pieces before they melt.
- 4 There is a defrost water drain at the front of the cabinet. Remove the drain cap on the front of the freezer and insert a hose directly into the drain hole. Remove the drain plug inside the cabinet.
- 5 Sponge excess water from the bottom of the freezer as it collects to prevent overflowing.
- 6 After defrosting, clean the inside of the freezer (see *Care and Cleaning*).
- 7 Replace the drain plug inside the cabinet and the cap on the defrost drain. Fold over and dry the gasket on the hinge side of the lid.
- 8 Plug in the freezer. Return the temperature control to its previous position and return food to the freezer.

**NOTE:** Water may drip from the back flange of the lid cover during defrosting. This is normal. Ice builds up in the lid insulation when the lid is open for adding or removing food, and melts during the defrosting operation.

# Care and cleaning of the freezer.

## Cleaning Your Freezer

■ **Outside.** Protect the paint finish. The finish on the outside of the freezer is a high quality, baked-on paint finish. With proper care, it will stay new-looking and rust-free for years. Apply a coat of appliance polish wax when the freezer is new and then at least twice a year. Appliance polish wax also works well to remove tape residue from freezer surfaces.

**Keep the finish clean.** Wipe with a clean cloth lightly dampened with appliance polish wax or mild liquid dishwashing detergent. Dry and polish with a clean, soft cloth. Do not wipe the freezer with a soiled dishwashing cloth or wet towel. Do not use scouring pads, powdered cleaners, bleach, or cleaners containing bleach.

**CAUTION:** Care should be taken in moving the freezer away from the wall. All types of floor coverings can be damaged, particularly cushioned coverings and those with embossed surfaces.

■ **Inside.** Clean the inside of your freezer at least once a year. We recommend that the freezer be unplugged before cleaning. If this is not practical, wring excess moisture out of sponge or cloth when cleaning in the vicinity of switches, lights or controls.

Use warm water and baking soda solution—about a tablespoon of baking soda to a quart of water. Rinse thoroughly with water and wipe dry. Do not use cleaning powders or other abrasive cleaners.

An open box of baking soda in the freezer will absorb stale freezer odors. Change the box every three months.

### In Case of Extended Power Failure

- Keep freezer door/lid closed. Your freezer will keep food frozen for 24 hours provided warm air is not admitted.
- If freezer is out of operation for 24 hours or more, add dry ice. Leave ice in large pieces. Add more ice as required.

**WARNING:** Handling of dry ice can cause freezing of the hands—gloves or other protection is recommended.

- If dry ice is not available, move food to a frozen food locker temporarily—until power is restored.

### Preparing to Move

Disconnect the power cord plug from the wall outlet. Remove foods, defrost and clean the freezer.

Secure all loose items such as grille and shelves by taping them securely in place to prevent damage.

Be sure freezer stays in upright position during actual moving and in van. The freezer must be secured in van to prevent movement. Protect outside of freezer with blanket.

### Preparing for Vacation

To maintain freezer in operation during vacations, be sure your house power is not turned off. For sure protection of freezer contents, you may want to ask a neighbor to check the power supply and freezer operation every 48 hours.

For extended vacations or absences, you may prefer to move your frozen foods to a storage locker temporarily. If your freezer is to be left empty, disconnect power cord plug from wall outlet. To prevent formation of odors, place open box of baking soda in freezer and leave freezer door/lid open.

When the freezer is not operating, it can be left in an unheated house or room without damage to cabinet or mechanism.

### Replacing the Light Bulb

*Moving the control to OFF does not remove power to the light circuit.*

The bulb is located behind the shield on the freezer door/lid.

- 1 Unplug the freezer.
- 2 Remove the three screws in the light shield.

- 3 Remove the light shield.
- 4 Replace with the same size and type bulb.
- 5 Line up the holes in the light shield with the holes in the refrigerator and replace the screws.

## Preparing to install the freezer.

*Read these instructions completely and carefully.*

### Freezer Location

Your freezer should be conveniently located for day-to-day use in a dry, well-ventilated room.

