DIMENSIONS AND INSTALLATION INFORMATION (IN INCHES)

HELPFUL TIPS

- Professional ranges offer a number of choices in size and cooktop configurations.
- All Professional Ranges are factory set for natural or liquid propane gas. The correct model should be ordered for the installation situation.

NOTE

- Conversion kits are included with the range if the wrong gas type was ordered. High Altitude kit, WB28K10553 for operation above 6,000 feet (for Natural and LP gas models), is also available. The kits must be installed by a qualified service technician at additional cost.

INSTALLATION INFORMATION

- Before installing, consult installation instructions packed with product or online at Monogram.com for current dimensional data.
- A suitable overhead vent hood is required for models with a grill and is recommended for all other models.

ADVANCE PLANNING

Refer to dimensional drawings for appropriate placement and necessary clearances when planning the installation.

- Working areas adjacent to the range should have 18" minimum clearance between countertop and cabinet bottom.
- Allow 12" minimum clearance to an adjacent wall on each side.
- Installation must conform with local codes. In the absence of local codes, the range must comply with the National Fuel Gas Code, ANSI Z223.1-1990.

WARNING

Installations without a hood require 48" minimum to combustibles. A custom hood installation with exposed horizontal combustible surfaces must have an Auto-On feature. Refer to hood installation instructions for specific hood clearances.

The surface of the entire back wall above the range and below the hood must be covered with a non-combustible material such as metal, ceramic tile, brick, marble or other stone.

HELPFUL TIPS

GAS SUPPLY

- The natural gas models are designed to operate at 5" water column pressure. For proper operation, the pressure of the natural gas supplied to the regulator must be between 7" and 13" water column.
- The LP models are designed to operate at 10" water column pressure. For proper operation, the pressure of the LP gas supplied to the regulator must be between 11" and 13" water column.

OPTIONAL BACKSPLASH ACCESSORIES

- The range requires a 12" minimum clearance to a vertical combustible surface at the rear. A backsplash is required for installations with less than 12" clearance. The following backsplash accessories are available, or a custom, non-combustible backsplash can be used.
- Order one with a 48"-wide range backsplash:
 - UXADJB48PSS-30"-36" adjustable-height backsplash with warming shelf
