## GE® Long Vent Super 7.0 Cu. Ft. Capacity Electric Dryer

### Dimensions and Installation Information (in inches)

#### Exhaust Options:

3-way via rear, right and bottom.

#### NEMA Receptacle codes:

3-prong dryer cord/30A/4' long (cat #WX9X2) is for NEMA10-30R receptacle

4-prong dryer cord/30A/4' long (cat #WX9X18) is for NEMA14-30R receptacle

#### Circuit Requirements:

An individual, properly-grounded branch circuit, protected by a 30-amp circuit breaker or a time-delay fuse, is required.

#### Electric Dryer Rating:

240V, 5600W, 24A, 60Hz

208V, 4400W, 22A, 60Hz

**Note:** Dryer wall outlet must be located within 36" of service cord entry and accessible when dryer is mounted in position.

**Installation Information:** For complete information, see installation instructions packed with your dryer.

## GE® Long Vent Super 7.0 Cu. Ft. Capacity Electric Dryer

### Dimensions and Installation Information (in inches)

For complete information, see installation instructions packed with your dryer.

#### Ducting Materials:

For best performance, this dryer should be vented with 4" diameter all rigid metal exhaust duct. If rigid metal duct cannot be used, then UL-listed flexible metal (semi-rigid) ducting can be used (Kit WX08X10077). In special installations, it may be necessary to connect the dryer to the house vent using a flexible metal (foil-type) duct. A UL-listed flexible metal (foil-type) duct may be used **ONLY** in installations where rigid metal or flexible metal (semi-rigid) ducting cannot be used AND where a 4" diameter can be maintained throughout the entire length of the transition duct. Please see installation instruction packed with your dryer for complete instructions when using flexible metal (foil type) ducting.

#### Exhaust Length Calculation:

1. Determine the number of 90° turns needed for your installation. If you exhaust to the side or bottom of dryer, add one turn.
2. The maximum length of 4" rigid (aluminum or galvanized) duct which can be tolerated is shown in the table.

A turn of 45° or less may be ignored. Two 45° turns within the duct length should be treated as a 90° elbow.

A turn over 45° should be treated as a 90° elbow.

Dryers **must** be exhausted to the outside.

**Caution:** For personal safety do not terminate exhaust into a chimney, under any enclosed house floor (crawl space), or into an attic, since the accumulated lint could create a fire hazard or moisture could cause damage. Never terminate the exhaust into a common duct or plenum with a kitchen exhaust, since the combination of lint and grease could create a fire hazard.

Exhaust ducts should be terminated in a dampered wall cap to prevent back drafts, bird nesting, etc. The wall cap must also be located at least 12" above the ground or any other obstruction with the opening pointed down.

**For more information on venting kits and accessories, please call 1-800-GE CARES.**

### Special Installation Requirements

#### Alcove or Closet Installation:

- If your dryer is approved for installation in an alcove or closet, it will be stated on a label on the dryer back.
- The dryer **MUST** be exhausted to the outside.
- Minimum clearances between dryer cabinet and adjacent walls or other surfaces are:
  - 0" either side
  - 3" front and rear
- Minimum vertical space from floor to overhead cabinets, ceilings, etc. is 52"
- Closet doors must be louvered or otherwise ventilated and must contain a minimum of 60 sq. in. of open area equally distributed. If this closet contains both a washer and a dryer, doors must contain a minimum of 120 sq. in. of open area equally distributed.
- No other fuel-burning appliance shall be installed in the same closet with a gas dryer.

#### Bathroom or Bedroom Installation:

- The dryer **MUST** be exhausted to the outdoors.
- The installation must conform with the local codes, or in the absence of local codes, with the National Electric Code and National Fuel Gas Code, ANSI Z223 for gas dryers.

#### Minimum Clearances other than Alcove or Closet Installation:

- Minimum clearances to combustible surfaces
  - 0" both sides
  - 3" rear

## GE® Long Vent Super 7.0 Cu. Ft. Capacity Electric Dryer

### Features and Benefits

- 7.0 Cu. Ft. Super Capacity - Handles large-size items and family-size loads
- Long Vent - Delivers exceptional drying performance with duct runs of up to 150 ft.\* for greater installation flexibility (\*of equivalent ducting)
- Rotary Electronic Controls with Cycle Status Lights - Make it easy to select and monitor wash cycles
- Four Heat Selections - Provide the right temperature for the right drying results
- Eight Dry Cycles - A variety of fast, flexible options for drying clothes
- Variable End-Of-Cycle Signal - Adjustable volume offers added flexibility
- DuraDrum™ - Provides long-lasting dependability and durability
- Interior Dryer Light - Lets you see everything inside for easy loading and unloading
- Quiet-By-Design™ - Engineered for quiet operation
- Model DSLVR48EHWW - White on white