Do not install the freezer where the temperature will go below 0° F or above 110° F, because it will not maintain proper temperatures.

Be sure to install your freezer on a floor strong enough to support it when it is fully loaded.

The freezer must be solidly positioned on the floor if it is to function at its best. Shims may be used to accomplish this wherever the floor is too uneven. If the place selected for the freezer is damp or moist, place 2 X 4's (51 mm X 102 mm) under its entire length to assure adequate support.

### Clearances

On all models, allow 3" (76 mm) on top, back and sides for proper air circulation.

### Adjustable Legs

Legs at the front corners of the freezer should be set so the freezer is firmly positioned on the floor.

These things are normal and do not indicate a need for service.

- A warm cabinet exterior as the refrigeration system transfers heat from the inside to the outside through the exterior cabinet walls.
- The sound of the high-efficiency compressor motor.

## Before you call for service...

**Troubleshooting Tips**  
Save time and money! Review the charts on the following pages first and you may not need to call for service.

Problem	Possible Causes	What To Do
<b>Freezer does not operate or Power-On Light is not on</b>	Temperature control in <b>OFF</b> position.	• Move the control to a temperature setting.
	Freezer is unplugged.	• Push the plug completely into the outlet.
	The fuse is blown/circuit breaker is tripped.	• Replace fuse or reset the breaker.
<b>Freezer starts/stops too frequently</b>	Door/lid left open.	• Check to see if package is holding door/lid open.
	Too frequent or too long door/lid openings.	
	Temperature control set too cold.	• See <i>About the operation of your freezer.</i>
<b>Freezer operates too long</b>	Door/lid left open.	• Check to see if package is holding door/lid open.
	Too frequent or too long door/lid openings.	
	Temperature control set too cold.	• See <i>About the operation of your freezer.</i>
	Inadequate air circulation space around cabinet.	• See <i>Preparing to install the freezer.</i>
<b>Noisy operation or cabinet vibrates</b>	Floor may be weak, causing freezer to vibrate when compressor is on.	• Placing 2 X 4's (51 mm X 102 mm) under the length of the freezer will help support it and may reduce vibration.
	Cabinet is not positioned solidly on floor.	• Adjust Legs. See <i>Preparing to install the freezer.</i> Or use shims for uneven floor.
<b>Freezer temperature too warm</b>	Door/lid left open.	• Check to see if package is holding door/lid open.
	Too frequent or too long door/lid openings.	

## Before you call for service...

### Troubleshooting Tips

<b>Problem</b>	<b>Possible Causes</b>	<b>What To Do</b>
<b>Foods defrosting</b>	Temperature control in <b>OFF</b> position.	• Move the control to a temperature setting.
	Freezer is unplugged.	• Push the plug completely into the outlet.
	The fuse is blown/circuit breaker is tripped.	• Replace fuse or reset the breaker.
	Door/lid left open.	• Check to see if package is holding door/lid open.
	Too frequent or too long door/lid openings.	
<b>Freezer temperature too cold</b>	Temperature control set too cold.	• See <i>About the operation of your freezer.</i>
<b>Moisture forms on outside of cabinet</b>	Not unusual during periods of high humidity.	• Wipe surface dry.
<b>Interior light does not work (on some models)</b>	No power at outlet.	• Replace fuse or reset the breaker.
	Freezer is unplugged.	• Push the plug completely into the outlet.
	Light bulb burned out.	• Replace bulb.
<b>Door/lid won't fully close by itself</b>	Package holding door/lid open.	
<b>Slow starting time after being off</b>	Built-in overload protection.	
<b>Excessive frost build-up</b>	Door/lid left open.	• Check to see if package is holding door/lid open.
	Too frequent or too long door/lid openings.	
	Not unusual during periods of high humidity.	

## GE Service Protection Plus™

GE, a name recognized worldwide for quality and dependability, offers you Service Protection Plus™—comprehensive protection on all your appliances—**No Matter What Brand!**

**Benefits Include:**

- Backed by GE
- All brands covered
- Unlimited service calls
- All parts and labor costs included
- No out-of-pocket expenses
- No hidden deductibles
- One 800 number to call

***We'll Cover Any Appliance.  
Anywhere. Anytime.\****

You will be completely satisfied with our service protection or you may request your money back on the remaining value of your contract. No questions asked. It's that simple.

