Uses Most  
Energy  
680

kWh/year (kilowatt-hours per year) is a measure of energy (electricity) use.

Your utility company uses it to compute your bill. Only standard size clothes washers  
are used in this scale.

**Clothes washers using more energy cost more to operate.**  
**This model's estimated yearly operating cost is:**

\$29

\$16

when used with an electric water heater

when used with a natural gas water heater

Based on eight loads a week and a 2004 U.S. Government national average  
cost of 8.60 ¢ per kWh for electricity and 91.0 ¢ per therm for natural gas.

Your actual operating cost will vary depending on your local utility rates and your use of the product.

Important: Removal of this label before consumer purchase violates the Federal Trade Commission's Appliance Labeling Rule (16 C.F.R. Part 305).
