

GE Appliances

JBS15HWW/CC/BB – GE® 30" Free-Standing Electric Range

Dimensions (in inches)

*Dimension from wall to front of closed oven door handle is 27-1/8".

KW Rating	
240V	11.2
208V	6.9
Breaker Size	
40 Amps [†]	

[†]**Note:** Check local codes for required breaker size.

Effective January 1, 1996, the National Electrical Code requires that new construction (not existing) utilize a 4-conductor connection to an electric range.

Receptacle Locations

Locally approved flexible service cord or conduit must be used because terminals are not accessible after range installation. See shaded area in drawing for location of electrical outlet box. Recommended outlet locations allow range to be installed directly against wall.

Note: 30" Ranges conform to U.L. requirements for 0" spacing for adjacent walls below countertops. Allow 1-1/2" spacing from the side of the range to adjacent vertical walls above the cooktop surface.

Installation Information: Before installing, consult installation instructions packed with product for current dimensional data.

All GE ranges are equipped with an Anti-Tip device. The installation of this device is an important, required step in the installation of the range.
