## DIMENSIONS AND INSTALLATION INFORMATION

Wall coverings, countertops and cabinets surrounding the wall oven must be able to withstand a temperature of up to 200°F (94°C).

If the cabinet in which the wall oven is installed does not have a solid bottom, two braces or runners must be installed to support the weight of the oven. The runners and braces must support up to 400 lbs (181 kg).

Door handle protrudes 3" from door face. Cabinets and drawers on adjacent 45° and 90° walls should be placed to avoid interference with the handle.

**ATTENTION INSTALLER:** Electric wall ovens are NOT approved for installation with a plug and receptacle. They must be hard wired into an approved junction box.

**IMPORTANT:** Before installing, consult installation instructions packed with product for current dimensional data.

## DIMENSIONS AND INSTALLATION INFORMATION

30" Double electric wall ovens are approved for installation above 27" and 30" warming drawers.

**WHEN TO USE THE PEDESTAL RAILS:** When replacing an older GE Appliances 30" double wall oven with a new GE Appliances model. Cutout Height = 51-13/16" to 51-15/16". This is our traditional cutout height.

**WHEN NOT TO USE THE PEDESTAL RAILS:** When replacing a 30" double wall oven from another manufacturer (ie; Whirlpool) with a new GE Appliances model. Cutout height = 50-1/4". You will need to verify that the existing cutout matches the 50-1/4" dimension.

If the new GE Appliances 30" double wall oven is being installed into new construction (ie; not a replacement), then the recommended installation is to use the pedestal rails.

**ATTENTION INSTALLER:** Electric wall ovens are NOT approved for installation with a plug and receptacle. They must be hard wired into an approved junction box.

**IMPORTANT:** Before installing, consult installation instructions packed with ALL products for current dimensional and combination data.

Dimension and installation information are shown in inches.