Protect your refrigerator, dishwasher, washer and dryer, range, TV, VCR and much more—**any brand!** Plus there's no extra charge for emergency service and low monthly financing is available. Even icemaker coverage and food spoilage protection is offered. You can rest easy, knowing that all your valuable household products are protected against expensive repairs.

Place your confidence in GE and call us in the U.S. toll-free at **800.626.2224** for more information.

\*All brands covered, up to 20 years old, in the continental U.S.

Please place in envelope and mail to:

***General Electric Company***  
**Warranty Registration Department**  
**P.O. Box 32150**  
**Louisville, KY 40232-2150**

# Freezer Warranty.

All warranty service provided by our Factory Service Centers, or an authorized Customer Care® technician. To schedule service, on-line, 24 hours a day, contact us at [www.GEAppliances.com](http://www.GEAppliances.com), or call 800.GE.CARES (U.S.).

Staple your receipt here.  
Proof of the original purchase date is needed to obtain service under the warranty.

For The Period Of:	GE Will Replace:						
<b>One Year</b> From the date of the original purchase	<b>Any part</b> of the freezer which fails due to a defect in materials or workmanship. During this <b>full one-year warranty</b> , GE will also provide, <b>free of charge</b> , all labor and in-home service to replace the defective part.						
<b>Five Years</b> From the date of the original purchase	<b>Any part of the sealed refrigerating system</b> (the compressor, condenser, evaporator and all connecting tubing) which fails due to a defect in materials or workmanship. During this <b>additional four-year limited warranty</b> , GE will also provide, <b>free of charge</b> , all labor and in-home service to replace the defective part.						
<b>One or Five Years</b> From the date of the original purchase (Limited warranty)	<p><b>Food which has spoiled because of a manufacturing defect</b> either in: a) any part of the freezer within one year from the date of original purchase, or b) any part of the sealed refrigerating system within five years from the date of original purchase. <b>Not to exceed the cumulative limit specified below.</b></p> <table> <tr> <th>Freezer Capacity</th><th>Cumulative Limit</th></tr> <tr> <td>14.9 cu. ft. and smaller</td><td>\$100.00</td></tr> <tr> <td>15.0 cu. ft. and larger</td><td>\$150.00</td></tr> </table> <p><b>Within 30 days after food spoilage occurs, you must provide satisfactory proof of the spoilage</b> to a Factory Service Center, an authorized Customer Care® servicer or the dealer from whom the freezer was purchased.</p>	Freezer Capacity	Cumulative Limit	14.9 cu. ft. and smaller	\$100.00	15.0 cu. ft. and larger	\$150.00
Freezer Capacity	Cumulative Limit						
14.9 cu. ft. and smaller	\$100.00						
15.0 cu. ft. and larger	\$150.00						

## What GE Will Not Cover:

- Service trips to your home to teach you how to use the product.
- Improper installation, delivery or maintenance.
- Failure of the product if it is abused, misused, or used for other than the intended purpose or used commercially.
- Food spoilage caused by:
  - a) Power interruption from the utility.
  - b) Blown fuse, open circuit breaker or other power disconnection on the owner's premises.
  - c) Freezer not operating because of abnormally low electric power voltage or inadequate house wiring.
- Damage caused after delivery.
- Replacement of house fuses or resetting of circuit breakers.
- Damage to the product caused by accident, fire, floods or acts of God.
- Incidental or consequential damage caused by possible defects with this appliance.
- Replacement of the light bulb.

This warranty is extended to the original purchaser and any succeeding owner for products purchased for home use within the USA. In Alaska, the warranty excludes the cost of shipping or service calls to your home.

Some states do not allow the exclusion or limitation of incidental or consequential damages. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. To know what your legal rights are, consult your local or state consumer affairs office or your state's Attorney General.
