272

Therms/year is a measure of energy use. Your utility company uses it to compute your bill. Only models with first hour ratings of 75 to 86 gallons are used in this scale.

Natural gas water heaters that use fewer therms/year cost less to operate. This model's estimated yearly operating cost is:

\$235

Based on a 2004 U.S. Government national average cost of \$.91 per therm for natural gas. Your actual operating cost will vary depending on your local utility rates and your use of the product.

Meets NAECA and ASHRAE Requirements
